## **Reconstructing Conservation Finding Common Ground:**

*Reconstructing Conservation* Ben A. Minteer, Robert E. Manning, 2003-10 Focusing not just on the tensions that have marked the deconstructivist debate over wilderness and environmentalism this book represents a larger and ultimately more constructive discussion over the proper course of future conservation scholarship and action *Reconstructing Conservation* Ben A. Minteer, Robert E. Manning, 2003-10 Focusing not just on the tensions that have marked the deconstructivist debate over wilderness and environmentalism this book represents a larger and ultimately more constructive discussion over the proper course of future conservation scholarship and action **Proceedings of the 2006 Northeastern Recreation Research Symposium** ,2007 **The Protected Landscape Approach** Jessica Brown, Nora J. Mitchell, Michael Beresford, 2005 The traditional patterns of land use that have created many of the world's cultural landscapes contribute to biodiversity support ecological processes provide important environmental services and have proven sustainable over the centuries Protected landscapes can serve as living models of sustainable use of land and resources and offer important lessons for sustainable development Examples of these landscapes and the diverse strategies needed to maintain this essential relationship between people and the land are provided *General Technical Report NRS-P* ,2006 CRM ,2005 Correction Lines Curt Meine, 2013-04-10 The last fifteen years have been a period of dramatic change both in the world at large and within the fields of ecology and conservation The end of the Cold War the dot com boom and bust the globalizing economy and the attacks of September 11 among other events and trends have reshaped our worldview and the political environment in which we find ourselves At the same time emerging knowledge needs and opportunities have led to a rapid evolution in our understanding of the scientific foundations and social context of conservation *Correction Lines* is a new collection of essays from one of our most thoughtful and eloquent writers on conservation putting these recent changes into perspective and exploring the questions they raise about the past present and future of the conservation movement The essays explore interrelated themes the relationship between biological and social dimensions the historic tension between utilitarian and preservationist approaches the integration of varied cultural perspectives the enduring legacy of Aldo Leopold the contrasts and continuities between conservation and environmentalism the importance of political reform and the need to retool conservation to address twentyfirst century realities Collectively the essays assert that we have reached a critical juncture in conservation a correction line of sorts *Correction Lines* argues that we need a more coherent and comprehensive account of the past if we are to understand our present circumstances and move forward under unprecedented conditions Meine brings together a deep sense of history with powerful language and compelling imagery yielding new insights into the origins and development of contemporary conservation *Correction Lines* will help us think more clearly about the forces that have changed and are changing conservation and inspire us to address current realities and future needs *Thomas Jefferson and Philosophy* M. Andrew Holowchak, 2013-12-11 Though it is not

uncommon for historians to have something to say concerning philosophical strands in Jefferson's thought that something is usually insubstantial often misleadingly so or inchoate Overall precious little has been said The significance of the man and the richness of his thought demands that this defect be remedied Thomas Jefferson and Philosophy is a collection of nine new essays on philosophical elements in Jefferson's writings The first of its kind this collection should lead to further philosophical analysis of Jefferson's thinking especially by philosophers who tend to appreciate Jefferson only as the author of the Declaration of Independence and to greater appreciation for the man who gave to statesmanship a large number of the prime of his years out of a moral sense of duty to others In that regard Jefferson was always first a philosopher This book will be a valuable read for students and scholars of history political theory and philosophy as well as anyone interested in the thought of Thomas Jefferson

*Infinite Nature* R. Bruce Hull, 2013-07-01 You would be hard pressed to find someone who categorically opposes protecting the environment yet most people would agree that the environmentalist movement has been ineffectual and even misguided Some argue that its agenda is misplaced oppressive and misanthropic a precursor to intrusive government regulatory bumbles and economic stagnation Others point out that its alarmist rhetoric and preservationist solutions are outdated and insufficient to the task of galvanizing support for true reform In this impassioned and judicious work R Bruce Hull argues that environmentalism will never achieve its goals unless it sheds its fundamentalist logic The movement is too bound up in polarizing ideologies that pit humans against nature conservation against development and government regulation against economic growth Only when we acknowledge the infinite perspectives on how people should relate to nature will we forge solutions that are respectful to both humanity and the environment *Infinite Nature* explores some of these myriad perspectives from the scientific understandings proffered by anthropology evolution and ecology to the promise of environmental responsibility offered by technology and economics to the designs of nature envisioned in philosophy law and religion Along the way Hull maintains that the idea of nature is social in order to reach the common ground where sustainable and thriving communities are possible we must accept that many natures can and do exist Incisive heartfelt and brimming with practical solutions *Infinite Nature* brings a much needed and refreshing voice to the table of environmental reform

emerges is of an industry that reinvents itself in response to changing market parameters even while core issues of stakeholder equities and political processes remain problematic International in scale the book links with its companion piece Indigenous Tourism the commodification and management of culture also published by Elsevier as an outcome of the very highly successful conference Taking Tourism to the Limits hosted by the University of Waikato Department of Tourism Management in 2003

**America's National Heritage Areas** Robert Manning,2022-06-15 There are fifty five National Heritage Areas scattered across the US and they continue to grow in number and diversity Though they re not officially national parks their conservation education and recreation related objectives echo those of the national parks to conserve nationally significant natural and cultural landscapes and to make them available to the public for purposes of education recreation and sustainable tourism related economic development But the methods of achieving these objectives are different very different than those used in the national parks While both national parks and NHAs are established by Congress national parks are conventionally large areas of public land that are owned and managed by the National Park Service NPS NHAs take a more inclusive partnership based approach to their work they offer local citizens government at all levels non profit organizations and private sector enterprises the opportunity to define celebrate and conserve the natural historic cultural scenic and recreational resources that have been vital in shaping their identity and destiny NHAs are composed primarily of private lands they re living landscapes where participants reside work and play Each chapter in this guidebook describes the remarkable natural and cultural resources that define NHAs and highlights nearby visitor attractions enticing readers to visit NHAs and to enjoy and appreciate the attractions offered

