Red Hawks On The Rationality Of Nuclear:

The Red "hawks" on the Rationality of Nuclear War Roman Kolkowicz, 1966 A consideration of the latest phase in the relations between the military and the Communist Party in the USSR Under Khrushchev and his successors the rejection of nuclear war as a political weapon has prevailed A military spokesman Lt Col E Rybkin however has attacked these views as defeatist and politically dangerous His opinions in turn have been indirectly countered in the Polish press by Prof J J Wiatr This Memorandum discusses the arguments for both attitudes and gives observations and conclusions based on them Both Rybkin's and Wiatr's articles are appended Author

Soviet Nuclear Weapons Policy William C. Green, 2019-07-11 This research guide is intended primarily for two groups of specialists The first consists of Sovietologists interested in acquiring a more complete knowledge of Soviet strategic and military policy The second includes strategic analysts interested in expanding their expertise to cover Soviet strategy and thinking However it was assembled so as to be useful as well for non specialists interested in investigating Soviet nuclear weapons policy

The Logic of Nuclear Terror Roman Kolkowicz, 2020-11-19 Originally published in 1987 The Logic of Nuclear Terror presented a much needed critical review of the premises concepts and policy prescriptions of deterrence theories and doctrines at the time In particular authors address the historical validity theoretical vitality and policy relevance of nuclear deterrence theories and doctrines the ways in which technological and political change have affected the original concepts of nuclear war and deterrence strategies and the ways in which such changes have affected policy and doctrine and realistic alternative ways of thinking about strategy in the changing context of new military technologies and international politics The outstanding group of international contributors to this volume include both proponents and critics of current doctrine The result is an unusually well balanced and unique contribution to our understanding of nuclear deterrence theory and practice As such it will be of interest to students policymakers and teachers of international relations defense and foreign policy US Soviet relations and arms control and disarmament

The Struggle for the Third World Jerry Hough, 2010-12-01 In the last quarter century the Soviet Union and the United States have repeatedly come into conflict in various parts of the third world During this period the most backward third world countries have sometimes proved susceptible to radical revolution but the countries well on the way to industrialization have moved away from left wing economic and political policies In the longer perspective the West has been winning the struggle for the third world The changes in those countries have been the subject of intense published debate in the Soviet Union debate on Marxist concepts of the stages of history on theories of economic development and revolutionary strategy and on foreign policy Jerry F Hough explores the breakup of the orthodox Stalinist position on these issues and the evolution of free swinging discussion about them He suggests that paradoxically many of the old Stalinist ideas retain their strongest hold in the United States which has not fully recognized its victory in the third world and the importance of the West's great

economic power The United States too often assumes that radical regimes will inevitably follow the Soviet path of development and that the nature of a regime determines the nature of its foreign policy Because of these misperceptions Hough argues the United States misses many opportunities in the third world It emphasizes military power even to the extent of undermining its crucial economic power and it fails to offer the face saving gestures that would permit Soviet retreats Hough presents a prescription for an American policy better suited to the new realities in the third world and to the changing Soviet attitude toward them **The Soviet View of U.S. Strategic Doctrine** Jonathan Samuel Lockwood,1983-01-01

Soviet perceptions of American strategic doctrine have influenced then use of military power in foreign policy An understanding of how those perceptions are being derived at and of their specific contents is therefore essential to any reflection on direction that American defense policy should take Particularly in the field of arms control and disarmament Soviet perceptions carry severe implications for U S proposals as well as general behavior Lockwood bases his examination on Soviet sources such as newspapers periodicals radio broadcasts and books He establishes that Soviet analysts tend to project their own notions of clear strategy onto U S doctrine and intentions Starting from the premise that the Soviets mean what they say Lockwood is able to give a historical account of Soviet perceptions starting from massive retaliation up to and including Presidential Directive 59 In his final chapter the author gives possible policy strategies to successfully counteract the Soviet military policy Future Soviet Interests in Arms Control Institute for Defense Analyses. International and Social Studies Division,1970 **Government-wide Index to Federal Research & Development Reports** ,1966-10-10 *The*

