*Path-Breaking Work in Plastic and Reconstructive Microsurgery* Doina Dumitrescu-Ionescu, 2020-02-25 Path Breaking Work in Plastic and Reconstructive Microsurgery by Dr Doina Dumitrescu Ionescu was reviewed by David Soutar for The Royal College of Surgeons of England

This is a refreshingly original and unusual text. It is a testament to the life work of the author and her struggle to develop clinical microsurgery in Rumania. It takes the reader on a journey starting with learning the basic techniques of microsurgery laboratory and experimental research teaching and training. It then progresses to the building of an infrastructure for development and clinical practice, the maintenance of meticulous records and the evaluation of results. As such, the book is a very personal account written in an informal style so that the reader can follow the author's own development and experience. The format is unusual, beginning with the author's philosophy for developing reconstructive microsurgery. It then covers personal techniques developed for peripheral techniques developed for peripheral nerve repairs and microvascular anastomosis. It is clear from early on in this book that the author's main interest lies in the management of peripheral nerves, particularly in the limbs. There is a section on reconstructive microsurgery of the brachial plexus following trauma and a section on limb replantation. Says the author, 'The reconstructive microsurgery experience helped me to modernize reparative plastic surgery in Romania in reconstructive plastic surgery and reconstructive microsurgery by radically changing the surgical approach. This allowed also for new procedures in Dupuytren's Disease, Volkmann and post burn contractures, approach revolutionizing everything that was repair surgery of any extremity, cephalic superior inferior but also the extension of reconstructions in the large defects of supraskeletal soft parts'.

*Brunner & Suddarth's Textbook of Medical-surgical Nursing* Suzanne C. O'Connell Smeltzer, Brenda G. Bare, Janice L. Hinkle, Kerry H. Cheever, 2010. Preparing students for successful NCLEX results and strong futures as nurses in today's world. Now in its 12th edition, Brunner and Suddarth's Textbook of Medical Surgical Nursing is designed to assist nurses in preparing for their roles and responsibilities in the medical surgical setting and for success on the NCLEX. In the latest edition, the resource suite is complete with a robust set of premium and included ancillaries such as simulation support, adaptive testing and a variety of digital resources helping prepare today's students for success. This leading textbook focuses on physiological, pathophysiological and psychosocial concepts as they relate to nursing care. Brunner is known for its strong Nursing Process focus and its readability. This edition retains these strengths and incorporates enhanced visual appeal and better portability for students. Online Tutoring powered by Smarthinking. Free online tutoring powered by Smarthinking gives students access to expert nursing and allied health science educators whose mission like yours is to achieve success. Students can access live tutoring support, critiques of written work and other valuable tools.

*Code of Federal Regulations*, 2002. Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries.

*Reconstructive Procedures in Surgery* P. Gilroy Bevan, 1982.
