Regional cooperation, regionalism and regionalization in the Middle East are usually considered to be weak and rather ceremonial. However, since September 11, 2001, a new regional order is emerging and the impact of geostrategic changes in the international environment has yet to be satisfactorily studied. With older regional organizations suffering from weaknesses, new forms appear to be developing and flourishing due either to European support or growing sub-regional identities. This volume offers refined theoretical models and approaches which are attuned to the new dynamics and contradictions of a wide range of regionalist projects in the contemporary Middle East. Case studies of the most important regional organizations in different policy fields offer comprehensive overviews of the main actors, institutions, historical development and current issues.

**Governing Regional Integration for Development** Antoni Estevadeordal, 2016-04-22. Developing countries have joined the rapidly growing global system of regional trade agreements (RTAs) over the past years. The drive towards regional integration has advanced with the formation of new markets and groups in Latin America, Africa, Asia, the Middle East and Oceania, with few developing countries remaining outside these regional schemes. This volume looks at how getting governance right is a central element for successful RTA implementation, taking stock of the quality and effectiveness of the monitoring of developing country RTAs around the world. Organized by the main world regions and primarily focusing on developing country RTAs, the book also includes two case studies focused on monitoring in developed country regional agreements by way of comparison. The contributors operationalize governance in the context of RTA implementation with a more narrow and technical term of monitoring and provide eight important lessons for assessing monitoring around the world.

IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up-to-date and comprehensive knowledge of the social sciences.

**Shifting Geo-Economic Power of the Gulf** Dr Bessma Momani, Professor Matteo Legrenzi, 2013-03-28. Bringing together for the first time distinguished Gulf experts to analyse the renewed geo-economic prominence of the Gulf states, this volume investigates some of the new power brokers in the world economy: the oil-exporting states of the Gulf. The Gulf Cooperation Council's (GCC) members—Bahrain, Kuwait, Oman, Qatar, the United Arab Emirates and Saudi Arabia—collectively have the largest proven oil reserves in the world and are among the world's largest oil-exporting states. Gulf Arab states are actively pursuing a variety of foreign investment strategies. Some of these investments are being managed by sovereign wealth funds, government investment corporations and government-controlled companies. This renewed geo-economic status has received a lot of media

attention but there has been a dearth of academic study on what this shift in global economic power means for the international economic system This volume aims to fill this gap with a rigorous scholarly analysis based on primary sources and raw economic data It brings together the expertise of academics who have devoted their career to careful study of the region and of renowned scholars of international political economy
