Governance and Regionalism in Asia Nicholas Thomas, 2009-01-13 In the decade since the Asian financial crisis the ten states of Southeast Asia that form ASEAN together with China Japan and South Korea have formed the basis of a community intended to support the well being of its member states markets and peoples This highly successful regionalisation was not anticipated by the region's leaders however and as a result policy makers are increasingly talking about meeting fatigue and the need to find a better way to govern regional affairs Among the reforms being considered is a shift towards a more rules based culture as well as the more explicit incorporation of both private sector and civil society organisations into the policy processes In short ASEAN 3 is seeking to develop new norms and processes for its networks and institutions This book explores the pressures currently influencing East Asian regionalist policy debates analysing the trend towards deeper integration and the emergence of a governance model for managing regional processes Combining state and subnational perspectives in conjunction with an examination of the role of the business community and civil society organisations this book highlights the policy challenges confronting regionalism and governance in East Asia including key issues such as the rule of law financial cooperation and a case study on disaster management

**Japan's Great Stagnation**

W. R. Garside, 2012-01-01 Recent events have rendered Japan's lost decades all the more relevant to the rest of us. Rick Garside in this wide ranging and accessible account explores the political economy of Japan's great stagnation with an eye toward describing how other advanced economies can avoid going down the same path. Barry Eichengreen, University of California Berkeley, US Professor. Garside's timely book transcends the national preoccupation suggested by its title. From one viewpoint this is a case study admittedly on a grand scale of the experience of one country in one historical period. But in analyzing the dynamic relationship between Japan's post war economic miracle and its chronic stagnation from the 1990's he offers a penetrating insight into the links between profound and embedded institutional and ideological influences, global upheaval and almost disastrous national economic performance. Hence Japan's Great Stagnation, the unfolding story of that country's declining experience from masterful economic power to seeming economic paralysis provides us with an all too familiar scenario with which to approach the contemporaneous ills of the world's developed economies. The interaction between banking crises, unwieldy institutions, especially but not only financial institutions, policy frailties and stagnating demand all conspired to create crisis and then handicap or prevent recovery. And the familiarity of the story is aggravated by the global financial crisis which now threatens to engulf us. History never fully repeats itself but Professor Garside's illuminating examination of Japan's recent experiences must surely provide important points of relevance for the world's current malaise. He is to be congratulated on the depth and scope of what he has achieved and for its relevance to what we are experiencing. Barry Supple, University of Cambridge, UK. This timely book presents a critical examination of the developmental premises of Japan's high growth success and its subsequent drift into recession, stagnation and piecemeal reform. The country which within a few decades of wartime defeat mounted a serious challenge to American hegemony appeared incapable of fully adjusting to shifting economic circumstance once the impulses of catch up growth and the good fortune of an accommodating international environment faded. The banking crises, spiralling government debt and stagnant growth experienced by major industrialized nations in recent years have evoked renewed interest in Japan's economic denouement since the 1990s. To many Japan's drift into recession and financial crisis during the early 1990s and later into stagnation and prolonged deflation demonstrated precisely what not to do when fashioning remedial policy. This book details the legacies of Japan's high growth success and how they affected Japan's capacity to cope with shifting national and international circumstance from the 1980s. It reviews the contentious debates over the causes and consequences of the bubble economy and the lost decade and assesses the extent to which reforms since 1997 have been compromised by lingering attachments to Japan's distinctive post war political economy. Providing an analytical overview of both the high growth and recessionary periods and of subsequent reform agendas, this timely book will appeal to students, academics and researchers of economic history, development and politics, particularly those with an interest in Japan and Asian studies more generally.

**Japan's**

**Development Aid to China** Tsukasa Takamine, 2012-11-12 Paradoxically Japan provides massive amounts of development aid to China despite Japan's clear perception of China as a prime competitor in the Asia Pacific region. This clearly written and comprehensive volume provides an overview of the way Japan's aid to China has developed since 1979. It explains the shifts that have taken place in Japan's China policy in the 1990s against the background of international changes and domestic changes in both countries and offers new insights into the way Japanese aid policy making functions thereby providing an alternative view of Japanese policy making that might be applied to other areas. Through a series of case studies it shows Japan's increasing willingness to use development aid to China for strategic goals and explains a significant shift of priority project areas of Japan's China aid in the 1990s from industrial infrastructure to socio environmental infrastructure. The book argues that contrary to the widely held view that Japan's aid to China is given for reasons of commercial self interest the objectives are much more complex and dynamic. Using original material Takamine shows how policy making power within the Japanese government has shifted in recent years away from officials in the Ministry of Foreign Affairs to politicians in the Liberal Democratic Party.

**Institutions of the Asia-Pacific** Mark Beeson, 2008-08-18 The Asia Pacific region is home to the world's largest economies and some of its most volatile strategic relationships. But for all its geopolitical importance it has generally failed to develop the sorts of powerful and effective institutions that are found in Western Europe. This book explains why and considers the prospects for future institutional development in this pivotal region.

