Regions Institutions And Agrarian Change In European History:

Regions, Institutions, and Agrarian Change in European History Rosemary Lynn Hopcroft, 1999 An institutional approach to agricultural development in Europe leading to the Rise of the West **The Oxford Handbook of Early Modern European History, 1350-1750** Hamish M. Scott, 2015 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam **Farming the North Sea Coast, 900-2000** Piet van Cruyningen, 2025-04 The author opens a powerful dialogue between agricultural history on the one hand and environmental history on the other a brilliant and provocative synthesis of a thousand years of coastal farming Tim Soens University of Antwerp Belgium The fascinating story of how the North Sea coast has been farmed is ever changing Long before the industrial revolution the inhospitable fens and marshes of the low lying coastal wetlands on both sides of the Sea had been transformed into one of the most productive agricultural regions in Europe Agriculture in the coastlands reached its apogee during the eighteenth and nineteenth centuries as is witnessed by the many impressive farm buildings established then However more recently it has become clear that lowland farming and even the physical existence of the lowlands are in jeopardy owing to rising sea levels and problems of drainage This book offers a history of farming and water management on the North Sea coast assessing the forces driving and inhibiting agricultural progress more broadly It examines the ways in which farmers in the past dealt with the two main constraints on their decision making the natural environment and the human environment of institutional rules and customs regulating behaviour It looks in particular at how setbacks were overcome and how farming practices were improved which then raised the money with which to finance the maintenance of dykes canals and sluices *The Oxford Encyclopedia of Economic History* Joel Mokyr, 2003 What were the economic roots of modern industrialism Were labor unions ever effective in raising workers living standards Did high levels of taxation in the past normally lead to economic decline These and similar questions profoundly inform a wide range of intertwined social issues whose complexity scope and depth become fully evident in the Encyclopedia Due to the interdisciplinary nature of the

field the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history demographic history business history and the histories of technology migration and transportation The articles all written and signed by international contributors include scholars from Europe Latin America Africa and Asia Covering economic history in all areas of the world and segments of economies from prehistoric times to the present The Oxford Encyclopedia of Economic History is the ideal resource for students economists and general readers offering a unique glimpse into this integral part of world history **Southern Italy in the Late Middle Ages** Eleni Sakellariou, 2011-12-09 This book combines economic history and theory to offer a positive reappraisal of the interaction between demographic forces urbanization commercialisation and the role of the state and their impact on the late medieval economy of the kingdom of Naples Remaking Modernity Julia Adams, Elisabeth S. Clemens, Ann Shola Orloff, 2005-02 A sociology collection reviewing the state of historical study in a wide range of areas while showcasing the use of poststructuralist approaches to studying family gender war protest revolution state making social provisions colonialism trans

were accused of obscenity sodomy and Satanism In 1307 accusations of sodomy and homosexuality were important during the Knights Templar trial **Life in the Middle Ages** Mikael Eskelner,Martin Bakers,Tobias Lanslor, In the history of Europe the Middle Ages or medieval period lasted from the 5th to the 15th century It began with the fall of the Western Roman Empire and merged into the Renaissance and the Age of Discovery The Middle Ages is the middle period of the three traditional divisions of Western history classical antiquity the medieval period and the modern period In this long period of a thousand years there were all kinds of events and processes that were very different from each other temporally and geographically differentiated responding both to mutual influences with other civilizations and spaces and to internal dynamics Many of them had a great projection towards the future among others those that laid the foundations of the development of the subsequent European expansion and the development of social agents who developed a predominantly rural based society but witnessed the birth of an incipient urban life and a bourgeoisie that will eventually develop capitalism
