## **Red Ape Orang Utans And Human Origins:**

*The Red Ape* Jeffrey H. Schwartz, 1987 A fascinating tour of evolutionary biology that calls into question our implicit social and political commitment to the current theories offering persuasive evidence that our closest relative is not the gorilla but the orangutan 16 page black and white photo insert Illustrations **The Red Ape** Jeffrey H. Orang-utan Biology Jeffrey H. Schwartz, 1988 Orang utans are a particularly important and interesting primate group because of their close evolutionary proximity to humans Yet there is no comprehensive single reference source covering the anatomy and morphology of these animals their biology or their evolution In this unique volume a group of internationally recognized experts and researchers review the literature and present new data on the skeletal anatomy reproductive physiology and anatomy neuroanatomy behavior evolutionary genetics and paleontology of orangutans It is the most thorough and comprehensive reference available on the biology and evolution of this fascinating primate group **The Neglected Ape** Biruté M.F. Galdikas, R.D. Nadler, N. Rosen, Lori K. Sheeran, 2013-11-11 The orangutan is the most highly endangered species of great ape Orangutans are threatened by deforestation poaching the illegal pet trade and the isolation and fragmentation of dwindling wild populations Their conservation is impeded by certain aspects of their ecology e.g. a rain forest habitat and certain features of their life history e.g. an eight to twelve year interbirth interval Added to the U.S. Endangered Species List in 1970 the orangutan is now clearly on the road to extinction The number of wild orangutans in Borneo and Sumatra is currently estimated to have decreased to between 12 300 and 20 571 individuals Only 2% of original orangutan habitat is protected and some of these areas are now being destroyed Clearly attention to ecology demography censusing rehabilitation and conservation is essential if the orangutan is to survive in the wild beyond the next century The protection of orangutans is a complex multifaceted problem involving such pressing issues as human poverty overpopulation and the economic development of Southeast Asia Although the orangutan has been placed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES more orangutans were sold illegally in Taiwan between 1990 and 1993 than are housed in all the world's zoos In the past scientific and public attention has centered on the African apes For this reason the sole Asian great ape the orangutan has been called the neglected ape *Apes and Human Evolution* Russell H. Tuttle, 2014-02-17 Russell Tuttle synthesizes a vast literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids He refutes the theory that we are sophisticated instinctively aggressive and destructive killer apes **Encyclopedia of Anthropology** H. James Birx, 2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories Human origin sites and the World Heritage Convention in Africa - N° 33 Nuria Sanz, 2012 Uses examples of artistic work in all media in order to show how contemporary

artists have adapted their vision in a manipulation of modern materials to satisfy mankind's needs for spiritual satisfaction through art

*Understanding Human Evolution* Jeffrey K. McKee, Frank E. Poirier, W Scott McGraw, 2015-10-16 For the one term course in human evolution paleoanthropology or fossil hominins taught at the junior senior level in departments of anthropology or biology This new edition provides a comprehensive overview to the field of paleoanthropology the study of human evolution by analyzing fossil remains It includes the latest fossil finds attempts to place humans into the context of geological and biological change on the planet and presents current controversies in an even handed manner

**Natural Selection** Richard G. Delisle, 2021-02-27 This book contests the general view that natural selection constitutes the explanatory core of evolutionary biology It invites the reader to consider an alternative view which favors a more complete and multidimensional interpretation It is common to present the 1930-1960 period as characterized by the rise of the Modern Synthesis an event structured around two main explanatory commitments 1 Gradual evolution is explained by small genetic changes variations oriented by natural selection a process leading to adaptation 2 Evolutionary trends and speciation events are macroevolutionary phenomena that can be accounted for solely in terms of the extension of processes and mechanisms occurring at the previous microevolutionary level On this view natural selection holds a central explanatory role in evolutionary theory one that presumably reaches back to Charles Darwin's *Origin of Species* a view also accompanied by the belief that the field of evolutionary biology is organized around a profound divide theories relying on strong selective factors and those appealing only to weak ones If one reads the new analyses presented in this volume by biologists historians and philosophers this divide seems to be collapsing at a rapid pace opening an era dedicated to the search for a new paradigm for the development of evolutionary biology Contrary to popular belief scholars position on natural selection is not in itself a significant discriminatory factor between most evolutionists In fact the intellectual space is quite limited if not non-existent between on the one hand Darwinists who play down the central role of natural selection in evolutionary explanations and on the other hand non-Darwinists who use it in a list of other evolutionary mechanisms The mechanism centered approach to evolutionary biology is too incomplete to fully make sense of its development In this book the labels created under the traditional historiography Darwinian Revolution Eclipse of Darwinism Modern Synthesis Post Synthetic Developments are thus re-evaluated This book will not only appeal to researchers working in evolutionary biology but also to historians and philosophers

Modern Morphometrics in Physical Anthropology Dennis E. Slice, 2006-06-01 Morphometrics has undergone a revolutionary transformation in the past two decades as new methods have been developed to address shortcomings in the traditional multivariate analysis of linear distances angles and indices While there is much active research in the field the new approaches to shape analysis are already making significant and ever increasing contributions to

