Bridging the European Divide explores how key regional middle powers perceived and advocated their political power options in the aftermath of September 11 2001 *Historical Dictionary of Poland 1945-1996* Piotr Wróbel, 2014-01-27

Located between the former Soviet Union and eastern Germany Poland has the potential to become a political and economic bridge between the East and West It is crucial to European security and stabilization yet the list of reference books on recent Polish history is very short This book fills that gap providing information on Polish political economic and cultural history since 1945 *The American Bibliography of Slavic and East European Studies* Patt Leonard, Rebecca Routh, 2020-02-27 This

bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology *A Military History of the Cold War, 1944-1962* Jonathan M. House, 2014-04-28 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The invasion of South Korea convinced European policy makers that effective deterrence and containment required building up and maintaining credible forces Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty In addition to examining the major confrontations nuclear and conventional between Washington Moscow and Beijing including the crises over Berlin and Formosa House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya Kenya Cyprus and Aden Now more than fifty years after the events House describes understanding the origins and trajectory of the Cold War is as important as ever By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions House s account of the complex relationship between diplomacy and military action directly relates to the insurgencies counterinsurgencies and confrontations that now occupy our attention across the globe **The Polish Economy** Ben Slay, 2014-07-14 In 1989 Poland became the first Eastern Bloc country to shake off the dominance of its ruling Communist party Although other post Communist countries have since followed suit Poland s experience has been unique in its move to Westernize In this timely and insightful account Ben Slay provides the first integrated comprehensive assessment of Poland s economic transformation from central planning

to a market system and the political and sociological factors that have contributed to it Drawing on the work of Western and Polish scholars as well as his own research Slay traces the evolution of the Polish transformation from its historical roots in People s Poland and predicts potential problems and successes facing the Polish economy A ground breaking addition to the emerging study of post Communist political economies The Polish Economy demonstrates that other countries now struggling to join the West have much to learn from Poland s example Of interest to scholars across the social sciences this work provides general as well as professional readers with a compelling account of the realities behind one of the most important events of our time the collapse of the Eastern Bloc Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The State against Society Grzegorz Ekiert, 1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse

Problems of Democratic Transition and Consolidation Juan J. Linz, Alfred Stepan, 1996-08-22 Since their classic volume *The Breakdown of Democratic Regimes* was published in 1978 Juan J Linz and Alfred Stepan have increasingly focused on the questions of how in the modern world nondemocratic regimes can be eroded and democratic regimes crafted In *Problems of Democratic Transition and Consolidation* they break new ground in numerous areas They reconceptualize the major types of modern nondemocratic regimes and point out for each type the available paths to democratic transition and

the tasks of democratic consolidation They argue that although nation state and democracy often have conflicting logics multiple and complementary political identities are feasible under a common roof of state guaranteed rights They also illustrate how without an effective state there can be neither effective citizenship nor successful privatization Further they provide criteria and evidence for politicians and scholars alike to distinguish between democratic consolidation and pseudo democratization and they present conceptually driven survey data for the fourteen countries studied Problems of Democratic Transition and Consolidation contains the first systematic comparative analysis of the process of democratic consolidation in southern Europe and the southern cone of South America and it is the first book to ground post Communist Europe within the literature of comparative politics and democratic theory This is an important volume by two major scholars on a central topic one of broad interest to people in comparative politics to those interested in democracy and to regional specialists on Southern Latin America and on Central and Eastern Europe The book will unquestionably be a major contribution to the literature on constructing democratic governance Abraham F Lowenthal University of Southern California

**Bagration**  
**1944** Prit Buttar,2025-03-13 A fascinating history of the great summer offensive launched by the Red Army in 1944 which turned the tide of the war Throughout the war on the Eastern Front there were two consistent trends The Red Army battled to learn how to fight and win while involved in a struggle for its very survival But by 1944 it had a leadership that was able to wield it with lethal effect and with far more effective equipment than before By contrast the Wehrmacht had commenced a slow process of decline after the invasion of the Soviet Union Hitler became increasingly unwilling to delegate decision making to commanders in the field which had been crucial to earlier success The long years of fighting had also taken a heavy toll Thousands of irreplaceable junior officers and NCOs were dead wounded or prisoners Renowned Eastern Front expert Prit Buttar expertly brings these contrasting fortunes to life trends which culminated in the huge battles of Bagration As this masterful study conclusively shows in 1944 the Red Army finally put together a campaign that utterly destroyed the German Army Group Centre The Wehrmacht suffered the loss of over 300 000 men killed wounded or taken prisoner and the Red Army rolled forward across Belarus to the outskirts of Warsaw The end of the war was still many months away and the Germans managed to reconstruct their line on the Eastern Front but final victory for the Soviet Union was now only a matter of time as a direct consequence of Bagration
