Scenes of Projection Jill H. Casid, 2015-01-01 Theorizing vision and power at the intersections of the histories of psychoanalysis media scientific method and colonization *Scenes of Projection* poaches the prized instruments at the heart of the so called scientific revolution the projecting telescope camera obscura magic lantern solar microscope and prism From the beginnings of what is retrospectively enshrined as the origins of the Enlightenment and in the wake of colonization the scene of projection has functioned as a contraption for creating a fantasy subject of discarnate vision for the exercise of reason Jill H Casid demonstrates across a range of sites that the scene of projection is neither a static diagram of power nor a fixed architecture but rather a pedagogical setup that operates as an influencing machine of persistent training Thinking with queer and feminist art projects that take up old devices for casting an image to reorient this apparatus of power that produces its subject *Scenes of Projection* offers a set of theses on the possibilities for felt embodiment out of the damaged and difficult pasts that haunt our present

Each Wild Idea Geoffrey Batchen, 2002-02-22 Essays on photography and the medium s history and evolving identity In *Each Wild Idea* Geoffrey Batchen explores a wide range of photographic subjects from the timing of the medium s invention to the various implications of cyberculture Along the way he reflects on contemporary art photography the role of the vernacular in photography s history and the Australianness of Australian photography The essays all focus on a consideration of specific photographs from a humble combination of baby photos and bronzed booties to a masterwork by Alfred Stieglitz Although Batchen views each photograph within the context of broader social and political forces he also engages its own distinctive formal attributes In short he sees photography as something that is simultaneously material and cultural In an effort to evoke the lived experience of history he frequently relies on sheer description as the mode of analysis insisting that we look right at rather than beyond the photograph being discussed A constant theme throughout the book is the question of photography s past present and future identity

Archaeology and Photography Lesley McFadyen, Dan Hicks, 2020-08-05 Does a photograph freeze a moment of time What does it mean to treat a photographic image as an artefact In the visual culture of the 21st century do new digital and social forms change the status of photography as archival or objective or are they revealing something more fundamental about photography's longstanding relationships with time and knowledge Archaeology and Photography imagines a new kind of Visual Archaeology that tackles these questions The book reassesses the central place of Photography as an archaeological method and re-wires our cross disciplinary conceptions of time objectivity and archives from the History of Art to the History of Science Through twelve new wide ranging and challenging studies from an emerging generation of archaeological thinkers Archaeology and Photography introduces new approaches to historical photographs in museums and to contemporary photographic practice in the field The book re-frames the relationship between Photography and Archaeology past and present as more than a metaphor or an analogy but a shared vision Archaeology and Photography calls for a change in how we think about photography and time It argues that new archaeological accounts of duration and presence can replace older conceptions of the photograph as a snapshot or remnant received in the present The book challenges us to imagine Photography like Archaeology not as a representation of the past and the reception of traces in the present but as an ongoing transformation of objectivity and archive Archaeology and Photography will prove indispensable to students

researchers and practitioners in History Photography Art Archaeology Anthropology Science and Technology Studies and Museum and Heritage Studies **Color and Victorian Photography** Lindsay Smith, 2020-07-18 Nineteenth century photography is usually thought of in terms of black and white images but intense experimentation with generating and fixing colors pre dated the public announcement of the daguerreotype in 1839 Introducing readers to the long frequently overlooked story of the relationship of color to photography this short anthology of primary sources includes accounts of the scientific search for color by Elizabeth Fulham and Sir John Herschel photographers views on color extracts from the photographic press and from manuals on handcoloring and accounts by critics such as John Ruskin The volume provides a fresh perspective on the culture history and theory of early photography demonstrating why scientists philosophers photographers literary writers and artists were so fascinated by the potential for polychrome in photographs With an introductory essay arguing that from the earliest days of photography the prospect of color loomed large in the imagination of its creators users and critics this reader is an essential resource for students and scholars wanting to gain a full understanding of nineteenth century photography and its relationship to art history literature and culture **Visual Cultures in Science and Technology** Klaus Hentschel, 2014 This book aims to provide a synthesis of the history generation use and transfer of images in scientific practice It delves into the rich reservoir of case studies on visual representations in scientific and technological practice that have accumulated over the past couple of decades by historians sociologists and philosophers of science The main aim is thus located on the meta level It adopts an integrative view of recurrently noted general features of visual cultures in science and technology something hitherto unachieved and believed by many to be a mission impossible By systematic comparison of numerous case studies the purview broadens away from myopic microanalysis in search of overriding patterns The many different disciplines and research areas involved encompass mathematics technology natural history medicine the geosciences astronomy chemistry and physics The chosen examples span the period from the Renaissance to the late 20th century The broad range of visual representations in scientific practice is treated as well as schooling in pattern recognition design and implementation of visual devices and a narrowing in on the special role of illustrators and image specialists The Miracle of Analogy Kaja Silverman, 2015-03-04 The Miracle of Analogy is the first of a two volume reconceptualization of photography It argues that photography originates in what is seen rather than in the human eye or the camera lens and that it is the world s primary way of revealing itself to us Neither an index representation nor copy as conventional studies would have it the photographic image is an analogy This principle obtains at every level of its being a photograph analogizes its referent the negative from which it is generated every other print that is struck from that negative and all of its digital offspring Photography is also unstoppably developmental both at the level of the individual image and of medium The photograph moves through time in search of other kin some of which may be visual but others of which may be literary architectural philosophical or literary Finally photography develops with us

and in response to us It assumes historically legible forms but when we divest them of their saving power as we always seem to do it goes elsewhere The present volume focuses on the nineteenth century and some of its contemporary progeny It begins with the camera obscura which morphed into chemical photography and lives on in digital form and ends with Walter Benjamin Key figures discussed along the way include Nic phore Ni pce Louis Daguerre William Fox Talbot Jeff Wall and Joan Fontcuberta

Circulation and Control Marie-Stéphanie Delamaire, Will Slauter, 2021-10-08 The nineteenth century witnessed a series of revolutions in the production and circulation of images From lithographs and engraved reproductions of paintings to daguerreotypes stereoscopic views and mass produced sculptures works of visual art became available in a wider range of media than ever before But the circulation and reproduction of artworks also raised new questions about the legal rights of painters sculptors engravers photographers architects collectors publishers and subjects of representation such as sitters in paintings or photographs Copyright and patent laws tussled with informal cultural norms and business strategies as individuals and groups attempted to exert some degree of control over these visual creations With contributions by art historians legal scholars historians of publishing and specialists of painting photography sculpture and graphic arts this rich collection of essays explores the relationship between intellectual property laws and the cultural economic and technological factors that transformed the pictorial landscape during the nineteenth century This book will be valuable reading for historians of art and visual culture legal scholars who work on the history of copyright and patent law and literary scholars and historians who work in the field of book history It will also resonate with anyone interested in current debates about the circulation and control of images in our digital age

The Gender of Photography Nicole Hudgins, 2020-09-02 It would be unthinkable now to omit early female pioneers from any survey of photography s history in the Western world Yet for many years the gendered language of American British and French photographic literature made it appear that women s interactions with early photography did not count as significant contributions Using French and English photo journals

cartoons art criticism novels and early career guides aimed at women this volume will show why and how early photographic clubs journals exhibitions and studios insisted on masculine values and authority and how Victorian women engaged with photography despite that dominant trend Focusing on the period before 1890 when women were yet to develop the self assurance that would lead to broader recognition of the value of their work this study probes the mechanisms by which exclusion took place and explores how women practiced photography anyway both as amateurs and professionals Challenging the marginalization of women s work in the early history of photography this is essential reading for students and scholars of photography history and gender studies