The City Natural Shen Hou,2010-11-23 The weekly magazine Garden and Forest existed for only nine years 1888 1897 Yet in that brief span it brought to light many of the issues that would influence the future of American environmentalism In The City Natural Shen Hou presents the first biography of this important but largely overlooked vehicle for individuals with the common goal of preserving nature in American civilization As Hou s study reveals Garden and Forest was instrumental in

redefining the fields of botany and horticulture while also helping to shape the fledgling professions of landscape architecture and forestry The publication actively called for reform in government policy urban design and future planning for the preservation and inclusion of nature in cities It also attempted to shape public opinion on these issues through a democratic ideal that every citizen had the right and need to access nature These notions would anticipate the conservation and city beautiful movements that followed in the early twentieth century Hou explains the social and environmental conditions that led to the rise of reform efforts organizations and publications such as *Garden and Forest* She reveals the intellectual core and vision of the magazine as a proponent of the city natural movement that sought to relate nature and civilization through the arts and sciences *Garden and Forest* was a staunch advocate of urban living made better through careful planning and design As Hou shows the publication also promoted forest management and preservation not only as a natural resource but as an economic one She also profiles the editors and contributors who set the magazine's tone and follows their efforts to expand America's environmental expertise Through the pages of *Garden and Forest* the early period of environmentalism was especially fruitful and optimistic many individuals joined forces for the benefit of humankind and helped lay the foundation for a coherent national movement Shen Hou's study gives *Garden and Forest* its due and adds an important new chapter to the early history of American environmentalism

The Landscape of Reform Ben A. Minteer, 2006

In *The Landscape of Reform* Ben Minteer offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic *A Sand County Almanac* Minteer argues that these writers blazed a significant third way in environmental ethics and practice a more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minteer shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minteer explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minteer we can help bring about a new civic minded environmentalism today

**The Oxford Handbook of Food Ethics** Anne Barnhill, Tyler Doggett, Mark

Budolfson,2018-01-08 Academic food ethics incorporates work from philosophy but also anthropology economics the environmental sciences and other natural sciences geography law and sociology Scholars from these fields have been producing work for decades on the food system and on ethical social and policy issues connected to the food system Yet in the last several years there has been a notable increase in philosophical work on these issues work that draws on multiple literatures within practical ethics normative ethics and political philosophy This handbook provides a sample of that philosophical work across multiple areas of food ethics conventional agriculture and alternatives to it animals consumption food justice food politics food workers and food and identity **A Companion to California History** William

Deverell,David Igler,2014-01-28 This volume of original essays by leading scholars is an innovative thorough introduction to the history and culture of California Includes 30 essays by leading scholars in the field Essays range widely across perspectives including political social economic and environmental history Essays with similar approaches are paired and grouped to work as individual pieces and as companions to each other throughout the text Produced in association with the Huntington USC Institute on California and the West The Agrarian Vision Paul B. Thompson,2010-07-30 As industry and

technology proliferate in modern society sustainability has jumped to the forefront of contemporary political and environmental discussions The balance between progress and the earth s ability to provide for its inhabitants grows increasingly precarious as we attempt to achieve sustainable development In The Agrarian Vision Sustainability and Environmental Ethics Paul B Thompson articulates a new agrarian philosophy emphasizing the vital role of agrarianism in modern agricultural practices Thompson a highly regarded voice in environmental philosophy unites concepts of agrarian philosophy political theory and environmental ethics to illustrate the importance of creating and maintaining environmentally conscious communities Thompson describes the evolution of agrarian values in America following the path blazed by Thomas Jefferson John Steinbeck and Wendell Berry Providing a pragmatic approach to ecological responsibility and commitment The Agrarian Vision is a significant compelling argument for the practice of a reconfigured and expanded agrarianism in our efforts to support modern industrialized culture while also preserving the natural world The Wilderness Debate Rages on

Michael P. Nelson,J. Baird Callicott,2008 Ten years ago The Great New Wilderness Debate began a cross disciplinary conversation about the varied constructions of wilderness and the controversies that surround them The Wilderness Debate Rages On will reinvigorate that conversation and usher in a second decade of debate Like its predecessor the book gathers both critiques and defenses of the idea of wilderness from a wide variety of perspectives and voices The Wilderness Debate Rages On includes the best explorations of the concept of the concept of wilderness from the past decade underappreciated essays from the early twentieth century that offer an alternative vision of the concept and importance of wilderness and writings meant to clarify or help us rethink the concept of wilderness Narrative writers such as Wendell Berry Scott Russell Sanders Marilynne Robinson Kathleen Dean Moore and Lynn Maria Laitala are also given a voice in order to show how the

wilderness debate is expanding outside the academy The writers represented in the anthology include ecologists environmental philosophers conservation biologists cultural geographers and environmental activists The book begins with little known papers by early twentieth century ecologists advocating the preservation of natural areas for scientific study not as did Thoreau Muir and the early Leopold for purposes of outdoor recreation The editors argue that had these writers influenced the eventual development of federal wilderness policy our national wilderness system would better serve contemporary conservation priorities for representative ecosystems and biodiversity
