Regions Around The World

Peter J. Katzenstein

Regions Around The World:

Regions Around the World Phillip Bacon, 1970 Geography of the World's Major Regions John Cole, 2003-09-02
Presents a global view of today's most pressing issues through an analysis of the twelve major regions of the world. Economic and political restructuring, agriculture, industry, catastrophe, human conflict are just some of the issues covered. The Multidimensionality of Regions in World Politics Paul J. Kohlenberg, Nadine Godehardt, 2020-09-02
This book examines what counts regarding the role and conceptualization of regions in world politics. It presents a fresh look at which narratives awake, persist, fall dormant or re-emerge amidst diverse interlocking processes of environmental, technological, and global political changes. It puts forward a thorough and multidimensional conceptualization of regions as embedded in changing, overlapping environments and requires more attention to regions shifting materiality, temporality, and technological underpinnings. Combining the approaches, questions, and analyses of Critical IR and Political Geography, it calls for a renewed emphasis on the puzzle of how the contextual environment of regions may become more or less multidimensional or how some aspects of a region's contextual environment may be mutually constitutive in non-intuitive ways. Ultimately, it sheds light on the politics of regions and the regional scale in international politics in order to overcome the often underlying territorial fixity of territory and space within IR approaches. This book will be of key interest to scholars and students of international relations, international political sociology, political geography, regionalism, geopolitics, and area studies. **A World of Regions** Peter J. Katzenstein, 2015-11-16
Observing the dramatic shift in world politics since the end of the Cold War, Peter J. Katzenstein argues that regions have become critical to contemporary world politics. This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation-state or the inevitable march of globalization. In detailed studies of technology and foreign investment, domestic and international security, and cultural diplomacy and popular culture, Katzenstein examines the changing regional dynamics of Europe and Asia, which are linked to the United States through Germany and Japan. Regions, Katzenstein contends, are interacting closely with an American imperium that combines territorial and non-territorial powers. Katzenstein argues that globalization and internationalization create open or porous regions. Regions may provide solutions to the contradictions between states and markets, security and insecurity, nationalism and cosmopolitanism. Embedded in the American imperium, regions are now central to world politics. **Regions and Nations of the World** Earl Emmet Lackey, Esther Sanfreida Anderson, 1946 *Regional Worlds: Advancing the Geography of Regions* Martin Jones, Anssi Paasi, 2017-10-02
A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region. This idea prioritises both the intellectual and the practical development of regional studies. This book drives the discussion further. It stresses the complex forms of agency and advocacy involved in the production and reproduction of regional spaces and space of regionalism, as well as the importance of geohistory and context. The book moves beyond the territorial relational divide that has characterized

debates on regions and regional borders since the 1990s The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations This book was based on a special issue of Regional Studies **China's BRI in Different Regions of the World** Sanjeev

Kumar,2023-06-02 China's Belt and Road Initiative BRI is completing a decade There have been varied responses to the Initiative from countries and regions besides the emergence of alternative initiatives and narratives This sets the stage for evaluating the robustness of the Initiative its implementation as well as its implications from the perspective of individual countries and regions across the globe This book begins by examining China's domestic economic maritime and strategic interests as drivers for the Initiative BRI has been analysed in country specific regional and continental contexts It brings out the experiences and responses from South Asia Eurasia East Asia Southeast Asia the Arab world Latin America the Caribbean as well as from Europe and Africa Further BRI has been studied in the larger context of the US China competition The final section explores BRI in the context of the twin challenges of recent times i.e the pandemic and Russia Ukraine conflict The book concludes with an epilogue which outlines the broad trends related to BRI that have emerged from this study of ICWA
