Whole industries and internet enabled communities are being built around reproductive technologies And there s more change coming as science continues to move forward Combining intimate personal stories with cutting edge research Reconceptions invites readers to reconsider their own ideas about parenthood and embrace a new vision of the meaning of family In 2012 Rachel Lehmann Haupt an award winning journalist chose to begin a family on her own as a single mother by choice In the years since her son was born Rachel s interest in collaborative reproduction has only grown leading her to search for pioneers in reproductive science and the different permutations of families that this science is making possible In Reconceptions she shares intimate stories from the bleeding edge of society s redefinition of family including her own experience of creating a new kind of tribe with her son s dosies or donor siblings and their parents In these pages readers will meet Tyra the egg donor and professional surrogate who doesn t want kids of her own but stays in touch with several of the families she s helped in the conception of their children Sam the single father by choice who worked with a surrogate and donor egg to conceive his son who he is now raising with his girlfriend Rob and Scotty the gay couple whose egg donor is now a friend and fixture at family social gatherings The author s Facebook group of mothers who conceived their children with the same sperm donor and how the group served as a much much needed support system through the worst of the COVID pandemic Reconceptions offers a compelling vision of what advances in reproductive science mean for the definition of family in the 21st century and beyond and imparts a modern story for anyone looking to better understand their own familial relationships no matter what their family looks like
