Reclaiming The Classroom Teacher Research As An Agency For Change:

Reclaiming the Classroom Dixie Goswami, Peter Stillman, 1987 This rich collection of readings is in effect an assertion that all English teachers can and should be engaged in classroom research **Composing Teacher-Research** Cathy Fleischer, 1995-01-01 This story of a teacher's growth as a researcher in the classroom reflects the larger issues of the debate about this kind of research during the last decade Revisioning Writers' Talk Mary Ann Cain, 1995-01-01 Stressing the social dimensions of composing this book inquires into the problems of interpreting and representing writers' talk in both academic and self-directed writing groups arguing for the value of such talk as a distinct mode of knowing that both complements and criticizes more traditional forms of inquiry Emphasizing the role of writers' talk in shaping the text that they produce it discusses the problem of representing and interpreting writers' talk in the context of composition studies using feminist theoretical perspectives to illuminate the difficulty in representing the writer as a knowing subject neither essentialist nor totally constructivist *Revisioning Writers' Talk* also investigates the idea of the social in social constructivist theories of composing arguing that they maintain rather than demystify hierarchies of discourse and in turn the subjects and objects of composing Cain's own story of composing is told in the context of her educational experiences as a writer Finally the book discusses the constructions of power and authority by both academic and self-directed writing groups *Learning, Teaching, and Community* Lucinda Pease-Alvarez, Sandra R. Schecter, 2006-04-21 This volume brings together established and new scholarly voices to explore how participatory and situated approaches to learning can contribute to educational innovation The contributors' critical examinations of educational programming and engagements provide insights into how educators, youth, families, and community members understand and enact their commitments to diversity and equitable access Collectively these essays complicate notions of community alerting readers to ways in which community can be constructed other than in geographical and ethnoracial terms as alliances and collaborations of individuals joining together to accomplish or negotiate shared agendas The focus on agency combined with social context a dialectic to which all of the authors speak enlarges and invigorates our sense of what is pedagogically possible in societies characterized by diversity and flux Part I *Linking Pedagogy to Communities* focuses on dynamic initiatives where practitioners collaborate with community members and other professionals as they acknowledge and build on the cultural, linguistic, and intellectual resources of ethnic minority students and their communities Part II *Professional Learning for Diversity* centers on the authors' experiences in facilitating opportunities for working with prospective and practicing teachers to develop situated pedagogies highlighting both the challenges that emerge and the transformations that occur Part III *Learning in Community and Community in Learning* illustrates how educational innovation can extend beyond the realm of schools and classrooms by elucidating ways in which individuals construct learning venues in out-of-school settings *Learning, Teaching, and Community: Contributions of Situated and Participatory Approaches to Educational Innovation* is a compelling and timely text ideally suited for courses focused on

teacher education and development informal learning equity and education multilingual and multicultural education language and culture educational foundations and school reform educational restructuring and will be equally of interest to faculty researchers and professionals in these areas

Handbook of Reading Research, Volume III Michael L. Kamil, Peter B. Mosenthal, P. David Pearson, Rebecca Barr, 2016-11-18 In Volume III as in Volumes I and II the classic topics of reading are included from vocabulary and comprehension to reading instruction in the classroom and in addition each contributor was asked to include a brief history that chronicles the legacies within each of the volume s many topics However on the whole Volume III is not about tradition Rather it explores the verges of reading research between the time Volume II was published in 1991 and the research conducted after this date The editors identified two broad themes as representing the myriad of verges that have emerged since Volumes I and II were published 1 broadening the definition of reading and 2 broadening the reading research program The particulars of these new themes and topics are addressed

Composing a Teacher Study Group Richard J. Meyer, With Linda Brown, Elizabeth DeNino, Kimberly Larson, Mona McKenzie, 2013-10-18 There has been a flurry of writing about teachers as inquirers and researchers as well as books about children as inquirers This volume brings these two areas together teachers and students are inquiring at Ridgeway Elementary School It demonstrates the importance of thought collectives as forums for student and teacher learning The children in the primary classrooms in this book are working to understand the world around them and their place in it as literate individuals Their teachers are studying themselves and the students No other book describes the way this work affects children teachers and the ethos of the school in which the work occurs In that sense this book is groundbreaking in that it is an honest portrayal of the joys and sorrows the successes and the stumbling blocks the clear vision and the obfuscating that teachers live as they enact a life of asking questions being curious wandering and wondering Acknowledging and honoring the many faces of inquiry in schools this book demonstrates the children s inquiry their teachers inquiry and the place of that inquiry in schools It lays out the ways in which inquiry is fundamental to teaching and learning in a democracy in which all of the members of the community have a voice in deciding curricular directions and ways of presenting learning Teachers are presented as thinkers and learners not merely as technicians enacting others views of what is to be learned and when Readers will find teachers dealing with the real issues of life in schools they will see how teachers can use their existing situations as points of departure for their growth and their students learning
