Reinterpreting Revolution In Twentieth Century Europe:

Reinterpreting Revolution in Twentieth-Century Europe Moira Donald, Tim Rees, 2017-03-14 Until the dramatic fall of Communist regimes in the East placed the possibility of revolution on the agenda once again sudden and decisive political change had appeared a largely anachronistic phenomenon in Europe Looking back over the twentieth century it is plausible to argue that the twentieth rather than the nineteenth has been the most revolutionary of centuries In this volume leading specialists from a variety of disciplines examine the changing and conflicting meanings of revolution in modern and contemporary Europe Contributions include both broad essays on the global and historical context of European revolution and specific case studies reinterpreting a variety of revolutionary experiences

Twisted Paths Robert Gerwarth, 2007-08-09 A concise introduction to European history between 1914 and 1945 this series of succinct interpretations written by leading scholars offers a new introduction to the period Covering historical developments in all areas within Europe's natural borders from the Atlantic to the Arctic Ocean from the Bosphorus to the Urals and the Mediterranean the book moves beyond the view that the history of this period can only be understood in terms of catastrophe Instead it argues for a more balanced perspective suggesting that both darker and lighter elements in Europe's history were capable of evolving simultaneously Without neglecting the more familiar stories of war genocide and economic depression each chapter demonstrates that political stability and regime collapse social progress and mass poverty the crisis of European civilization and remarkable cultural achievements existed alongside each other Emphasising the histories of the smaller states and the multi faceted nature of the period **Twisted Paths** illuminates the diversity of Europe's experiences in the first half of the twentieth century

Revolution in the Making of the Modern World John Foran, David Lane, Andreja Zivkovic, 2007-11-05 This volume questions whether ideas of revolution are still relevant in the postmodern and globalized world of the twenty first century Featuring contributions from some of the world's leading sociological and political thinkers on revolution it combines theoretical concerns with a variety of detailed case studies of individual revolutions Subjects covered include democracy and revolution from 1789 to 1989 twentieth century revolutions and theories of revolution including Marxism modernization and structuralist theories revolution in the Third World and the variable geometry of the paths to modernity Islamic revolutions and modernity the 1989 revolutions as democratic revolutions or elite led transitions globalization the nation state and revolution empire and democratic revolution network society and revolution Islamic fundamentalism international terrorism and revolution democratic revolution as a new form of revolution postmodern theories of revolution new social movements identities and new figures of revolution **Revolution in the Making of the Modern World** will be essential reading for students and scholars of comparative politics political theory revolution and political sociology

Bourgeois Liberty and the Politics of Fear Marc Mulholland, 2012-10-04 In 1842 Heinrich Heine the German poet wrote that the bourgeoisie obsessed by a nightmare apprehension of disaster and an instinctive dread of

communism were driven against their better instincts into tolerating absolutist government. There was a politics motivated by fear. Over the next 150 years the middle classes were repeatedly accused of betraying liberty for fear of red revolution. The failure of the revolutions of 1848, conservative nationalism from the 1860s, fascist victories in the first half of the twentieth century and repression of national liberation movements during the Cold War: these fateful disasters were all explained by the bourgeoisie's fear of the masses. For their part, conservatives insisted that demagogues and fanatics exploited the desperation of the poor to subvert liberal revolutions leading to anarchy and tyranny. Only evolutionary reform was enduring. From the 1970s, however, liberal revolution revived on an unprecedented scale. With the collapse of communism, bourgeois liberty once again became a crusading force but now on a global scale. In the twenty-first century the armed forces of the United States, Britain and NATO became instruments of regime change seeking to destroy dictatorship and build free market democracies. President George W. Bush called the invasion of Iraq in 2003 a watershed event in the global democratic revolution. This was an extraordinary turn around with the middle classes now hailed as the truly universal class which in emancipating itself emancipates all society. The debacle in Iraq and the Great Recession from 2008 revealed all too clearly that hubris still invited nemesis. *Bourgeois Liberty and the Politics of Fear* examines this remarkable story and the fierce debates it occasioned. It takes in a span from the seventeenth century to the twenty-first covering a wide range of countries and thinkers. Broad in its scope it presents a clear set of arguments that shed new light on the creation of our modern world.

