Code of Conduct

A set of rules that guides **employee behavior** within a business.

Code of Ethics

A set of principles that makes it possible for employees to know **right from wrong**.

Regulating International Business Through Codes Of Conduct

Sergei A. Voitovich

Regulating International Business Through Codes Of Conduct:

Regulating International Business Through Codes of Conduct Raymond J. Waldmann, 1980 Regulating International Business Through Codes of Conduct Raymond J. Waldmann, 1980-01-01 *Regulating International Business* Sol Picciotto, Ruth Mayne, 2016-07-27 This timely book points the way towards a new positive regulatory framework for international investment following the failure of the Multilateral Agreement on Investment MAI It examines the flaws in free market strategies underpinning the recent phase of globalization in particular drawing out the lessons from the MAI which was suspended in October 1998 The authors explore an alternative based on a positive regulatory framework for international business aimed at maximizing the positive contribution to development of foreign investment and minimizing its negative social and environmental impacts The contributors include academics researchers for non governmental organizations and business and trade union representatives writing from a combination of economic legal and political perspectives The book combines academic analysis with grass roots and practical experience and suggests concrete policy proposals **Regulating International Business Through Codes of Conduct** Raymond J. Waldmann, **Routledge Handbook of International Environmental Law** Shawkat Alam, 2013 This handbook is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international environmental law IEL

Regulating Transnational Corporations in Domestic and International Regimes Evaristus Oshionebo, 2009-01-01 This study explores the range of strategies for regulating the social and environmental practices of TNCs in Africa s extractive industries *International Economic Organizations in the International Legal Process* Sergei A. Voitovich, 2023-08-28 Voitovich presents a clear and lucid discussion of the manner and form in which international economic organizations IEOs participate in two main stages of the international legal process law making and law implementation The book is based on normative instruments and fragments of practice of about fifty IEOs In order to ensure a proper and timely realization of their normative acts IEOs exercise a number of law implementing functions which are subject to a thorough comparative examination The author concludes that existing IEOs not being ideal institutional models possess a sufficient arsenal of law implementing instruments to make a considerable impact on the international legal regulations in the economic field The book will be of interest to academics and economic political scientists **Corporate Environmental Accountability in International Law** Elisa Morgera, 2020 This book explores the evolving role of international law in directing and controlling the conduct of business enterprises in particular multinational corporations with respect to the protection of the environment the sustainable use of natural resources and the respect of inter related human rights It assesses the progress and continuing limitations in the identification of international standards of corporate environmental accountability and responsibility and their implementation by international organizations This assessment shows the extent to which the international community has conceptually and operationally clarified its expectations about acceptable corporate conduct This second edition of Elisa

Morgera's book reflects the intensified convergence of international standard setting efforts on corporate environmental accountability with parallel international developments on business and human rights and the environment. It also explores the recent emergence of substantive international standards of corporate environmental responsibility which have arisen from a growing number of sectoral guidelines. Equally it points to the remaining divergences in the content of international standards of corporate environmental accountability and responsibility which reflect differing views among States of their international obligations to ensure the protection of the environment and the respect of human rights. Provided by publisher

Rethinking International Organisation Barbara Emadi-Coffin, 2003-08-27 The function of the state as a symbol of identity has become increasingly important as major powers of the pre Cold War era have given way to self determination. The conventional role of the state has however simultaneously been challenged by the process of globalisation which transcends such national boundaries. Barbara Emadi Coffin seeks to explain this contradiction through a radical new theory. There are now 37 000 multinational corporations in the world many of which are increasingly seen as being among the new centres of political and economic power. Barbara Emadi Coffin analyses the increasing interaction of multinational corporations, international organizations and transnational interest groups such as Greenpeace and Amnesty International in processes of the global political economy. Using examples of the free trade zones in Korea, the UK and the People's Republic of China, the author demonstrates these interactions. In so doing she challenges prevailing notions surrounding International Organization theory.

Measures to Address the Impact of Computer Technology on Lesser Developed Countries United States. Congress. House. Committee on Science and Technology. Subcommittee on Investigations and Oversight, 1982
