Relativistic Fluids And Magneto Fluids With Applications In Astrophysics And Plasma Physics:

Relativistic Fluids and Magneto-fluids A. M. Anile, 1990-02-23 A unified and systematic treatment of the main results and techniques of relativistic fluid dynamics with an emphasis on waves and shock waves The first four chapters provide an introduction to the fundamental principles of relativistic fluid dynamics and magneto fluids The remaining chapters present specific topics including non linear electromagnetic waves in relativistic cold plasmas relativistic asymptotic waves and relativistic shock waves Examples of the applications of the theory to plasma physics nuclear physics and astrophysics are presented

Relativistic Fluids and Magneto-fluids A. M. Anile, 2005-12-15 A unified and systematic treatment of the main results and techniques of relativistic fluid dynamics with an emphasis on waves and shock waves The first four chapters provide an introduction to the fundamental principles of relativistic fluid dynamics and magneto fluids The remaining chapters present specific topics including non linear electromagnetic waves in relativistic cold plasmas relativistic asymptotic waves and relativistic shock waves Examples of the applications of the theory to plasma physics nuclear physics and astrophysics are presented

Relativistic Fluid Dynamics in and out of Equilibrium Paul Romatschke, Ulrike Romatschke, 2019-05-09 Presents a powerful new framework for out of equilibrium hydrodynamics with connections to kinetic theory AdS CFT and applications to high energy particle collisions

The Framework Of Plasma Physics Richard D. Hazeltine, Francois L. Waelbroeck, 2018-03-08 This book provides an excellent introduction to the fundamental physics of plasmas which comprise most of the matter in the universe It is based on lectures that were used for an introductory plasma course at the graduate level

The Cosmological Singularity Vladimir Belinski, Marc Henneaux, 2018 This book mathematically derives the theory underlying the Belinski Khalatnikov Lifshitz conjecture on the general solution of the Einstein equations with a cosmological singularity

Structures in the Universe by Exact Methods Krzysztof Bolejko, 2010 Reviews developments in applications of inhomogeneous models to cosmology for graduate students and academic researchers in astrophysics

Mathematics of Quantization and Quantum Fields Jan Dereziński, Christian Gérard, 2023-02-09 This 2013 book now OA offers a definitive review of mathematical aspects of quantization and quantum field theory

Extensions of $f(R)$ Gravity Tiberiu Harko, Francisco S. N. Lobo, 2018-11-29 Presents a detailed analysis of modified theories of gravity discussing their development cosmological and astrophysical implications and outstanding challenges

Causality, Measurement Theory and the Differentiable Structure of Space-Time R. N. Sen, 2010-02-11 Introducing graduate students and researchers to mathematical physics this book discusses two recent developments the demonstration that causality can be defined on discrete space times and Sewell's measurement theory in which the wave packet is reduced without recourse to the observer's conscious ego nonlinearities or interaction with the rest of the universe The definition of causality on a discrete space time assumes that space time is made up of geometrical points Using Sewell's measurement theory the author concludes that the notion of geometrical points is as meaningful in quantum mechanics as it

is in classical mechanics and that it is impossible to tell whether the differential calculus is a discovery or an invention
Providing a mathematical discourse on the relation between theoretical and experimental physics the book gives detailed
accounts of the mathematically difficult measurement theories of von Neumann and Sewell *Hadrons at Finite
Temperature* Samir Nath Mallik, Sourav Sarkar, 2016-10-27 An elementary introduction to hadronic properties at finite
temperature and density that develops real time methods of thermal field theory
