great interest to think tanks and government agencies especially those dealing with foreign relations *South Asian Economic Development* Moazzem Hossain, Rajat Kathuria, Iyanatul Islam, 2010 South Asia's developing nations have been enjoying moderate to high growth over the past decade before the global recession began. This new edition provides an up to date guide to the growing markets in South Asia. It offers an analysis of the changes and consequences of high sustainable growth investigating what has been achieved in the region during the last ten years from a macroeconomic viewpoint identifying new challenges and clearly defining what has driven the boom. The first part of the textbook presents an analysis of how South Asia is rated against Southeast and East Asia in recent decades in economic and social terms. The second part of the text focuses on South Asia's economic development over 1990s and mid 2000s and the third and final part identifies those major governance issues which were responsible for South Asia's underperformance both socially and economically. It is widely recognised that globalisation enhanced global trade and that trade further increased the region's prosperity. Embracing the view that economists can no longer regard themselves as technocratic guardians of neutral policy advice the book advocates for a shift in focus from policy reform per se to the more challenging task of implementing institutional reform that will invigorate the capability of the political leadership to bring about rapid sustained and poverty reducing growth in South Asia. The central task would be to re-direct the focus of governments in South Asia in order to ensure that the core functions of the state stable non distortionary policy climate a secure foundation of law investment in basic education health and infrastructure protection of the vulnerable and adapting with the climate change are efficiently provided. At the same time the reform agenda must be sensitive to the goal of ensuring that durable democratic institutions traditions and values are preserved. This is a fundamental challenge but one that must be met in order to secure the emergence of a prosperous South Asia in the early part of the twenty first century. This textbook will be useful for students and researchers in Development Economics Business Economics Development Studies and Asian Studies **Energy Security Cooperation in Northeast Asia** Bo Kong, Jae H. Ku, 2015-04-24 Drawing on cutting edge research from leading scholars this book investigates state preferences for regime creation and assesses state capacity for executing these preferences in Northeast Asia's energy domain defined as the geographical area comprising the following countries Russia Mongolia China Japan South Korea and North Korea. It examines questions pertaining to how states perceive the need and necessity for establishing a regime when it comes to the issue of energy and how much commitment they make to the effort in Northeast Asia. The book analyses the factors that shape each country's fundamental energy interests in the region how these interests impact their attitudes toward engaging the region on energy security and the way they carry out their regional engagement. Based on countries interests in promoting institutionalized regional energy cooperation and their capacity for forging that cooperation the collection assesses each state's role in contributing to an energy regime in Northeast Asia. It then concludes with a critique on the decade plus quest for energy security cooperation in Northeast Asia.
