Egypt and the Contradictions of Liberalism Dalia F. Fahmy, Daanish Faruqi, 2017-01-05 The liberatory sentiment that stoked the Arab Spring and saw the ousting of long time Egyptian dictator Hosni Mubarak seems a distant memory Democratically elected president Mohammad Morsi lasted only a year before he was forced from power to be replaced by precisely the kind of authoritarianism protestors had been railing against in January 2011 Paradoxically this turn of events was encouraged by the same liberal activists and intelligentsia who'd pushed for progressive reform under Mubarak This volume analyses how such a key contingent of Egyptian liberals came to develop outright illiberal tendencies Interdisciplinary in scope it brings together experts in Middle East studies political science philosophy Islamic studies and law to address the failure of Egyptian liberalism in a holistic manner from liberalism's relationship with the state to its role in cultivating civil society to the role of Islam and secularism in the cultivation of liberalism A work of impeccable scholarly rigour Egypt and the Contradictions of Liberalism reveals the contemporary ramifications of the state of liberalism in Egypt

Democracy and Elections in Africa Staffan I. Lindberg, 2006-09-11 Outstanding Academic Title for 2007 Choice Magazine This volume studies elections as a core institution of liberal democracy in the context of newly democratizing countries Political scientist Staffan I Lindberg gathers data from every nationally contested election in Africa from 1989 to 2003 covering 232 elections in 44 countries He argues that democratizing nations learn to become democratic through repeated democratic behavior even if their elections are often flawed Refuting a number of established hypotheses Lindberg finds no general negative trend in either the frequency or the quality of African elections Rather elections in Africa based on his findings are more than just the goal of a transition toward democracy or merely a formal procedure The inception of multiparty elections usually initiates liberalization and repeated electoral activities create incentives for political actors fostering the expansion and deepening of democratic values In addition to improving the democratic qualities of political regimes a sequence of elections tends to expand and solidify de facto civil liberties in society Drawing on a wealth of data Lindberg makes the case that repetitive elections are an important causal factor in the development of democracy He thus extends Rustow's 1970 theory that democratic behavior produces democratic values

The African State in Transition Zaki Ergas, 1987-10-20 In the first twenty five years of African independence the behaviour of the African state elites has not been with a few notable exceptions conducive to self sustained development What are the reasons for this sorry state of affairs What can be done to reverse that unfortunate trend These are the two overarching questions with which this book attempts to grapple

Safety Nets, Politics, and the Poor Carol L. Graham, 2010-12-01 Countries worldwide are attempting difficult transitions from state planned to market economies Most of

these countries have fragile democratic regimes that are threatened by the high social and political costs of reform. Governments and ultimately societies have to make hard choices about allocating scarce public resources as they undergo these transitions. A central often controversial and most poignant question is how to protect vulnerable groups and the poor. What compensation what safety net will be provided for them? Carol Graham argues that safety nets can provide an environment in which economic reform is more politically sustainable and poverty can be permanently reduced. However, these two objectives frequently involve trade offs as vocal and organized opponents of reform for obvious political reasons often concern governments far more than the poor. These organized and less vulnerable groups tend to place heavy demands on the scarce resources available to governments at times of economic crisis. Governments that fail to address the social costs of reform meanwhile often face popular opposition that jeopardizes or even derails the entire market transition. The results of the September 1993 elections in Poland are a case in point. The author examines these trade offs in detail with a particular focus on how political and institutional contexts affect the kinds of safety nets that are implemented. For example, reaching the poor and vulnerable with safety nets tends to be more difficult in closed party systems such as in Senegal where entrenched interest groups have a monopoly on state benefits. In contrast, dramatic political change or rapid implementation of economic reform undermines the influence of such groups and therefore can provide unique political opportunities to redirect resources to the poor as in the case of Bolivia and Zambia. Rather than focus their efforts on organized interest groups such as the public sector.

Political Domination in Africa Patrick Chabal, 1986-10-09. This collection of essays brings together historians and political scientists from Britain, France, and the United States who from widely differing perspectives and traditions have been involved in the process of rethinking African politics. They present here the outline of a new approach grounded in universal political theory rather than on theories of Third World political development. This seeks to integrate the history of Africa from pre to post colonial with concepts of political theory as they have been applied historically to the analysis of Europe and America. The book addresses a wide audience: students of African history and politics of Third World development and of political theory.