**Regional Integration - Europe and Asia Compared** Woosik Moon, 2017-07-05 This book examines and compares the integration process in both Europe and Asia and draws some possible lessons for East Asia from the European experience. The book embraces the political dimension of integration peace and security economic trade and monetary aspects as well as cultural aspects.

**Rivalry And Cooperation In The Asia-Pacific: The Dynamics Of A Region In Transition (In 2 Volumes)** Mark Beeson, 2019-09-23 Rivalry and Cooperation in the Asia Pacific provides a comprehensive and accessible introduction to the most important strategic and economic region in the world. Asia Pacific is a region that is undergoing a major transformation largely as a consequence of the rise of China and its growing rivalry with the United States. Whatever happens in the Asia Pacific will profoundly influence global events not just regional ones. Looking ahead the region's future direction and even its name is contested and uncertain. This two volume reference work by one of the world's leading analysts of regional affairs places these events in historical context and considers what they may mean for future political economic and strategic relations. By focusing on the United States China and the region's most significant middle powers the book explains why and how the Asia Pacific has become the fulcrum of international events.

**Startup Capitalism** Robyn Klingler-Vidra, Ramon Pacheco Pardo, 2025-04-15 In *Startup Capitalism* Robyn Klingler Vidra and Ramon Pacheco Pardo explore the place of startups in contemporary East Asian economies. The last few decades have seen East Asian governments provide increasing support for startups new high growth technologically oriented firms. Yet as the authors observe such

initiatives do not necessarily benefit the growth of startups as challengers to large established firms. Rather they often enable startups to function as boosters for the competitiveness of these firms. Startups in short are both disruptors to and resources for big businesses. Klingler Vidra and Pacheco Pardo demonstrate this dual role by examining the evolution of startup centric policies in Japan, South Korea, Taiwan, and China. They show that in the region what they call startup capitalism, an economic and political system in which startups contribute to employment, innovation, and growth, can take multiple forms. Rich with empirical detail, *Startup Capitalism* reveals how and why startups can end up working with or even for large firms to drive a country's technological capabilities. *Nuclear Proliferation in Northeast Asia* A. O'Neil, 2007-10-01 To what extent does the failing strategy of nonproliferation pose serious challenges for Northeast Asia's security environment? Are there alternative strategies for managing nuclear weapons in the region? Should the presence of nuclear weapons in Northeast Asia necessarily be seen in exclusively negative terms, as many experts believe?

**East Asia and the Trials of Neo-Liberalism** Kevin Hewison, Richard Robison, 2013-09-13 A much needed examination of the impact of neo liberalism in East Asia in the years since the 1997 to 1998 Asian Economic Crisis. These leading contributors tackle the nature of neo liberalism and the forces and institutions driving it. With fresh case studies of Indonesia, Thailand, South Korea, Malaysia, China, and Vietnam, showing how domestic elites are critical to the ways in which the neo liberal agenda is manifested, modified, and rejected. They also engage with the key question of why there has been a dramatic restructuring of state and economic power, with some elements of domestic elites having been decimated, others reinventing themselves, while important new elements have been constituted. This book was previously published as a special issue of the leading *Journal of Development Studies*.

*Governance and Public Sector Reform in Asia* Anthony Cheung, Ian Scott, 2003-08-29 Based on new field research, this book assesses the current state of governance and public sector reforms in eleven Asian countries and jurisdictions, especially in the wake of the recent regional financial crisis that seriously affected some of them. It analyses reform efforts comparatively against a backdrop of governance problems and seeks to establish whether these efforts represent a substantive shift in attitudes towards reform, or whether they serve simply to reinforce existing practices. The authors explore a number of important themes that are central to governance and public sector reform issues. These include the role of the state, the success or failure of organizational reforms, corruption, the applicability of the new public management model in the Asian context, and the governance values and reform models promoted by regional and international agencies. *The Political Economy of East Asia* K. Cai, 2016-04-30 In a systematic study of the political economy of East Asia, Cai adopts an historical perspective alongside a contemporary focus, exploring East Asia's development since the late 19th century. Following similar paths to economic development, East Asian states have achieved economic success, integrating themselves into a regional economy.

**Capitalist Restructuring and the Pacific Rim** Ravi Palat, 2004-07-31 This book situates the evolution of capitalist economies along Asia's Pacific Rim after the Second World War within broader global political and

economic changes Specifically it charts their growth at the interface of periodic crises and successive waves of restructuring and links changes in the world economy to shifts in regional dynamics in east and southeast Asia It suggests that while the expansion of Japanese corporate networks was crucial to the emergence of the region as a low cost exporter to the world the reintegration of China into the world market will free the region from its dependence on the US as a market of last resort
