capacity symptoms and morbidity and mortality Exercise Prescription for the High Risk Cardiac Patient is organized into five chapters defining the high risk patient pathophysiology and treatment options responses to acute exercise and exercise testing benefits of exercise training and suggestions for exercise programming Complete with dozens of helpful figures and tables this book is specifically designed for cardiac rehabilitation specialists MDs nurses physical therapists and exercise physiologists Cardiac Rehabilitation Nanette Wenger,1999-06-29 This detailed reference provides practical strategies and a scientific foundation for designing and implementing cardiac rehabilitation services to relieve the symptoms of cardiovascular disease patients through exercise training and risk reduction and secondary prevention improve quality of life and decrease mortality Emphasizes multidisciplinary care that includes exercise training behavioral interventions and education and counseling regarding lifestyle changes and other aspects of secondary prevention Written by world renowned physicians nurses exercise physiologists psychologists dietitians educators and counselors in the field Cardiac Rehabilitation presents evidence based medicine as the cornerstone of clinical cardiology practice discusses interventions that limit the physiological and psychological effects of cardiac illness offers guidelines that enable elderly patients to maintain self sufficiency and functional independence describes means of social and workplace reintegration evaluates policies for maintaining high quality care efficacy and safety in an atmosphere of diminishing resources explains the role of managed care in moving rehabilitative care into the home workplace and other nontraditional sites assesses new interactive technologies that aid in tracking patient data gives pragmatic recommendations for the delivery of cardiac rehabilitative care in the next millenium and more Advocating integrated high quality consistent cardiac rehabilitation services for the well being of patients recovering from a variety of cardiovascular problems and procedures Cardiac Rehabilitation is ideally suited for cardiologists cardiovascular surgeons primary care physicians cardiac rehabilitation professionals cardiac care nurses dietitians physical and occupational therapists exercise physiologists psychologists behavioral counselors hospital managers health plan designers and upper level undergraduate graduate and medical school students in these disciplines

Psychological Approach to the Rehabilitation of Coronary Patients U. Stocksmeier,1976-08-01 The increasing frequency of coronary diseases the still insufficient results of prevention have brought physicians to try to reduce as much as possible the consequences of ischaemic heart disease Coronary units and new treatments have somewhat reduced the dramatic complications of the acute phase but after the latter evil effects of the disease remain at the physiological psychological and social level It is the aim of rehabilitation to analyze these problems to reduce them or to solve them whenever possible When this conception of complete coronary care took the lead the conditioning effects of heart disease and of immobilization on physical conditions were emphasized physical training programmes were prepared and their main lines and physiological effects are now fairly well known But it was soon obvious that the psychological problems raised by the patient and his environment are equally important Their approach is however much more difficult and their treatment

particularly complex So the Council on Rehabilitation of the International Society of Cardiology is really grateful to Professor Dr HALHUBER and Dr Dr STOCKSMEIER for giving the opportunity to specialists to discuss together this particular aspect of coronary disease The discussions have been devoted to the methods of approaching the patient as well as to the therapeutic aspects and the role of psychologists in the rehabilitation programmes some papers have been devoted also to the possible role of the personality as a risk factor in the development of the disease Exercise Testing and Training in the Elderly Cardiac Patient Mark Alan Williams, 1994 Each book in the Current Issues in Cardiac Rehabilitation series is written by leaders in the field and presents a thorough review of the latest research on a cardiac rehabilitation topic identifies implications for professional practice and describes how model cardiac rehabilitation programs have applied these findings in innovative ways
