Halsaa, 2016-04-29 How do religious women talk about and practise citizenship How is religion linked to gender and nationality What are their views on gender equality women s movements and feminism Via interviews with Christian and Muslim women in Norway Spain and the UK this book explores intersections between religion citizenship gender and feminism **Religion, Gender, and the Public Sphere** Niamh Reilly, Stacey Scriver, 2013-11-26 The re emergence of religion as a significant cultural social and political force is not gender neutral Tensions between claims for women s equality and the rights of sexual minorities on one side and the claims of religions on the other side are well documented across all major religions and regions It is also well recognized in feminist scholarship that gender identities and ethno religious identities work together in complex ways that are often exploited by dominant groups Hence a more comprehensive understanding of the changing role and influence of religion in the public sphere more widely requires complex multidisciplinary and comparative gender analyses Most recent discussion on these matters however especially in Europe has focused primarily on the perceived subordinate status of Muslim women These debates are a reminder of the deep interrelation of questions of gender identity human rights and religious freedom more generally The relatively narrow albeit important purview of such discussions so far however underscores the need to extend the horizon of enquiry vis vis religion gender and the public sphere beyond the binary of Islam versus the West Religion Gender and the Public Sphere moves gender from the periphery to the centre of contemporary debates about the role of religion in public and political life It offers a timely multidisciplinary collection of gender focused essays that address an array of challenges arising from the changing role and influence of religious organisations identities actors and values in the public sphere in contemporary multicultural and democratic societies **Religion, Gender and Citizenship** ,2016 Through interviews with Christian and Muslim women in Norway Spain and the United Kingdom this book explores intersections between religion citizenship gender and feminism How do religious women think about citizenship and how do they practice citizenship in everyday life How important is faith in their lives and how is religion bound up with other identities such as gender and nationality What are their views on gender equality women s movements and feminism The answers offered by this book are complex Religion can be viewed as both a resource and a barrier to women s participation

The interviewed women talk about citizenship in terms of participation belonging love care tolerance and respect Some seek gender equality within their religious communities while others accept different roles and spaces for women Natural differences between women and men and their equal value are emphasized more than equal rights Women s movements are viewed as having made positive contributions to women s status but interviewees are also critical of claims related to abortion and divorce and of feminism s allegedly selfish unwomanly anti men and power seeking stance In the interviews Christian privilege is largely invisible and silenced while Muslim disadvantage is both visible and articulated Line Nyhagen and Beatrice Halsaa unpack and make sense of these findings discussing potential implications for the relationship between religion gender and feminism
