## **Recognizing Delirium In The Elder Person:**

*Recognizing Delirium in the Elder Person* Beverly Cracom Publications Staff, Society for Academic Emergency Medicine (U.S.), 1995-01-01 Summary Presents case examples definitions etiologies and current disposition pathways for a potentially life threatening condition *Fractures in the Elderly* Robert J. Pignolo, Jaimo Ahn, 2018-03-01 Newly revised and updated this book provides geriatricians and orthopedic surgeons with the most vital tools to treat elderly patients who sustain a variety of fractures The text uniquely encompasses the etiologies of fracture in the elderly perioperative management the surgical treatment of common fractures in the elderly as well as rehabilitation and prevention in the older patient It focuses on the most current data and opinions regarding assessment and management of geriatric conditions that predispose the elderly to fracture perioperative complications and subsequent functional decline Unlike any other text experts in both orthopedics and geriatrics review the content of each chapter for readability and appeal to his/her respective discipline making this the physician's ultimate guide to treating elderly patients with injuries *Fractures in the Elderly* Second Edition is a valuable resource for geriatricians orthopedic surgeons physiologists and rehabilitation specialists **Falls and**

**Cognition in Older Persons** Manuel Montero-Odasso, Richard Camicioli, 2019-10-04 Despite of the enormous efforts of researchers and clinicians to understand the pathophysiology of falls in older adults and establish preventive treatments there is still a significant gap in our understanding and treating of this challenging syndrome particularly when we focus in cognitively impaired older adults Falls in older adults are a very common yet complex medical event being the fifth leading cause of death and a main cause of insidious disability and nursing home placement in our world aging population Importantly falls in the cognitively impaired double the prevalence of the cognitively normal affecting up to 60% of older adults with low cognition and increasing the risk of injuries The past decade has witnessed an explosion of new knowledge in the role of cognitive processes into the falls mechanisms This was also accompanied with clinical trials assessing the effect of improving cognition via pharmacological and non pharmacologic approaches to prevent falls and related injuries Unfortunately this revolution in emerging interventions left a gap between clinician scientists and researchers at academic centers where the new data had been generated and the practitioners who care for cognitively impaired patients with falls Most advances are published in specialty journals of geriatric medicine neurology and rehabilitation The aim of this book is to reduce this gap and to provide practical tools for fall prevention in cognitively impaired populations The proposed book is designed to present a comprehensive and state of the art update that covers the pathophysiology epidemiology and clinical presentation of falls in cognitively impaired older adults We additionally aim to reduce the knowledge gap in the association between cognitive processes and falls for practitioners from a translational perspective from research evidence to clinical approach We will address gaps and areas of uncertainty but also we will provide practical evidence based guidelines for the assessment approach and treatment of falls in the cognitively impaired populations This book is a unique contribution to the

field Existing textbooks on fall prevention focus in global approaches and only tangentially address the cognitive component of falls and not purposely address special populations and or settings as residential care and nursing homes Due to the expected increase of proportion of older adults with cognitive and mobility impairments this book is also valuable for the whole spectrum of the health care of the elderly By including a transdisciplinary perspective from geriatric medicine rehabilitation and physiotherapy medicine cognitive neurology and public health this book will provide a practical and useful resource with wide applicability in falls assessment and prevention

**Nursing** Rebecca Neno, Barry Aveyard, Hazel Heath, 2008-04-15 *Older People and Mental Health Nursing* provides an evidence based guide to caring for the growing number of older people with mental health issues. It focuses on the knowledge and key skills which practitioners require to work effectively with older people who have or are at risk of developing mental health needs. Divided into five sections, *Older People and Mental Health Nursing* first explores the background, historical perspectives and influences on mental health care in later life. It then looks at the ethical and legal issues involved, therapeutic relationships and the values underpinning support and care. Part three focuses on aspects which have traditionally been neglected in mental health care including culture, religion and sexuality. Part four details specific mental health issues for older people including delirium, depression and dementia. The final section explores future trends in older people's mental health and offers ideas on how nursing is developing and could develop to address these. Offers a practical evidence based guide to the care of older people with mental health conditions. Includes thought provoking practice examples throughout. Contains guidelines for nursing practice, therapeutic interventions. Includes case studies and reflective scenarios. Written by experts in the field.

**Caring For Dependent Older Persons** Jit Seng Tan, Shing Yuen Teo, 2018-11-02 *Caring for Dependent Older Persons* details the knowledge that a caregiver should have when caring for an older person who is dependent on his/her care. The main part of this book is a step by step guide on all the necessary skills needed when helping an older person with his/her Activities of Daily Living, monitoring of the person's health and the overall care of the older person. This book provides holistic knowledge by explaining how age and disease affect an older person. It also covers the potential stress that a caregiver may endure while taking care of an older person. It is a valuable reference guide for a caregiver during the journey of caregiving. This book is the first of its kind to provide caregivers with comprehensive information on taking care of a dependent older person especially in the Singapore context. The step by step explanation can be a reference guide for caregivers before or after their caregiver training. The financial help section gathers information on all the schemes available in Singapore that can help with the care of a dependent older person. A comprehensive list of financial help available in Singapore is also detailed in this section. This book is co-written by Dr Tan who has many years of experience running a medical homecare service. He has shared the pertinent information that a caregiver should be equipped with.
