Regulation Of Consumer Financial Services:

Regulation of Consumer Financial Services Arnold A. Heggestad, 1981 **Consumer Finance Law** American Bar Association, 2022-05-02 With the ever changing landscape of consumer protection laws this timely resource provides expert high level discussion of the rules governing consumer finance law and the complex federal agencies that enforce these laws Topics range from the FTC the Consumer Financial Protection Bureau to Fair Credit Reporting Act Consumer Deposit Accounts and Electronic Funds Transfer and more **Regulatory Restructuring** United States. Congress. House. Committee on Financial Services, 2009 *Consumer Financial Services Policy Session*, 1979 *An Overview of Consumer Finance and Policy Issues* Cheryl R Cooper, 2019-08-02 Consumer finance refers to the saving borrowing and investment choices that households make over time These financial decisions can be complex and can affect households financial wellbeing both now and in the future Safe and affordable financial services are an important tool for most American households to avoid financial hardship build assets and achieve financial security over the course of their lives Understanding why and how consumers make financial decisions is important when considering policy issues in consumer financial markets Households borrow money for the following common reasons investments such as a home or education to build future wealth consumption smoothing i e paying later to consume things now and emergency expenses Most households rely on credit to finance some of these expenses because they do not have enough money saved to pay for them According to the Federal Reserve Bank of New York mortgage debt is by far the largest type of debt for households accounting for approximately 67% of household debt Student debt is the second largest household debt followed by auto loans and credit cards Consumer financial markets generally share similar market dynamics In all of these markets consumers often act in similar ways when making financial decisions and firms tend to act in comparable ways to attract consumers Therefore the government tends to consider similar policy interventions when regulating in these markets Competitive free markets generally lead to efficient distributions of goods and services to maximize value for society Yet sometimes free markets are inefficient when particular issues arise Common issues in consumer financial markets include 1 information asymmetries between financial firms and consumers and 2 behavioral biases that predictably bias consumers when making financial decisions In these cases government policy can potentially correct market failures to bring the market to a more efficient outcome maximizing social welfare In consumer finance three types of policy interventions are common 1 standardized consumer disclosures 2 regulation to prevent deceptive unfair or abusive financial institution practices and 3 regulation to prevent discrimination in consumer lending markets Yet policymakers need to be aware of unintended consequences of proposed policies and often find it challenging to determine whether a policy intervention will help or harm a particular market s efficiency In response to the 2007 2009 financial crisis the 2010 Dodd Frank Wall Street Reform and Consumer Protection Act DoddFrank P L 111 203 established the Bureau of Consumer Financial Protection CFPB to implement and enforce federal consumer financial law

while ensuring consumers can access financial products and services The CFPB's authorities fall into three broad categories rulemaking writing regulations to implement laws under its jurisdiction supervision the power to examine and impose reporting requirements on financial institutions and enforcement of various consumer protection laws and regulations The CFPB generally has regulatory authority over providers of an array of consumer financial products and services The major consumer financial markets include mortgage lending student loans automobile loans credit cards and payments payday loans and other credit alternative financial products and checking accounts and substitutes In addition two important market structures allow these consumer financial products to be offered 1 the consumer credit reporting system and 2 the debt collection market These aspects of the consumer credit system facilitate the pricing of credit offers and the resolution of delinquent consumer credit products for most consumer credit markets

Regulation, 1977 *Consumer Financial Services Act of 1977 (NOW Account Legislation)* United States. Congress. House. Committee on Banking, Finance, and Urban Affairs.
