This book suggests ways to bring about a more relevant and meaningful education for individual students and a safer happier and more dynamic life in society *The Transformation of the American Democratic Republic* Stephen M.

Krason, 2017-09-08 In this stimulating volume Stephen M Krason considers whether the Founding Fathers vision of the American democratic republic has been transformed and if so in what ways He looks to the basic principles of the Founding Fathers then discusses the changes that resulted from evolving contemporary expectations about government Referencing philosophical principles and the work of great Western thinkers Krason then explores a variety of proposals that could forge a foundation for restoration Acknowledging that any attempt to revive the Founders views on a democratic republic must start in the public sphere Krason focuses on concerned citizens who are aware of the extent to which our current political structures deviate from the Founders vision and want to take action Ultimately a democratic republic can exist be sustained and flourish only when there is a deep commitment to it in the minds and norms of its people Written by a foremost authority in the field of US Constitutional law this book will appeal to those interested in American history society and politics The Learning of Liberty Lorraine Smith Pangle, Thomas L. Liberal Democracy and Liberal Education Daniel E. Cullen,2016-12-24 The essays in this book reflect on the paradoxical relationship of liberal education and liberal democracy Liberal education emphasizes knowledge for its own sake detached from all instrumental purposes It also aims at liberation from the manifold sources of unfreedom including political sources In this sense liberal education is negative questioning any and all constraints on the activity of mind Liberal democracy devoted to securing individual natural rights purports to be the regime of liberty par excellence Since both liberal education and liberal democracy aim to set individuals free they would seem to be harmonious and mutually reinforcing But there are reasons to doubt that liberal education can be the civic education liberal democracy needs If liberal education is in tension with all instrumental purposes how does it stand toward the goal of preparing the kind of citizens liberal democracy needs The book s contributors are critical of the way higher education typically interprets its responsibility for educating citizens and they link those failures to academia s neglect of certain founding principles of the American political tradition and of the traditional liberal arts ideal Leo Strauss and His Legacy John Albert Murley,2005-01-01 With over 10 000 entries identifying work of hundreds of Strauss s students and their students students this bibliography is the most indeed the only

Arnn, 2004 History of how the educational system has changed From the beginning of this country till now Arguments for liberal education and limited government Recovering Resources - Recycling Citizenship Jutta Gutberlet, 2016-04-08 Environmental awareness and social mobilization is a growing issue in Latin America This book discusses how co operative recycling practices have been increasingly used as a strategy to contest both the waste problem and urban poverty Selective waste collection and sorting materials out of the garbage stream has become a widespread survival strategy for the economically excluded population While severe and chronic occupational health problems and risks are very common among the recycling workers thousands of people exclusively depend on accessing these resources By examining experiences from Brazil and other Latin American countries this book questions what can be done to improve the environment and livelihoods for these excluded citizens examines the specific health and risk implications and looks at the many innovative recycling co ops and associations which have recently emerged creating an exciting new form of solidarity economy In doing so it uncovers the landscapes of despair populated by the urban marginalized but also the landscapes of hope where solidarity and collaboration make a pathway to a better way of life Recovering Caribbean Nature James A. Kushlan, Kirsten Hines, 2024-10-29 The Caribbean is a global biodiversity hotspot half its resident bird species are found nowhere else yet a quarter are threatened with extinction Nearly all its native amphibians and reptiles and thousands of plants also are endemic Yet less than 1% of the landscape can be considered natural and apart from reserves most land is privately owned Despite the challenges of such habitat fragmentation the Caribbean's distinctive fauna and flora can be preserved through planning and managing a connected network of sustainable naturalistic landscapes reserves parks and private gardens This book uniquely provides both a theoretical background and practical applications to restoring nature within the tropical Caribbean Packed with beautiful color photographs it offers unifying principles that can be applied across the tropics and synthesizes information on the Caribbean's environmental uniqueness and globally significant biodiversity It also provides explicit guidance on establishing sustainable and more naturalistic landscapes from large public lands to private yards and gardens

The book is essential reading for academics and researchers studying the Caribbean environment resource management professionals and scientists and educators from nongovernmental organizations who provide programs and advocacy for conservation and regional sustainability Moreover it highlights the importance of private lands and gardens where the greatest gains can be made and so offers a handbook for knowledgeable private landowners and their professional advisors

Teaching All Nations Mitzi Jane Smith, Jayachitra Lalitha, 2014 That Christian missionary efforts have long gone hand in hand with European colonization and American imperialist expansion The role played in those efforts by the Great Commission the risen Christ's command to teach all nations has more often been observed than analyzed With the rise of European colonialism the Great Commission was suddenly taken up with an eschatological urgency often explicit in the founding statements of missionary societies the differentiation of teachers and nations waiting to be taught proved a ready made sacred sanction for the racialized and androcentric logics of conquest and civilization
