Intelligent Data Engineering and Automated Learning - IDEAL 2005 Marcus Gallagher, James Hogan, Frederic Maire, 2005-06-20 This volume in the Lecture Notes in Computer Science series contains accepted papers presented at IDEAL 2005 held in Brisbane Australia during July 6-8 2005

Meinongian Logic Dale Jacquette, 1996 No detailed description available for Meinongian Logic

Reburial of Nonexistents Carolyn Swanson, 2011-06 Alexius Meinong claimed to uncover a brave new world of nonexistent objects He contended that unreal objects such as the golden mountain and the round square genuinely had properties such as nonexistence itself and therefore deserved a place in an all inclusive science Meinong's notion of nonexistents was initially not well received largely due to the influence and criticisms of Bertrand Russell However it has gained considerable popularity in more recent years as academics have uncovered shortfalls in Russell's philosophy and strived to explain apparent facts about the beingless Some philosophers have continued Meinong's project further explaining nonexistent objects or formulating logic systems that incorporate them The more recent developments beg for a re-examination of Meinongianism This book does just that putting the theory on trial Part One considers if Russell truly defeated Meinongianism It addresses Meinongian rejoinders in response to Russell's main criticisms and further defends Russell's alternative solution his Theory of Descriptions Part Two explores the rationale for nonexistents and their use in interpreting three types of statements characterization negative existential and intentional The book argues that despite appearances Meinongianism cannot plausibly account for its own paradigm claims whereas Russell's framework with some further elucidation can explain these statements quite well Part Three primarily addresses claims about fiction exploring the short comings of Meinongian and Russellian frameworks in interpreting them The book introduces a contextualization solution and symbolic method for capturing the logical form of such claims one with the complexity to handle cross contextual statements including negative existential and intentional ones It finally considers where that leaves nonexistent objects ultimately rejecting such so called entities

[Existence as a Real Property](#)

Francesco Berto, 2012-10-17 This profound exploration of one of the core notions of philosophy the concept of existence itself reviews then counters via Meinongian theory the mainstream philosophical view running from Hume to Frege Russell and Quine summarized thus by Kant Existence is not a predicate The initial section of the book presents a comprehensive introduction to and critical evaluation of this mainstream view The author moves on to provide the first systematic survey of all the main Meinongian theories of existence which by contrast reckon existence to be a real full fledged property of objects that some things possess and others lack As an influential addition to the research literature the third part develops the most up to date neo Meinongian theory called Modal Meinongianism applies it to specific fields such as the ontology of fictional objects and discusses its open problems laying the groundwork for further research In accordance with the latest trends in

analytic ontology the author prioritizes a meta ontological viewpoint adopting a dual definition of meta ontology as the discourse on the meaning of being and as the discourse on the tools and methods of ontological enquiry This allows a balanced assessment of philosophical views on a cost benefit basis following multiple criteria for theory evaluation

Compelling and revealing this new publication is a vital addition to contemporary philosophical ontology **Draft**

FOOTNOTES 51 INTRODUCTION SECTION I PREFACE Meinong was one of the great philosophers who stand at the
beginning of Analytic Philosophy and Phenomenology He was a contemporary of Husserl Frege Mach and Russell who were
either originally or physicists except Meinong Meinong was a historian mathematicians and always a philosopher who
became increasingly interested in experimental psychology under the influence of Franz Brentano He as each of his
contemporaries developed his own philosophy It grew in a profound fashion into a very rich realism which was curiously
enough based on a staunch empirical attitude Of all these philosophers Meinong and Husserl were most closely associated
both of them were students of Brentano and dealt each with his own philosophical tools with the same subject matter
presentations and their objects Meinong concerned himself in short critical notes with Husserl's phenomenology that is the
first volume of Ideas which was translated by W R Boyce Gibson The last section of this Introduction will be devoted to
Meinong's criticism of Husserl It is done in the last section because some of Meinong's theory is presupposed for the
understanding of his critique of Husserl
