It brings together the talented new network of politics scholars intrigued by the importance of the changing nature of state and non state regulation. Their fresh insights complement important new work by established stars of the field. Definitely a book to have on your shelf when in search of exciting theoretical approaches to politics. John Braithwaite Australian National University. Regulation in its manifold forms is the central process of contemporary governance as it seeks to blend the dynamism of market economies with responsiveness to political and normative demands for health safety environmental protection and fairness. Understanding regulation's varieties, vulnerabilities and virtues has become a significant focus of academic research and theory. This volume provides an extraordinary survey of research in that field, a survey remarkable in its comprehensiveness, outstanding in the quality of the contributions by leading regulatory scholars from different nations and academic disciplines. Robert A. Kagan University of California Berkeley US. An authoritative collection by a range of contributors with outstanding reputations in the field. Michael Moran WJ. David Levi Faur has assembled a fine collection that by reporting on the state of the art also shows the way ahead for a discipline that has to capture and explain dramatic changes in real world regulatory philosophies and policies. Claudio Radaelli University of Exeter UK. This is an unusually impressive edited volume. Its contributors include the leading academic experts on government regulation from around the world. Its several clearly written and informative essays address the most important topics, issues and debates that have engaged students of regulatory politics. I strongly recommend this volume to anyone interested in understanding the breadth and depth of contemporary scholarship on the political dimensions of regulation. David Vogel University of California Berkeley US. This unique Handbook offers the most up to date and comprehensive state of the art reviews of the politics of regulation. It presents and discusses the core theories and concepts of regulation in response to the rise of the regulatory state and regulatory capitalism and in the context of the golden age of regulation. Its ten sections include forty nine chapters covering issues as diverse and varied as theories of regulation, historical perspectives on regulation, regulation of old and new media, risk, regulation, enforcement and compliance, better regulation, civil regulation, European regulatory governance and global regulation. As a whole it provides an essential point of reference for all those working on the political, social and economic aspects of regulation. This comprehensive resource will be of immense value to scholars and policymakers in numerous fields and disciplines including political science, public policy and administration, international relations, regulation, international law, business and politics, European studies, regional studies and development studies.
