Rehabilitation Of Memory:

Cognitive Rehabilitation of Memory Helmut Hildebrandt, 2019-01-21 Cognitive Rehabilitation of Memory A Clinical Neuropsychological Introduction comprehensively reviews evidence based research for each clinical tool defining guidelines on how to assess patients and set treatment goals and best practices for creating individualized rehabilitation programs The book also provides essential background knowledge on the nature and causes of memory impairment Dr Helmut Hildebrandt describes a wide range of interventions including memory aids learning strategies and non cognitive treatment options Outlines guidelines for treating patients with memory disorder Reviews rehabilitation programs to improve memory function Examines non cognitive approaches for improving memory impairments **Cognitive Rehabilitation of Memory** Minnie Harrell, 1992 This resource fills the gap between the how to s of rehabilitating memory and the hands on information and skills needed in a clinical practice It includes assessment and treatment planning goal setting memory retraining and more

The Assessment, Evaluation and Rehabilitation of Everyday Memory Problems Barbara A. Wilson, 2013-11-07 In the World Library of Psychologists series international experts present career long collections of what they judge to be their finest work extracts from books key articles salient research findings and their major theoretical and practical contributions This volume of self selected papers recognises Professor Barbara A Wilson s major contribution to the study of neuropsychology Published over a 25 year period the papers included here address the assessment treatment and evaluation of rehabilitation provided to people who have memory difficulties arising from an injury or illness affecting the brain This selection of papers includes work on errorless learning the natural history of the development of compensatory memory systems paging systems developed to enhance independent daily living for memory impaired people and single case experimental designs to appraise the response of individual patients The final section includes a practical framework for understanding compensatory behaviour a model of cognitive rehabilitation and a discussion of the dilemmas created by the different aims of neuroscience as opposed to those of clinicians This book will be of great interest to clinical psychologists neuropsychologists occupational therapists and speech and language therapists along with anyone who is interested in reducing the impact of memory problems on people who have suffered brain injury **Rehabilitation of Memory** Barbara A. Wilson, 1988-08-26 For centuries scholars have studied memory its powers its potential and its variability It is only recently however that efforts have been made to find practical methods of helping people who have severe memory disorders In this relatively new and as yet undeveloped field REHABILITATION OF MEMORY offers important information and guidelines to those interested and involved in memory therapy Dr Barbara Wilson makes no hasty claims about restoration of lost memory functioning nor does she claim to retrain memory Recognizing that such unreal promises can only frustrate patients and disappoint their families she instead focuses on what specific items such patients can learn how best they can learn and how to assess the effectiveness of their learning An essential aspect of this work is that the information gained will prove useful to

patients in their daily lives and will enhance their chances of coping with real life situations The approach while being well informed by theory remains a practical one with relevance to the everyday lives of people with memory disorders Influenced by the three major disciplines of cognitive psychology neuropsychology and behavioral psychology Wilson draws from each to inform her work with those who are impeded by organic memory disorders The therapy she describes is structured upon frameworks that are themselves built upon unique and ingenious combinations of theories from all three of these disciplines Using this multi discipline approach she also demonstrates how to assess memory problems for rehabilitation and produce a comprehensive plan of action Reflecting an overall concern for the individuals in treatment an essential ingredient of this approach is the implementation of rigorous research designs to evaluate the effectiveness of treatment Relevant to a variety of professions clinical psychologists educational psychologists and neuropsychologists working with the memory impaired will gain an understanding of various techniques that can be employed to help their patients Occupational and speech therapists will learn practical measures to help with their patient s specific memory problems and academic psychologists will appreciate the theoretical support that has been advanced by Dr Wilson in her search for effective treatment programs

The Handbook of Memory Disorders Alan D. Baddeley, Michael D. Kopelman, Barbara A.