Russian View of U.S. Strategy Jonathan Samuel Lockwood,2017-09-04 Soviet perceptions of U S strategy remained remarkably consistent from the post Stalin period through the collapse of communism in Eastern Europe and the Soviet Union itself The consistency of the Soviet tendency to engage in the mirror image fallacy in their analyses of U S doctrine and strategic intentions has profound implications for the future relationship of the U S and the now independent republics This authoritative volume analyzes the Soviet Russian perspectives of U S strategic evolution from the declaration of the massive retaliation doctrine of 1954 through the Soviet collapse of 1991 The Soviets considered the growth of their strategic nuclear arsenal as the main factor giving them political leverage over U S foreign policy and predicted that a defense policy based on strategic defense would be the most effective deterrent from a Soviet perspective Now the Russian military and political leadership places a high value on strategic nuclear forces in terms of political leverage and prestige Building upon a wide variety of international sources the Lockwoods offer a penetrating assessment of how the present Russian perspective will affect political relationships not only with the U S and the West but also among the independent republics This factor will become ever more critical as they vie for decentralized versus unified control of what was the Soviet nuclear arsenal under the shadow of the collapsing economies The authors also introduce a new theory concerning the future impact of ballistic missile defense on operational warfare in light of the U S experience in Operation Desert Storm *The Russian View of U S*

Strategy provides a comprehensive historical context and an up to date appraisal of an uncertain and potentially volatile development in U S Russian relations It will be of interest to historians policymakers and military analysts The Cuban Missile Crisis, 1962 ,1990 **Technical Abstract Bulletin** , **Public Affairs Information Service Bulletin** ,1965

The Soviet Military And The Communist Party Roman Kolkowicz,2019-07-11 This book investigates the relationship between the Communist Party and the military establishment in the Soviet Union It indicates that there are several factors influencing the dynamics of that relationship and thus the respective roles of the protagonists **Soviet Perspectives on International Relations, 1956-1967** William Zimmerman,2015-03-08 Serious debates and discussions on world politics in Russian journals and books have greatly increased since 1956 resulting in a steadily changing appraisal of the world political situation by the Russians Professor Zimmerman studies that changing appraisal He describes Soviet international relations perspectives during Khrushchev s years in power and the three years following He uncovers the answers Soviet commentators implicitly or explicitly give to such questions as Who in the Soviet view are the main actors in international politics and what does identifying them suggest about the Soviet perspective In the Soviet analysis what is the global distribution of power How do Soviet analysts characterize the capabilities motives and decision making process of the United States Contents I Introduction II The Emergence of International Relations as a Discipline III The Actors IV The Hierarchy V The Distribution of Power VI United States Foreign Policy from the Soviet Perspective VII The Balance of Power as System and Policy VIII Post Imperialism and the Transformation of Soviet Foreign Policy Originally published in 1969 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 World Communism, 1964-1969, a Selected Bibliography United States. Congress. Senate. Committee on the Judiciary,1971 Bulletin of the Public Affairs Information Service Public Affairs Information Service,1965 **Red Sunset** Philip G. Roeder,2021-05-11 Why did the Soviet system fail How is it that a political order born of revolution perished from stagnation What caused a seemingly stable polity to collapse Philip Roeder finds the answer to these questions in the Bolshevik constitution the fundamental rules of the Soviet system that evolved from revolutionary times into the post Stalin era These rules increasingly prevented the Communist party from responding to the immense social changes that it had itself set in motion although the Soviet political system initially had vast resources for transforming society its ability to transform itself became severely limited In Roeder s view the problem was not that Soviet leaders did not attempt to change but that their attempts were so often defeated by institutional resistance to reform The leaders successful efforts to stabilize the political system reduced its adaptability and as the need for reform continued to mount stability became a fatal flaw Roeder s

analysis of institutional constraints on political behavior represents a striking departure from the biographical approach common to other analyses of Soviet leadership and provides a strong basis for comparison of the Soviet experience with constitutional transformation in other authoritarian polities Area Handbook for the Soviet Union Eugene K. Keefe, 1971 One of a series of handbooks prepared by Foreign Area Studies FAS of the American University Interest Groups in Soviet Politics Harold Gordon Skilling, Franklyn Griffiths, 2019-03-12 It is now generally agreed that since Stalin's death there has been a definite broadening of group participation in policy formation and implementation The contributors to this volume analyze seven elite political interest groups at the upper and middle levels of the Soviet social structure Originally published in 1971 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Has Soviet Nuclear Strategy Changed?** Benjamin S. Lambeth, Rand Corporation, 1985 This paper was presented at a conference on The Calculus of Terror Nuclear Strategy and Its Discontents sponsored by the UCLA Project on Politics and War and held at the Villa Serbelloni Bellagio Italy December 9-13 1985 By comparing the new tone of recent statements by Soviet leaders on nuclear issues with ongoing trends in Soviet force modernization it attempts to explain inconsistencies between Soviet rhetoric and behavior and to determine whether Soviet nuclear planning has changed in accord with the leadership statements or whether Soviet leaders have been manipulating foreign audiences with a propaganda campaign The author examines recent Soviet statements on nuclear deterrence and the Strategic Defense Initiative and concludes that in the future Soviet doctrine is likely to continue to stress the importance of assuring Soviet security through the pursuit of plausible war options Rand abstracts
