Relativism and Realism in Science R Nola, 1988-07-31 **Idealism, Relativism, and Realism** Dominik Finkelde, Paul M. Livingston, 2020-05-05 Several debates of the last years within the research field of contemporary realism known under titles such as New Realism Continental Realism or Speculative Materialism have shown that science is not systematically the ultimate measure of truth and reality This does not mean that we should abandon the notions of truth or objectivity all together as has been posited repeatedly within certain currents of twentieth century philosophy However within the research field of contemporary realism the concept of objectivity itself has not been adequately refined What is objective is supposed to be true outside a subject's biases interpretations and opinions having truth conditions that are met by the way the world is The volume combines articles of internationally outstanding authors who have published on either Idealism Epistemic Relativism or Realism and often locate themselves within one of these divergent schools of thought As such the volume focuses on these traditions with the aim of clarifying what the concept objectivity nowadays stands for within contemporary ontology and epistemology beyond the analytic continental divide With articles from Jocelyn Benoist Ray Brassier G Anthony Bruno Dominik Finkelde Markus Gabriel Deborah Goldgaber Iain Hamilton Grant Graham Harman Johannes Heiner Andrea Kern Anton F Koch Martin Kusch Paul M Livingston Paul Redding Sebastian Rüdiger Dieter Sturma

Relativism and Reality Robert Kirk, 1999 Our thoughts about the world are clearly influenced by such things as point of view temperament past experience and culture However some thinkers go much further and argue that everything that exists depends on us arguing that even reality is relative Can we accept such a claim in the face of events such as floods and other natural disasters or events seemingly beyond our control Realists argue that reality is independent of our thinking Relativists

disagree arguing that what there is depends on our point of view Which is right Robert Kirk provides a crystal clear account of this debate from the Greek philosophers to Wittgenstein and Rorty Along the way he unpacks some of the more complicated issues surrounding ideas of objectivity subjectivity pragmatism and realism essential for those beginning any study of philosophy

Critical Scientific Realism Ilkka Niiniluoto, 1999-12-09 Ilkka Niiniluoto comes to the rescue of scientific realism showing that reports of its death have been greatly exaggerated Philosophical realism holds that the aim of a particular discourse is to make true statements about its subject matter Niiniluoto surveys the different varieties of realism in ontology semantics epistemology theory construction and methodology He then sets out his own original version and defends it against competing theories in the philosophy of science Niiniluoto's critical scientific realism is founded upon the notion of truth as correspondence between language and reality and characterizes scientific progress in terms of increasing truthlikeness This makes it possible not only to take seriously but also to make precise the troublesome idea that scientific theories typically are false but nevertheless close to the truth
