ABSTRACT Academic achievement has been the focal point in education for decades In 2001 an Act of Congress was proposed to improve individual outcomes in education through evidenced based research using measurable goals higher standards and accountability This federal legislation known as the No Child Left Behind Act of 2001 mandates that all teachers be highly qualified by 2006 and that all students become proficient by the 2013 14 school year specifically in the area of literacy Consequently kindergarten readiness has become an area of concern thus placing preschool teachers under pressure to prepare children for school The purpose of this study was to examine multiple factors that have been identified in the literature as impacting achievement in elementary and secondary education to ascertain their contribution toward literacy development in preschool children Such factors included child gender race home SES attendance behavior and childcare site teacher education teacher experience class size site SES class environment Additionally within child protective factors were examined for their role in literacy development for children with and without challenging behaviors To examine early literacy and behavior in preschool children hierarchical linear modeling HLM was conducted with literacy skills expressive language and phonemic awareness assessed at four points in time though the Individual Development and Growth Indicators IGDI A significant relationship was found between expressive language skills and race attendance classroom environment and class size Phonemic awareness was significantly related to gender home SES and teacher education Within child protective factors positively impacted phonemic awareness skills for children in the non challenging behavior group only An in depth description of the findings and limitations are discussed within this document Overall this study suggests that many of the factors impacting achievement in elementary and secondary education also impact literacy development in preschool children These findings support the use of early intervention and preventative services for this population as a means to promote kindergarten readiness and future achievement

Developing Early Literacy Christopher J. Lonigan, Timothy Shanahan, 2008 The National Assessment of Educational Progress reveals that 37 percent of U S fourth graders fail to achieve basic levels of reading achievement In 1997 the U S Congress asked that a review of research be conducted to determine what could be done to improve reading and writing achievement The resulting Report of the National Reading Panel Teaching Children to Read NICHD 2000 has been influential in helping to guide reading education policy and practice in the United States However that report did not examine the implications of instructional practices used with children from birth through age 5 To address this gap in the knowledge base the National Early Literacy Panel NELP was convened The panel was asked to apply a similar methodological review process to that used by the National Reading Panel NRP to issues of instructional practices for young children so that parents and teachers could better support their emerging literacy skills The NELP report represents a systematic and extensive synthesis of the published research literature concerning children s early literacy skills It provides educators and policymakers with important information about the early skills that are implicated in later literacy learning as well as information about the type of instruction that can enhance these skills The results also identify areas in which additional research is needed The meta analyses conducted by the panel showed that a wide range of interventions had a positive impact on children s early literacy learning

A Child Becomes a Reader Bonnie B. Armbruster, 2006 Effective Early Literacy Practice Andrea DeBruin-Parecki, 2008 The concise guide to putting the research on how children learn to read into practice in real preschool classrooms Supporting Early Literacy Development Terry Gould, 2017-10-05 With two year olds now becoming an established part of the school population in many areas of the UK it is critically important that those working with these very young children fully understand how literacy can

be most successfully approached at this sensitive and crucial stage of their development This book takes the perspective that early literacy for the very young child doesn't just involve books to read but requires skilled and knowledgeable people who develop sensitive responsive relationships with the child Practitioners parents and caregivers are each a vital component of the child's experience with reading and writing and all should work together to support the development of emerging literacy skills
