Regions Nations And European Integration Remaking The Celtic Periphery:

Regions, Nations and European Integration Graham Day, 1991 **Multinationals and European Integration** Nicholas A. Phelps, 2013-10-18 This book examines the role of the multinational firms in processes of European integration. It is primarily concerned with the implications of market integration and industrial restructuring for peripheral European regions. Nicholas Phelps argues that because of the complex relationship between competition and economies of scale, the persistence of market segmentation and because of the embeddedness of multinational investment in established production locations, there is considerable inertia in the existing trade and investment patterns of multinationals in the EU. This argument is explored empirically in relation to multinationals operating in Wales. This study suggests that processes of restructuring accompanying market integration are slow to take effect and based on a diversity of motives.

Irish nationalism and European integration Katy Hayward, 2013-07-19 How has it been possible for Irish political leaders to actively promote two of the largest challenges to Irish nation statehood: the concession of sovereignty to the European Union and the retraction of the constitutional claim over Northern Ireland? The author of this book argues that such discourses are integrally connected and what is more, embody the enduring relevance of nationalism in modern Ireland. As the most comprehensive study to date of official discourse in twentieth-century Ireland, this book traces the ways in which nationalism can be simultaneously redefined and revitalised through European integration. The text begins with an overview of the origins and development of Irish official nationalism. It then analyses the redefinition of this nationalism in meeting the challenges to Irish nation statehood posed by the conflict in Northern Ireland and membership of the EU. New interpretations of the symbolic and practical importance of the island of Ireland have been central to this process. Indeed, the genius of the Irish was to employ innovative EU-inspired concepts in finding agreement with and within Northern Ireland on the one hand, whilst on the other, legitimising further European integration through the notion that it furthers traditional nationalist ideals such as Irish unity. Thus Irish political leaders were remarkably successful in not only accommodating potent nationalist and pro-European discourses but in making them appear complementary. An over-reliance on this discourse, however, plus a critical failure to adjust it to the conditions it helped to fashion, contributed to the failure of the Yes campaigns in the Irish referendums on the EU Treaties of Nice and Lisbon. The book concludes with an assessment of the reasons for these results and argues that the symbiotic relationship between Irish nationalism and European integration can be redeemed for a new era in EU member state relations. This book will appeal to any reader with an interest in the changing dynamics of Ireland's relationship with the European Union and with Northern Ireland, as well as scholars of discourses on identity, territory and governance in Europe.

Four Nations Approaches to Modern 'British' History Naomi Lloyd-Jones, Margaret Scull, 2017-10-26 This collection brings together leading and emerging scholars to evaluate the viability of four nations approaches to the history of the United Kingdom from the eighteenth to the twentieth century. It recognises the separate histories of England, Ireland,

Scotland and Wales and explores the extent to which they share a common British history. They are entwined with the points at which they interweave and detach dependent upon the nature of our inquiry where we locate our core and our periphery and the cause and effect of our subject. The collection demonstrates that four nations frameworks are relevant to a variety of topics and tests the limits of the methodology. The chapters illuminate the changing shape of modern British history writing and provide fresh perspectives on subjects ranging from state governance nationalism and Unionism economics cultural identities and social networking.

"The Concept of the 'Master' in Art Education in Britain and Ireland, 1770 to the Present" Matthew C. Potter, 2017-07-05. A novel investigation into art pedagogy and constructions of national identities in Britain and Ireland. This collection explores the student master relationship in case studies ranging chronologically from 1770 to 2013 and geographically over the national art schools of England Ireland Scotland and Wales. Essays explore the manner in which the Old Masters were deployed in education fuelled the individual creativity of art teachers and students were used as a rhetorical tool for promoting cultural projects in the core and periphery of the British Isles and united as well as divided opinions in response to changing expectations in discourse on art and education. Case studies examined in this book include the sophisticated tradition of academic inquiry of establishment figures like Joshua Reynolds and Frederic Leighton as well as examples of radical reform undertaken by key individuals in the history of art education such as Edward Poynter and William Coldstream. The role of Modern Masters like William Orpen Augustus John Gwen John and Jeff Wall is also discussed along with the need for students and teachers to master the realm of art theory in their studio based learning environments and the ultimate pedagogical repercussions of postmodern assaults on the academic bastions of the Old Masters.

The British World Carl Bridge, Kent Fedorowich, 2004-11-23. This collection of essays is based upon the assumption that the British Empire was held together not merely by ties of trade and defence but by a shared sense of British identity that linked British communities around the globe. Focusing on the themes of migration identity and the media this book is an exploration of these and other interconnected themes that help define the British World of the late 19th and 20th centuries.

