Andy Pike, 2013-09-13 Regional studies are at a vibrant conjuncture Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic social political cultural and ecological change In the context of increased interest in inter and multi disciplinary approaches regions remain an arena in which synthesis across disciplines economics geography planning politics and sociology can take place Yet recent work has raised fundamental questions about how we think about and research regions and regional change development governance and regulation First emergent conceptual ideas have introduced new thinking about space place and scale that interprets regions as unbounded relational spaces This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex multi scalar approaches Second research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist often quantitative and more theoretically diverse typically qualitative approaches Last regional governance policy and politics are wrestling with the conceptual methodological and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates While we are at an early stage in beginning to think through what such conceptual theoretical methodological governance policy and political innovations and developments mean for regional studies the magnitude and resonance of such issues underpin the vitality of research on the region This book was published as a special issue of Regional Studies *Regional Economic Change in Europe* Gert-Jan Hospers, 2004 In this era of ongoing globalization a coherent vision on Europe s changing geo economy is more important than ever before Drawing on the work of Schumpeter Fourasti e and Perroux the book at hand offers a new and policy oriented perspective on regional economic change in Europe Conceptually it develops a middle range theory by extending Schumpeter s vision with a sectoral and spatial dimension This neo Schumpeterian framework is concretized by exploring fifty years of structural change in Sardinia the Ruhrgebiet and the resund *European Cities in the Modern Era, 1850-1914* Friedrich Lenger, 2012-08-17 In *European Cities in the Modern Era 1850 80 1914* Friedrich Lenger offers an account of Europe s major cities in a period crucial for the development of much of their present shape and infrastructure **Regional Development Strategies** Jeremy Alden, Philip Boland, 2013-10-18 Regional development strategies have become the focus of attention in many countries in the 1990s This textbook provides a conceptual theoretical and empirical analysis of regional development strategies within a European context It examines the various regional development strategies which are currently being

pursued within the regions of Europe defined in its loosest term to include East and West The book describes how many different European regions are attempting to reduce regional disparities by engaging themselves in coherent and focused regional development strategies and there is also private sector approach to regional economic development There are many case studies from Europe and from other parts of the world including Japan thereby providing lessons that different countries and regions can learn from each other

Integrated Spatial and Transport Infrastructure Development Hansjörg Drewello, Bernd Scholl, 2015-09-16 The challenge of growth in transport especially in freight transport and scarce resources in money landscape and local opposition against new infrastructure investment require new solutions from transport policy This book deals with these issues taking as an example the transport corridor Rotterdam Genoa one of the most heavily used in Europe In 2010 the INTERREG project Code24 with partners from five European countries started with the aim to develop a transnational strategy to strengthen and to develop the corridor The main objective was to accelerate and jointly develop the transport capacity of the entire corridor by ensuring optimal economic benefits and spatial integration while reducing negative impacts on the environment at local and regional level These issues are highlighted in the book from an interdisciplinary perspective taking into account spatial economic environmental and political aspects

The City's Hinterland Keith Hoggart, 2016-03-16 Despite the fact that the rural commuter belts of cities are major loci of population change economic growth and dynamic social change within city regions most research tends to ignore this area while focusing on the built up city core However with the current emphasis on the role of rural areas in policy debates it is vital to recognize the importance of the commuter belt By comparing four major European cities in England France Germany and Spain this book offers the first comparative investigation of the dynamism of city rural hinterlands It assesses whether rural areas will become effectively integrated into quality of life improvements as a result of their inter dependencies with cities focusing on the critical arenas of employment change housing and service provision In doing so it investigates how change in these three fields impact on the quality of life and physical environment of rural hinterlands
