Religion And Pain The Spiritual Dimensions Of Health Care

Robert Gibbs, Elliot R. Wolfson

Religion And Pain The Spiritual Dimensions Of Health Care:

Religion and Pain Joseph Henry Fichter, 1981 **Psychosocial Resource Variables in Cancer Studies** Mark R. Somerfield, Barbara Curbow, 2014-01-14

Psychosocial Resource Variables in Cancer Studies reviews the literature on selected psychosocial resource variables in cancer in order to raise and examine conceptual and methodological issues and to offer suggestions for future directions in the field. It provides investigators and clinicians with a systematic treatment of the state of the art in research on specific resource factors and provides a careful consideration of more generic methodological and statistical issues in this research context. Editors Curbow and Somerfield define resources as aspects of a person or environment that are brought to bear on the maintenance or restoration of adaptation under taxing conditions. They hope *Psychosocial Resource Variables in Cancer Studies* is just the beginning of an ongoing discussion within the field of psychosocial oncology on the nature and use of resource variables. The book's topics are crucial since researchers appear to be committed to using resource variables to explain outcomes. Also, resource variables are increasingly considered as explanatory concepts in quality of life research. *Psychosocial Resource Variables in Cancer Studies* offers critical reviews of the major resource variables investigated in contemporary psychosocial oncology research. It provides timely information on vital issues in this research, emphasizing studies of the influence of personal and social resources on adaptation to cancer. Chapters cover topics such as the use of resource variables in the explanation of individual differences in adaptation to cancer and cancer treatment theories, measures and methodological issues in the use of perceived control, the use of the transactional model of coping to examine issues surrounding coping and the management of cancer demands, religion and spirituality as resources in coping with cancer, social support in adaptation to cancer and survival, the clinical usefulness of research on psychosocial resources, major measures of psychological functioning in psychosocial oncology research, statistical and analytical issues in the use of resource variables, roles of qualitative and quantitative approaches in exploring resource variables. The editors begin with an overview of the oncology field and offer comments on issues that can be generalized to all psychosocial resource variables. Next is a presentation of a series of review papers on selected resource variables including perceived control, coping, religion and spirituality, and social support, followed by a discussion of the clinical utility of research on these resource variables. The book concludes with a discussion of important cross-cutting methodological issues including the selection of psychological functioning outcome measures, the statistical analysis of resource variables, and quantitative versus qualitative approaches. *Psychosocial Resource Variables in Cancer* is a valuable reference and guide for health psychologists, clinical health psychologists, clinical social workers in oncology, medical sociologists, medical anthropologists, and oncology nurses. It may also serve as important reading material for courses in health psychology, physiological factors in health and illness, personality and diseases, and stress and coping.

The Living Church, 1982 **Suffering Religion** Robert Gibbs, Elliot R. Wolfson, 2003-09-02

In a diverse and innovative selection of new essays by cutting edge theologians

and philosophers *Suffering Religion* examines one of the most primitive but challenging questions to define human experience why do we suffer As a theme uniting very different religious and cultural traditions the problem of suffering addresses issues of passivity the vulnerability of embodiment the generosity of love and the complexity of gendered desire Interdisciplinary studies bring different kinds of interpretations to meet and enrich each other Can the notion of goodness retain meaning in the face of real affliction or is pain itself in conflict with meaning Themes covered include philosophy's own failure to treat suffering seriously with special reference to the Jewish tradition Martin Buber's celebrated interpretations of scriptural suffering suffering in Kristevan psychoanalysis focusing on the Christian theology of the cross the pain of childbirth in a home setting as a religiously significant choice Gods primal suffering in the kabbalistic tradition Incarnation as a gracious willingness to suffer

Living Through Pain Kristin M. Swenson, 2005 In *Living Through Pain* Kristin Swenson charts the multifaceted personal and social problems caused by chronic pain This book also surveys professional efforts to mitigate and manage pain Because the experience of pain involves all aspects of a person body mind spirit and community Swenson consults an ancient resource for wisdom perspective and insight Her close reading of selected psalms from the Hebrew Bible demonstrates that the challenge of living through pain is timeless *Living Through Pain* chronicles how these ancient texts offer a vocabulary and grammar for understanding and expressing the contemporary experience of pain Pain is a universal experience and this book invites readers to consider more fully what is involved in the process of healing

BOOK JACKET *Weiner's Pain Management* Mark V. Boswell, B. Eliot Cole, 2005-08-31 This seventh edition of a bestseller has been totally revised and updated making this the most comprehensive rewrite in the book's long and distinguished history It includes new chapters new sections and section editors and new contributors Offering an interdisciplinary approach to pain management the book delivers a scholarly presentation for
