glomerulonephritis G. Ponticelli, Luigi Minetti, G. D'Amico, 2012-12-06 RICHARD J GLASSOCK Introducing a scientific symposium is an uncertain and difficult task The remarks must not be too specific lest the participant s later contributions be intruded upon yet an overview of the goals and objectives of the conference should be presented in an inquisitive and stimulating fashion Perhaps a compromise position would be to make a few general statements and pose a limited number of questions which hopefully would then be addressed during the formal or informal portions of the meeting A conclusion incorpo of the relevance of the specific topic to the more rating some perspectives global issues of disease and its consequences might be appropriate The goals and objectives of this conference as set forth by its organizers Professors Ponticelli D Amico and Minetti are rather simple and straight forward namely to review and elucidate the immunopathophysiology

of cryoimmunoglobulins and auto antibodies to immunoglobulins Ig and secondarily to explore the possible participation of these disordered states in glomerular injury As such this conference is principally devoted to an analysis of two properties of certain species of the globulin fraction of serum proteins specifically the ability to self associate on the basis of immune interactions and to form insoluble aggregates when exposed to reduced ambient temperature As we shall see these two properties are often distinctly related

Idiotypes in Biology and Medicine D. A. Carson, P. P. Chen, T. J. Kipps, 1989

Idiotyping in Biology and Medicine Heinz Köhler, Jacques Urbain, Pierre-André Cazenave, 2013-10-22 Idiotyping in Biology and Medicine aims to serve the increasing interest and involvement in the practical aspects of idiotyping in biological systems The concept of idiotyping has received wide recognition and interest far beyond the area of immunology Experiments and interpretation of findings reported here clearly support the general nature of the idiotypic concept in manipulating biological systems to correct pathological conditions or to improve the immune adaptation to environmental factors The book is organized into three sections Section 1 discusses original concepts of idiotypic manipulations It reviews old and recent data important for the concept of an idiotypic network and reports on attempts to deal with the T cell receptor paradox explains the immune system in terms of a circular idiotypic network that can be demonstrated by sequential immunization and emphasizes the need for restrictions in network interactions Section 2 addresses the role and activity of idiotypic and anti-idiotypic antibodies in the regulation of the immune system Section 3 takes the issue of idiotypic anti-idiotypic out of the realm of the immune system and discusses it as a new principle to analyze and manipulate biological systems in general

Biological Application of Anti-Idiotypes Constantin A. Bona, 2018-01-18 The goal of this book is to present findings which are supportive of the concept that the words of the idiotypic dictionary and likewise self recognition are essential for communication between lymphocyte clones while some unfaithful infidel copies of the words contained in the idiotypic dictionary perhaps play a role in the functional regulation of nonlymphoid cells

Antibodies A. Szentivanyi, Paul H. Maurer, Bernard W. Janicki, 2013-03-07 This publication is based on a Symposium that has been held in Clearwater Florida on

February 19 21 1986 on antibodies their structure synthesis function and clinical applicability in disease Organization of this symposium by the University of South Florida College of Medicine was prompted by the unparalleled current expansion of information on these topics in general and in the field of antibody diversity in particular The issues that surround the last named dimension of this field began to surface in the late 1950 s with the first conclusive genetic studies having been answered and a new set of concepts has been defined As we see it from the material presented in this volume now new and different questions are being raised and answered by studies in progress and it may be expected that there will be other questions that will be with us for a considerably longer time We believe that the symposium brought together many prominent investigators with different backgrounds and training experiences such as immunologists microbiologists biochemists molecular biologists and clinical scientists thus providing an excellent example of the interdisciplinary value of modern immunology and modern biomedical science in general We believe therefore that bringing these complex topics to a wide audience of biomedical scientists through this symposium as well as this volume is of value to the scientific and to the medical community

Idiotypes Morris Reichlin, 2012-12-02 Idiotypes documents the proceedings of an International Conference on Idiotypes held in Oklahoma City Oklahoma at the Oklahoma Medical Research Foundation October 20 23 1985 The aims of the conference were to gather active investigators in the study of idiotypes to assess progress in the field and to explore directions for future research The papers presented at the conference cover a wide range of subjects Several papers deal with defining protein and DNA sequences which determine idiotypes Evidence points to germ line genes encoding the V region structures which underlie idiotypy Another subtheme which concerns several contributions is the occurrence of dominant idiotypes in induced immune responses e g arsonate and lysozyme and autoimmunity e g thyroglobulin and rheumatoid factors The presence of such dominant idiotypes is discussed from several viewpoints but the recurrent theme is that such dominance is a manifestation of a selection process inherent in the idiotypic network Two papers deal with idiotypic structures in T cells on the one hand identifying idiotypes on T helper cells and on the other I J and Iat related structures which tightly govern cellular interactions in the evolution of an immune response Network interactions through autoanti idiotypic responses are shown to be associated with the effects on the specificity of both induced and naturally occurring immune responses Autoanti idiotypic responses are also shown to be correlated with the regulation of the anti DNA response in human systemic lupus erythematosus These data pointed to a role of the idiotypic network in immune regulation
