Reconstructing Professionalism In University Teaching Teachers And Learners In Action:

EBOOK: Reconstructing Professionalism In University Teaching Melanie Walker, 2001-07-16 How can academics carve out new and effective ways of working with students against a background of constant change and policy pressure How can university teachers both enhance student learning and realize their own educational values What might be the shape of a new professionalism in university teaching At the heart of this book is a small group of academics from very different disciplines making sense of their teaching situations We witness each of their struggles and celebrations in designing a new course engaging a large first year class introducing a mentoring programme nurturing independent learning through project work using debates to develop students critical thinking and evaluating the success of their teaching This book is the story of a higher education project and central to the story are the attempts of university teachers to enact a critical professionalism in their everyday lives in teaching and learning and also their development of a shared and collaborative dialogue Each of the team seeks not only to improve their practice of teaching but also to explore amongst themselves what kind of professional they want to be and how to realize it in their work with students *Reconstructing Professionalism in University Teaching* reveals how academics working together on researching their own teaching can both improve their students learning and start to redefine their own professional roles

EBOOK: The Moral Foundations of Educational Research Pat Sikes, John Nixon, William Carr, 2003-04-16 This is a book for everyone doing educational research It is not simply a routine provocation directed at positivists by a group of researchers advocating qualitative methods The book makes a valuable contribution to the literature on the ethics of educational research by offering something more than opposition to the narrow utilitarian research agenda *British Journal of Educational Studies* *The Moral Foundations of Educational Research* considers what is distinctive about educational research in comparison with other research in the social sciences As the contributors all agree that education is always an essentially moral enterprise discussion about methodology starts not with the widely endorsed claim that educational research should be useful and relevant but with the attempt to justify and elaborate that claim with reference to its moral foundations Determining the nature of usefulness and relevance is not simply a matter of focussing on impact and influence but involves a radical reconceptualisation of the moral and educational significance of what is deemed to be useful and relevant There is no argument with this emphasis on the generation of useful and relevant knowledge but it is suggested that educational research requires a fuller and more rounded understanding that takes account of the moral values of those who conduct it Educational research is grounded epistemologically in the moral foundations of educational practice It is the epistemological and moral purposes underlying the usefulness and relevance of educational research that matter

Understanding Teaching Excellence in Higher Education Alan Skelton, 2005 What makes a university teacher excellent As debates rage about whether this is down to subject knowledge communication skills taking a research led approach or being a technological whiz this book provides the first in depth examination of teaching excellence in higher

education Identifying and examining interpretations of teaching excellence it considers what excellent means and implies for practice

Being and Becoming Through Higher Education Gloria Dall'Alba, 2024-07-10 This book focuses on the importance of an ontological dimension for today's higher education with critical attention to implications for the student experience engagement satisfaction wellbeing employability dis embodiment and activism in which students take a stand on their own being and becoming In accessible language key philosophical ideas are explored for their relevance to contemporary higher education integrating philosophical with pedagogical perspectives Although much of the material has been published previously there is value in bringing it together into a single volume in exploring an ontological dimension of higher education as it is embodied In doing so the book demonstrates benefits to pedagogy through sustained attention to philosophy and theory and vice versa thereby contributing to recent heightened interest in the philosophy and theory of higher education This book is intended to prompt re imagining the ways in which higher education is conceived and conducted An argument is put forward for greater emphasis on expanding possibilities for knowing acting and being toward fuller lives of interdependence with others and things in an interconnected world Through highlighting an ontological dimension in this manner a hope filled future emerges for higher education

Capability Approach and Social Justice in Education Melanie Walker, Elaine Unterhalter, 2007-07-09 This compelling book introduces Nobel laureate Amartya Sen's capability approach and explores its significance for theory policy and practice in education The book looks particularly at questions concerning the education of children gender equality and higher education Contributors hail from the UK USA Australia Italy and Mexico **Authentic Professional Learning** Ann

Webster-Wright, 2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or para professional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid

handsomely should be current and informed in their decision making. Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work. Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed. This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning. What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others' intents.

Learning to be Professionals Gloria Dall 'Alba, 2009-08-07. Preparing professionals to meet the demands of changes in practice is a compelling issue for the development of society professions and individual professionals. A key tenet of this book is that we currently prepare professionals for the world of work in ways that are generally limited in scope and inadequate for addressing contemporary professional practice. The book critically investigates professional education programmes and the assumptions upon which they are based. It argues for an ontological turn in which professional education attends not only to what students know and can do but also who they are becoming as professionals. In a scholarly well grounded account the book closely interweaves theory and empirical material on learning to be professionals. It provides a fresh innovative approach to designing professional education programmes as well as to research about this important enterprise. This book makes a timely insightful contribution to debate about educating for the professions.
