Regional International Organizations:

Regional International Organizations / Structures and Functions Paul A. Tharp, 1971-06-18 **Interactions between Regional and Universal Organizations** Laurence Boisson de Chazournes, 2016-11-01 Cooperation through international organizations is fundamental to the international legal order International organizations are nowadays ubiquitous and come in many different manifestations each allowing for different levels of international cooperation The profile of regional and universal organizations may vary greatly from one organization to another At the same time they do not live apart and this has led to the creation of a complex network of relationships These relationships have seldom been the object of scholarship and this book seeks to address that gap In general the relationships between international organizations can give rise to such issues as the conditions placed upon one organization by another demarcations of competence membership of other organizations and various forms of collaboration involving the conclusion of agreements between organizations Optimal coexistence cooperation and coherence all play a role in optimizing the relations between international organizations The volume concludes by analysing current challenges including those of legal identity responsibility and accountability as well as making proposals for reform such as through the development of a common law between organizations *Regional Security* Rodrigo Tavares, 2009-12-16 Regional organizations are an inescapable feature of global politics Virtually all countries in the world are members of at least one regional or other intergovernmental organization The involvement of international organizations in the realm of regional peace and security and their cooperation in this domain with the United Nations has reached an unprecedented level Regional organizations have traditionally been formed around economic political or environmental objectives however over the last decades these organizations have gradually penetrated into the security sphere and developed their capacities in conflict prevention peacekeeping or post war reconstruction In Europe Africa Asia or the Americas regional and other intergovernmental organizations have been concurrently empowered by the UN and their own member states to maintain peace and security Despite suffering from important discrepancies in both their mandates and capacities regional organizations have become indisputable actors that play a role from the outbreak of a crisis to the reconstruction efforts in the aftermath of a conflict Presenting the most up to date critical and comparative analysis of the major regional security institutions assessing a wide range of regional organizations and providing an accessible and comprehensive guide to 11 key organizations this book is the first systematic study of the capacities of the most recognized intergovernmental organizations with a security mandate Regional Security is essential reading for all students of international organizations peace and security studies and global governance *Exit Threats in Regional International Organizations* Diana Panke, Lukas Grundseld, Pawel Tverskoi, 2025-09-30 Available open access digitally under CC BY NC ND licence This book offers a comprehensive analysis of why and when member states threaten to withdraw from regional international organizations RIOs A unique dataset covers over 120 exit threats across RIOs from all world regions The book

explains variation as a result of limited specific and diffuse support such as the inability to exert influence or prevail under majority decision making as well as a lack of democratic socialization With nationalism and populism on the rise this timely study unpacks crucial pressure points in international institutions offering invaluable insights into how they can maintain stability in the face of internal contestations **Regional International Organizations** Tharp,1971-06 **Authoritarian**

Regionalism in the World of International Organizations Anastassia V. Obydenkova, OBYDENKOVA & LIBMAN., The post Cold War world has witnessed the extensive development of regional international organizations world wide The relationship between their membership and democratization remains a topic of intense scholarly debate This book opens up a new aspect of the debate by examining regional organization as set up by autocracies e g Iran Saudi Arabia Venezuela Russia and China referring to them as non democratic regional organizations How do these newly emerged organizations counteract and confront the democratization process in their own member states and beyond their borders How and why do the political regimes the economic development and the cultures of their member states impact the foundation and development of these organizations What influence do these organizations have on migration trade conflicts and democratization The book addresses these questions by developing a new theory of authoritarian regionalism Employing quantitative analysis of authoritarian regionalism world wide and its historical development since the 1950s as well as analysing case studies of post Soviet Eurasia the book argues that authoritarian regionalism is a new phenomenon in world politics and that modern non democratic organizations differ from their historical predecessors and that their influence has radically increased in terms of geographic scope and intensity in the last few years As such authoritarian regionalism is an important addition to studies of comparative regionalism and the international dimension of authoritarianism From the policy perspective non democratic regional organizations pose a challenge for Western actors in promoting democracy around the world **The Oxford**
