Regulation And Entry Into Telecommunications Markets:

Regulation and Entry into Telecommunications Markets Paul de Bijl, Martin Peitz, 2003-01-09 This book analyses telecommunications markets from early to mature competition filling the gap between the existing economic literature on competition and the real life application of theory to policy Paul De Bijl and Martin Peitz focus on both the transitory and the persistent asymmetries between telephone companies investigating the extent to which access price and retail price regulation stimulate both short and long term competition They explore and compare various settings such as non linear versus linear pricing facilities based versus unbundling based or carrier select based competition non segmented versus segmented markets On the basis of their analysis De Bijl and Peitz then formulate guidelines for policy This book is a valuable resource for academics regulators and telecommunications professionals It is accompanied by simulation programs devised by the authors both to establish and to illustrate their results

Telecommunication Markets Brigitte Preissl, Justus Haucap, Peter Curwen, 2009-06-12 Telecommunication markets are characterized by a dynamic development of technology and market structures The specific features of network based markets convergence of previously separate spheres and the complex task of market regulation put traditional theoretical approaches as well as current regulatory policies to the test This book sheds light on some of the challenges ahead It covers a vast range of subjects from the intricacies of market regulation to new markets for mobile and internet related services The diffusion of broadband technology and the emergence of new business strategies that respond to the technological and regulatory challenges are treated in the book's 24 chapters

Building Telecom Markets Whasun Jho, 2013-08-27 The mobile telecommunication industry has been one of the fastest growing industries in the global economy since the late 1990s As the first country to offer commercial Code Division Multiple Access CDMA cellular service in the world Korea was able to jump right into the digital mobile markets enhancing its status as a leading manufacturer of mobile equipment While the growth of the telecom industry occurred with the emergence of worldwide market oriented regulatory reform and liberalization in telecommunications the state market relationship in Korea evolved from state monopoly toward centralized governance and later toward flexible governance which is substantially different from liberal governance of the US This book examines the uniqueness of Korean regulatory reforms of the mobile telecommunication sector and argues that the market oriented regulatory reform and liberalization should be explained by focusing on the interactions among the state the private sector and international political economic environment It will appeal to scholars and policy makers alike concerned with market regulation Asian development and political economy

The Economics of Antitrust and Regulation in Telecommunications Pierre A. Buigues, Patrick Rey, 2004-01-01 Contributing to a convergence of legal and economic

approaches The Economics of Antitrust and Regulation in Telecommunications integrates economic theory into current EU antitrust policy within the sector The book addresses the role of competition and regulatory policies on a number of key issues in telecommunications such as market definition collective dominance access to networks and allocation of scarce resources *Global Markets and Government Regulation in Telecommunications* Kirsten Rodine-Hardy, 2013-03-25 This book shows the surprising ways in which globalization has led to the spread of liberal reforms in the telecommunications sector around the world This book argues that international organizations rather than just markets structure this diffusion of policy innovation by providing information sharing policy standards and developing regulatory networks The book aims to disaggregate the concept of globalization using econometric analysis and controlled case comparisons and shows how governments play a critical role in allowing the spread of exciting new technologies and access to the broader world **The Telecoms Trade War** Mark Naftel, Lawrence J Spiwak, 2001-01-15 If one were to believe the politicians and pundits in the trade press the world is in midst of a telecoms revolution resulting from the deregulation and new competitive opportunities represented by the 1997 World Trade Organisation Agreement on Basic Telecommunications Services This may be true Unfortunately however the actions of many regulators and industry participants more accurately reveal not a telecoms revolution but instead a growing telecoms trade war that is dangerously close to spiralling out of hand In this book Naftel and Spiwak review U S and European competition and regulatory initiatives post WTO and provide both a useful roadmap to today's U S EU and WTO telecoms regulation and an examination of various case studies to illustrate their points In so doing the authors discover unfortunately the sad reality that despite the political rhetoric regulators on both sides of the Atlantic have eschewed innovative and indeed productive solutions to create a market structure conducive to long term competitive rivalry Instead the authors demonstrate that current policies reveal a growing cynicism towards the maximisation of consumer welfare that will be difficult if not outright impossible to remove *OECD Reviews of Regulatory Reform: Regulatory Reform in Greece 2001* OECD, 2001-05-30 This review of regulatory reform in Greece presents an integrated assessment of areas such as the quality of the public sector competition policy and enforcement and market openness It also contains chapters on sectors such as telecommunications electricity domestic ferries and trucking *OECD Reviews of Regulatory Reform: Regulatory Reform in Korea 2000* OECD, 2000-06-02 This Review presents an integrated assessment of regulatory reform in framework areas such as the quality of the public sector competition policy and enforcement and market openness in Korea **Telecom Antitrust Handbook**, 2005 Comprehensive review of the application of antitrust law and principles to the communications market and an invaluable resource for both antitrust and telecom practitioners It discusses substantive antitrust law applicable to the communications industries including horizontal mergers vertical mergers joint ventures and restraints of trade
