Red Fascism Andrew Targowski, Andrzej Targowski, 1982 The Alternative Media in Poland 1976-1989 Tomasz Piotr Przytula, 1995 **The Polish Crisis-- Solidarity and Martial Law** Amos Lakos, 1987 **The History, Present State, and Future of Information Technology** Andrew Targowski, 2016

In Part I Prof Targowski takes us through the evolution of modern computing and information systems While much of this material is familiar to those of us who have lived through these developments it would definitely not be familiar to our children or our students He also introduces a perspective that I found both refreshing and useful looking at the evolution on a country by country basis For those of us who live in the U S it is all too easy to imagine that evolution to be a purely local phenomenon I found my appreciation of the truly global nature of computing expanding as he walked me through each country s contributions In Parts II and III constituting nearly half of the book Targowski provides what I would describe as an in depth case study of the challenges and successes of informatics in Poland As he tells each story many of which involved him personally the reader cannot help but better understand the close relationship between the freedoms that we in the west take for granted and the ability to produce innovations in IT Even after Poland left the orbit of the former Soviet Union the remaining vestiges of the old way of thinking remained a major impediment to progress Being right and being rigorous were far less important than being in tune with the approved ways of thinking There are important lessons to be learned here particularly as we try to project how IT will evolve in rapidly developing economies such as China But from my experience they apply equally well to western academia where moving outside of preferred values and patterns of research can lead a scholar to be ignored or even disparaged In Part IV Targowski presents a bold forward looking synthesis of informatics and informing science in the future Building upon articles recently published in *Informing Science The International Journal of an Emerging Transdiscipline* he presents a conceptual scheme of historical informing waves that builds upon historians such as Toynbee He then considers how these trends will necessarily force us to rethink how we develop and apply IT He does not steer away from the controversial But he also provides cogent arguments for all his predictions and recommendations

Between the Brown and the Red captures the multifaceted nature of church state relations in communist Poland relations that oscillated between mutual confrontation accommodation and dialogue Ironically under communism the bond between religion and nation in Poland grew stronger This happened in spite of the fact that the government deployed nationalist themes in order to portray itself as more Polish than communist *Between the Brown and the Red* also introduces one of the most fascinating figures in the history of twentieth century Poland and the communist world In this study of the complex relationships between nationalism communism authoritarianism and religion in twentieth century Poland Miko aj Kunicki shows the ways in which the country s communist rulers tried to adapt communism to local traditions particularly ethnocentric nationalism and Catholicism Focusing on the political career of Boles aw Piasecki a Polish nationalist politician who began his surprising but illuminating journey as a fascist before the Second World War and ended it as a procommunist activist Kunicki demonstrates that Polish communists reinforced an ethnocentric self definition of Polishness and as Piasecki s case demonstrates thereby prolonged the existence of Poland s nationalist Right