biological research including physical anthropology Modern Morphometrics in Physical Anthropology highlights the basic machinery of the most important methods while introducing novel extensions to these methods and illustrating how they provide enhanced results compared to more traditional approaches Modern Morphometrics in Physical Anthropology provides a comprehensive sampling of the applications of modern sophisticated methods of shape analysis in anthropology and serves as a starting point for the exploration of these practices by students and researchers who might otherwise lack the local expertise or training to get started This text is an important resource for the general morphometric community that includes ecologists evolutionary biologists systematists and medical researchers Genomes and What to Make of Them Barry Barnes, John Dupre, 2011-02 The announcement in 2003 that the Human Genome Project had completed its map of the entire human genome was heralded as a stunning scientific breakthrough our first full picture of the basic building blocks of human life Since then boasts about the benefits and warnings of the dangers of genomics have remained front page news with everyo Discovery of Bharat Through Hindustan and British India TRIBHUWAN NATH SINGH, 2021-10-25 The book is a synthesis of the ancient Bharatiya texts with the latest scientific findings for their authenticity historicity and relevance to the modern perspective The ancient Bharatiya texts were burnt by external invaders and the retrieved texts were misinterpreted as mythological gossips in the English versions Bharat was said to be in the Dark Age before the entry of the Britishers The book in 14 chapters clarifies the misgivings and proves the Bharatiya civilization over 20 000 years old on the basis of modern research references and latest archaeological findings Computer simulation of celestial configuration proves Ramayan 7000years old historical account of Ram and Mahabharat over 5000 years old historical event In the background of largescale bloodshed and global warming despite all efforts of the UNO a need of Spiritual Weapon Truth and Nonviolence promoted by Mahatma Gandhi as Satyagrah has been projected to save the humanity from the zooming Dooms Day in Discovery of Bharat through Hindustan and British India **Animal Homosexuality** Aldo Poiani, 2010-08-19 Homosexuality is an evolutionary paradox in search for a resolution not a medical condition in search for a cure Homosexual behavior is common among social animals and mainly expressed within the context of a bisexual sexual orientation Exclusive homosexuality is less common but not unique to humans Poiani and Dixson invite the reader to embark on a journey through the evolutionary biological psychological and sociological aspects of homosexuality seeking an understanding of both the proximate and evolutionary causes of homosexual behavior and orientation in humans other mammals and birds The authors also provide a synthesis of what we know about homosexuality into a biosocial model that links recent advances in reproductive skew theory and various selection mechanisms to produce a comprehensive framework that will be useful for anyone teaching or planning future research in this field **.NET 2.0 for Delphi Programmers** Jon Shemitz, 2006-11-22 NET 2 0 for Delphi Programmers explores NET from a Delphi programmers viewpoint and it is ideal for Delphi programmers moving to NET It presents the core concepts of the NET world in terms you are familiar with This book will help you with

**Human Prehistory in Fiction** Charles De Paolo,2002-12-16 What was the world like for people thousands of years ago How can we know Through fiction This is a work of literary criticism and more It begins with a discussion of the problem of authenticity and then considers twelve pieces of fiction that depict human prehistory H G Wells The Island of Doctor Moreau Pierre Boulle s The Planet of the Apes Jules Verne s The Village in the Treetops Edgar Rice Burroughs The Land That Time Forgot the struggle for legitimacy in Wells The Grisly Folk the Tasmanian analogue in Lester Del Rey s The Day Is Done William Golding s The Inheritors the promise of humanity in Arthur C Clarke s 2001 A Space Odyssey the theme of a god among the heathen in Wells The Lord of the Dynamos and other works Jean Auel s The Clan of the Cave Bear J H Rosny Aine s Quest for Fire and Wells The Time Machine An Invention A final chapter considers the paleoanthropologist as literary critic

**Being a Christian in Sri Lanka** Leonard Pinto,2015-07-14 Most people know something about their own religions That knowledge is usually restricted to what is going on at the present time When it comes to how their religions developed in their countries their knowledge is on shakier grounds As for religion in foreign lands well for many that information is nonexistent Author Leonard Pintos Being a Christian in Sri Lanka Historical Political Social and Religious Considerations is a critique based on the observations and experience of a Sri Lankan Christian Pinto shares the history and importance of religion in his native land Youll learn about Portuguese Dutch and British rule in the country formerly known as Ceylon and how each affected religion there Pinto dispels popular views about how ruling countries dealt with Christianity and other religions and with those who practiced them Youll learn how religion is practiced today from someone who lives it firsthand Pintos book goes beyond the boundaries of Sri Lanka in assessing the problems faced by Christianity from the corrosive effects of the Age of Enlightenment In Being a Christian in Sri Lanka Historical Political Social and Religious Considerations Pinto comes to the conclusion Sri Lanka would benefit from a Sri Lankan national identity for all its citizens Hegemony based on ethnicity and religion is dissuaded Youll also find Pintos conclusions relevant to other countries

**What the Bones Tell Us** Jeffrey H. Schwartz,1993 Schwartz s explorations into anthropology offer surprising up to the minute and accessible science The author exposes the inner workings of physical anthropology and makes a careful examination of the conflicting ideas about human origins and evolution and the rigors of scientific research Photographs and line drawings

**Biocultural Evolution** Clare L. Boulanger,2012-04-23 In a writing style that will captivate those new to the subject Boulanger presents an understanding of human biological and cultural evolution that is both scientific and humanistic in keeping with classic anthropological ideals The aim of this reasonably priced text is to help students think critically about what being human has been what it is at present and what it may be in the future While the book focuses on the anthropological subfields of biological anthropology and archaeology information and insights are also drawn from

cultural anthropology and anthropological linguistics Boulangers absorbing treatment in contrast to other texts on human evolution features an opening chapter that seeks to negotiate fairly without defensiveness or condescension a pathway for creationists to follow into the topic The next three chapters provide background on the history of evolutionary science the biology of inheritance and population change and primatology Chapters 5 through 9 focus on human biocultural evolution from the time of the ancestor we share with chimpanzees through the development of agriculture and the founding of states The last chapter deals with the issue of racehow it has affected our interpretation of the past and how it continues to influence the present In addition to an extensive glossary the fully illustrated textbook features numerous topic enhancing sidebars questions for discussion and review and student exercises      **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70
