The Columbia Guide to American Indian Literatures of the United States Since 1945 Eric Cheyfitz, 2006. The Columbia Guide to American Indian Literatures of the United States Since 1945 is the first major volume of its kind to focus on Native literatures in a postcolonial context. Written by a team of noted Native and non-Native scholars, these essays consider the complex social and political influences that have shaped American Indian literatures in the second half of the twentieth century, with particular emphasis on core themes of identity, sovereignty, and land. In his essay comprising part I of the volume, Eric Cheyfitz argues persuasively for the necessary conjunction of Indian literatures and federal Indian law, from Apsákwika to Alexie. Part II is a comprehensive survey of five genres of literature: fiction, Arnold Krupat and Michael Elliott poetry, Kimberly Blaeser drama, Shari Huhndorf nonfiction, David Murray and autobiography. Kendall Johnson and discusses the work of Vine Deloria Jr., N. Scott Momaday, Joy Harjo, Simon Ortiz, Louise Erdrich, Leslie Marmon Silko, Gerald Vizenor, Jimmy Santiago Baca, and Sherman Alexie among many others. Drawing on historical and theoretical frameworks, the contributors examine how American Indian writers and critics have responded to major developments in American Indian life and how recent trends in Native writing build upon and integrate traditional modes of storytelling. Sure to be considered a groundbreaking contribution to the field, *The Columbia Guide to American Indian Literatures of the United States Since 1945* offers both a rich critique of history and a wealth of new information and insight.

Critical Animal Studies Atsuko Matsuoka, John Sorenson, 2018-02-05. This important book charts new territory by showcasing some of the newest developments in the rapidly growing field of Critical Animal Studies. *Critical Animal Studies* presents a radical ethical and normative challenge to existing systems of power in the context of neoliberal capitalism and to the existential structure of speciesism. The essays in this book link activist and academic approaches to dismantle the exploitation and oppression of nonhuman animals. Featuring an international team of contributors, the book reflects the transdisciplinary character of Critical Animal Studies with chapters by activists and academics from disciplines across the social sciences, including historical archaeology, political science, psychology, geography, law, social work, and philosophy. The book provides advanced-level students with an ideal introduction to a wide range of perspectives on Critical Animal Studies, amongst other things, proposing new ways of considering animal advocacy, decolonization, and liberation.