Poet of the Medieval Modern Francesca Brooks, 2021. The early Middle Ages provided twentieth century poets with the material to re-imagine and rework local religious and national identities in their writing. *Poet of the Medieval Modern* focuses on a key figure within this tradition the Anglo Welsh poet and artist David Jones 1895-1974 representing the first extended study of the influence of early medieval English culture and history on Jones and his novel length late modernist poem *The Anathemata* 1952 Jones's second major poetic project after *In Parenthesis* 1937. *The Anathemata* fuses Jones's visual and verbal arts to write a Catholic history of Britain as told through the history of man as artist. Drawing on unpublished archival material including manuscripts sketches correspondence and most significantly the marginalia from David Jones's *Library* this volume reads with Jones in order to trouble the distinction between poetry and scholarship. Placing this underappreciated figure firmly at the centre of new developments in Modernist and Medieval Studies *Poet of the Medieval*

Modern brings the two fields into dialogue and argues that Jones uses the textual and material culture of the early Middle Ages including Old English prose and poetry Anglo Latin hagiography early medieval stone sculpture manuscripts and historiography to re envision British Catholic identity in the twentieth century long poem Jones returned to the English record to seek out those moments where the histories of the Welsh had been elided or erased At a time when the Middle Ages are increasingly weaponised in far right and nationalist political discourse the book offers a timely discussion of how the early medieval past has been resourced to both shore up and challenge English hegemonies across modern British culture

Poetry, Geography, Gender Alice Entwistle, 2013-09-15 Poetry Geography Gender explores literary and geographical analysis cultural criticism and gender politics in the work of such well known literary figures as Gwyneth Lewis Menna Elfyn Christine Evans and Gillian Clarke alongside newer names like Zo Skoulding and Samantha Wynne Rhydderch Drawing on her unpublished interviews with many of the featured poets Alice Entwistle examines how and why their various senses of affiliation with a shared cultural hinterland should encourage us to rethink the relationship between nation identity and literary aesthetics in post devolution Wales This series of lively and detailed close readings reveals how writers use the textual terrain of the poem both literally and metaphorically to register and script aesthetic as well as geo political and cultural historical change As an innovative critical study this volume thus takes particular interest in the ways in which author text and territory help to inform and produce each other in the culturally complex and confident small nation that is twenty first century Wales

Making Sense of Wales Graham A S Day, 2002-07-30 Making Sense of Wales gives an account of the main changes that have taken place in Welsh society over the last fifty years as well as analysing the major efforts to interpret those changes By placing work done in Wales in the context of broader developments within sociological approaches over the period Graham Day demonstrates that there is a body of work on Wales worth considering in its own right as a specific contribution to sociology He also shows the relevance of sociological accounts of Wales for understanding contemporary empirical and theoretical concerns in social analysis Beginning with post war analysis which considered Wales in terms of regional planning and policy Day shows how more theoretically informed perspectives have come to the fore in recent years He also examines more contemporary developments such as gender and class transformations the emphasis on the centrality of the Welsh language for conceptions of Wales and Welshness as well as the impact of new forms of governance and questions of social exclusion

Institutions, Discourse, and Regional Development Henrik Halkier, 2006 Why are some regional development strategies adopted and others rejected Only limited systematic attention has been paid to the politics of regional policy including the role of institutions discourse and political debate in shaping this major area of public policy The book develops an institutionalist approach to the study of regional policy capable of spanning major European development paradigms and accounting for the dynamic relationship between organisations policies and political discourse This conceptual framework is then applied to the Scottish Development Agency a development body famed across Europe for its innovative policies but surrounded by political controversy in Scotland A detailed study of corporate strategies policy implementation and the wider British environment questions existing interpretations of the organisation which tend to vilify anti interventionist Thatcherites or glorify shrewd development professionals Instead the author proposes an alternative synthesis which highlights the interplay between institutions discourse and regional development in the politics of regional policy

The Dynamics of Conflict in Northern Ireland Joseph Ruane, Jennifer Todd, 1996-11-13 This book offers a uniquely comprehensive account of the conflict in Northern Ireland providing a rigorous analysis of its dynamics and present structure and proposing a new approach to its resolution It deals with historical process communal relations ideology politics economics and culture and with the wider British Irish and

international contexts It reveals at once the enormous complexity of the conflict and shows how it is generated by a particular system of relationships which can be precisely and clearly described The book proposes an emancipatory approach to the resolution of the conflict conceived as the dismantling of this system of relationships Although radical this approach is already implicit in the converging understandings of the British and Irish governments of the causes of conflict The authors argue that only much more determined pursuit of an emancipatory approach will allow an agreed political settlement to emerge