The Return of Eurasia Glenn Diesen, Alexander Lukin, 2021-07-23 This book defines Eurasianism a political idea with a long tradition for a new century. Historically Eurasia was depicted as a third continent with a geographical and historical space distinctively different from both Europe and Asia. Today the concept is mobilized by the Russian foreign policy elite to imagine a close relationship with China and indirectly inspires the Chinese Belt and Road Initiative. A Russian-Chinese partnership forms the core of a new Eurasian region yet Turkey, India, Hungary, Central Asia and the other parts of the supercontinent are also embracing Eurasian concepts. This book is of interest to scholars of Russian and Chinese foreign policy to economists and to scholars of political thought.

Political and Social Thought in Post-Communist Russia Axel Kaehne, 2007-11-13 This is the first comprehensive study of Russian political and social thought in the post-Communist era. The book portrays and critically examines the conceptual and theoretical attempts by Russian scholars and political thinkers to make sense of the challenges of post-communism and the trials of economic, political and social transformation. It brings together the various strands of political thought that have been formulated in the wake of the collapsed communist doctrine. It engages constructively with the numerous attempts by Russian political theorists and social scientists to articulate a coherent model of liberal democracy in their country. The book investigates critical as well as favourable voices in the Russian debate on liberal democracy, a debate often marked by eclecticism and at times little conceptual discipline. As such the book will be of great interest both to Russian specialists and to all those interested in political and social thought more

widely **'The Politics' and 'The Political' of the Eastern Partnership Initiative** Elena Korosteleva, Igor Merheim-Eyre, Eske Van Gils, 2019-10-23 The Special Issue consolidates new approaches to the study of the EU's role in the eastern neighbourhood and beyond informed by post structuralist traditions in international relations More specifically by revisiting the European Neighbourhood Policy's agenda from the conceptual perspective of the political and redefining the notions of othering differentiation and normalisation this volume renders a new and much needed theoretical and empirical outlook onto the policy developments and their practices By unpacking and connecting security regional institutional normative and sector thematic policy dimensions the book seeks to re politicise the agenda and re focus policy revision on understanding the fundamentals of power relations when applied to the EU external relations In light of the compounding crises external and internal one can no longer afford to simply tinker around the edges of the policy content and instruments A more radical theoretical undertaking is overdue to re shape re define and re centre the EU relations with the eastern region especially put in the context of the new EU's Global Security Strategy and the new aspirations for the 2017 European Neighbourhood summit The chapters originally published as a special issue in *East European Politics*

Information History in the Modern World Toni Weller, 2010-12-09 Information has a rich but under explored history The information age of the late twentieth century witnessed the emergence of a new history of information and in this timely collection of essays a team of international scholars from a variety of disciplines examines the changing understandings of information in the modern world Situating the concept of information in varying historical contexts since the eighteenth century *Information History in the Modern World* *Histories of the Information Age* Explores how this historical research can challenge our perceptions of the information age in the global twenty first century Discusses ephemera wars imagery empire identification and the transience of history in the digital era Argues that the changing uses perceptions and manifestations of information helped to shape the world we know today Authoritative and approachable this is an invaluable resource for anyone who is interested in how and why information has become a distinguishing feature of the modern world

The Middling Sort of People Jonathan Barry, Christopher Brooks, 1994-10-26 This volume of essays seeks to offer a radical re evaluation of most of our preconceptions about the early modern English social order The majority of people who lived in early modern England were neither very rich nor very poor yet a disproportionate amount of historiography has been

directed towards precisely these groups This book intends to define the term middle classes and treat them as active participants of history rather than as a simple by product rising and falling according to others activities
