How was poverty measured and defined and how has this influenced our judgement of the change in poverty in Britain during the first sixty years of the twentieth century During this period a large number of poverty surveys were carried out the methods of which altered after World War II Commencing with Rowntree's social survey of York in 1899 and ending with Abel Smith and Townsend's *Poor and the Poorest* in 1965 Ian Gazeley shows how the means of evaluation and the causes of poverty changed Poverty in Britain 1900 1965 Offers a comprehensive empirical assessment of all published poverty and nutritional enquiries in this era Reports the results of recent re examinations of many of the more famous social surveys that took place Considers the results of these surveys within the context of changing real incomes the occupational structure and social provision Evaluates the extent to which the reduction in poverty was due to the actions of the State or to increases in real income including more continuous income from fuller employment Detailed yet easy to follow Ian Gazeley's book is an indispensable guide to the changing face of poverty in Britain during the first six decades of the last century

The Cambridge Urban History of Britain Peter Clark, David Michael Palliser, Martin J. Daunton, 2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century

The Underdraining of Farmland in England During the Nineteenth Century A. D. M. Phillips, 1989-11-16 Underdraining has been recognized as one of the major capital intensive agricultural improvements of the nineteenth century Over half the agricultural area of England is subject to waterlogging and is in need of some form of underdraining rendering the

improvement both technically and economically basic to much of English agriculture By removing excess soil water the object of underdraining was to reproduce as far as possible the conditions of free draining land which was workable all year round and to create an optimum soil moisture content for both plant growth and cultivation Despite the necessity for the improvement a wide ranging debate exists in the literature on the extent effectiveness and agricultural importance of underdraining in the nineteenth century The present study attempts to resolve this debate By examining the evidence of draining loans under the Public Money Draining Acts and of the various land improvement companies and the accounts of estates in Devon Northamptonshire and Northumberland a precise record has been provided for the first of the spread of underdraining in England in the nineteenth century of the factors involved in its adoption and of its impact on agricultural practice in that period Education, Literacy, and Society, 1830-70 W. B. Stephens, 1987 **The Growth of Working Class Reformism in Mid-Victorian England** Neville Kirk, 2025-08-01 The post Chartist period saw an easing of class tensions and the growth of a reformist working class Using evidence based upon the cotton districts of north west England the author shows that enhanced socio political stability owed much to economic restabilisation in his book *The Growth of Working Class Reformism in Mid Victorian England* originally published in 1985 This book examines new and neglected areas of investigation including the interplay between class and ethnicity and the institutional and sociological roots of reformism and brings fresh evidence to bear upon more familiar areas of debate such as trends in living standards A materialist explanation of reformism and stability is propounded Central importance is attached to the notion of an increasingly fragmented working class operating in a secure economic system which offered enhanced scope for class manoeuvre and labour s advancement The working class did not become incorporated collaborationist or deferential The frequency of class struggle and continued working class independence could not however conceal the fact that the broad features of the system had been accepted Piecemeal advancement became the order of the day Urbanising Britain Gerard Kearns, Charles W. J. Withers, 1991-07-25 The essays in this collection reflect the increasing use of social science concepts within the field of historical geography
