Regional Politics Vol 45 America In A Post City Age:

Urban Politics Bernard H. Ross, Myron A. Levine, 2015-07-17 This popular text mixes the best classic theory and research on urban politics with the most recent developments in urban and metropolitan affairs Its very balanced and realistic approach helps students to understand the nature of urban politics and the difficulty of finding effective solutions in a suburban and global age The eighth edition provides a comprehensive review and analysis of urban policy under the Obama administration and brand new coverage of sustainable urban development A new chapter on globalization and its impact on cities brings the history of urban development up to date and a focus on the politics of local economic development underscores how questions of economic development have come to dominate the local arena The eighth edition is significantly shorter than previous editions and the entire text has been thoroughly rewritten to engage students Boxed case studies of prominent recent and current urban development efforts provide material for class discussion and concluding material demonstrates the tradeoff between more ideal and more pragmatic urban politics

Planning from the Bottom Up Anirban Pal, 2008 Highlights the gap between the official rhetoric and the political reality of democratic decentralisation and bottom up planning using an in depth study of the metropolitan planning process in Kolkata India This book focuses on the dynamic interactions between planners and the operation of the political process that shapes this reality

Comparative Civic Culture Laura A. Reese, Raymond A. Rosenfeld, 2016-05-23 The quest for a theoretical framework for understanding urban policy making has been a recurring focus of research into local governments Civic culture is a means for understanding how municipal policy makers weigh the interests of different groups govern the local community frame local goals engage in decision making and ultimately select and implement public policies While it seems that culture matters in local policy making how to measure culture in a valid and replicable fashion presents a significant challenge which the authors address in this book They present their findings of a large multi city research project to explore the nature of civic culture in cities in the US and Canada The focus of their analysis is on three overarching systems of community power system the community value system and the community decision making system The authors address a number of questions around the nature of civic culture and the relationships between the three systemic elements of civic culture to refine and apply a more sophisticated theory of urban policy making

Political Change in the Metropolis John J. Harrigan, Ronald K. Vogel, 2000 Political Change in the Metropolis Sixth Edition focuses on the political changes that have taken place in American cities and the reactions of urban scholars to them In addition to offering scholarly perspectives the text offers students a theoretical framework for interpreting these changing events for themselves This framework analyzes the patterns of bias inherent in the organization and operation of urban politics giving students an in depth look at the fascinating and constantly changing face of urban politics

Metropolitan Growth Planning in California, 1900-2000 Elisa Barbour, 2002

New Mexico Historical Review Lansing Bartlett Bloom, Paul A. F. Walter, 2007 Merger Mania Andrew

Sancton, Westmount (Québec), 2000 The idea that merging municipalities will improve local services and economic competitiveness has its roots deep in the nineteenth century Municipalities in the US were first merged as early as 1848 However despite being merged at the turn of the twentieth the city of New York was effectively bankrupt by 1975 In contrast metropolitan Boston often seen as a recent success story in global competition comprises 282 distinct municipalities Outside the United States forced municipal mergers were a popular policy in many European countries and Canadian provinces during the 1960s and 1970s The city of Laval just north of Montreal and the unicity of Winnipeg owe their origins to this period both amalgamations failed to meet their original objectives Despite the emergence of public choice theory which justifies municipal fragmentation on market principles some politicians and public servants in the 1990s have continued to advocate municipal amalgamations as a means of reducing public expenditure particularly in Ontario In **Merger Mania** Andrew Sancton demonstrates that this approach has generally not saved money He examines the history of amalgamation as well as studying recent forced municipal mergers in Halifax Toronto Ottawa Hamilton and Sudbury In the concluding chapter he examines the case for municipal amalgamation on the Island of Montreal and argues that those who would abolish locally elected municipal councils are obligated to explain very carefully especially in light of evidence to the contrary exactly why they think such drastic measures are necessary A compelling examination of a timely issue **Merger Mania** is a must read for anyone interested in the politics of city governments Andrew Sancton is professor of political science at University of Western Ontario and the author of several books on city politics

Geopolitical Fragmentation and Patterns of Social Structure in Urbanized Areas in the United States Andrea Irmgard Frank, 2000

Transportation Issues in Large U.S. Cities National Research Council (U.S.). Transportation Research Board, 1999 In June 1998 in Detroit Michigan transportation officials from the 12 largest cities in the United States the U S Department of Transportation DOT several state departments of transportation metropolitan planning organizations transit properties and other concerned organizations came together to participate in a conference to begin to develop a better understanding of the issues and to improve transportation in large U S cities One of the most important things the conference did was establish a set of research and policy issues and needs that as they are acted on by the various stakeholders and interested parties should improve mobility in the large urban centers of America An important background theme throughout the conference was the central role large cities play in the economic and social health of the country These conference proceedings contain an introduction conference overview the presentations by seven guest speakers six resource papers a list of best practices and a list of participants
