International Handbook of Urban Education William T. Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time. In the U.S. for example, almost one third of all school age children attend schools in large urban school districts. It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic. What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea. Rather, we have discovered that the local context shapes in critically important ways what will be effective at the school level. The universality of the problematics with urban education, together with the importance of understanding the local or situated context of improvement interventions, brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education. An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region. An important question to be answered for example is what it takes in terms of resources, political will and policy actions to improve urban education.

Religious Schools in Europe Marcel Maussen,Floris Vermeulen,Michael Merry,Veit Bader,2017-10-02 The European Convention on Human Rights guarantees freedom of education including the opportunities to create and operate faith based schools However as European societies become more religiously diverse and less religious at the same time the role of faith based

schools is increasingly being contested. Serious tensions have emerged between those who ardently support religious schools in their various forms and those who oppose them. Given that faith based schools enjoy basic constitutional guarantees in Europe, the controversy around them often surrounds issues of public financing, degrees of organisational and pedagogical autonomy and educational practices and management. This volume is about the controversies surrounding religious schools in a number of Western European countries. The introductory chapter briefly analyses the structural pressures that affect the position of religious schools, outlining the relevant institutional arrangements in countries such as Denmark, Germany, France, Ireland, the Netherlands and Scotland. The following chapters provide a detailed analysis of the discussions and controversies surrounding faith based schools in each country. Finally, the two concluding chapters aim to provide a bigger comparative picture with regard to these debates about religious education in liberal democratic states and culturally pluralist societies. This book was originally published as a special issue of *Comparative Education*. Folds of Past, Present and Future Sarah Van Ruyskensvelde, Geert Thyssen, Frederik Herman, Angelo Van Gorp, Pieter Verstraete, 2021-09-07. This volume brings together important theoretical and methodological issues currently being debated in the field of history of education. The contributions shed insightful and critical light on the historiography of education on issues of decolonization, on the historical development of the educational sciences and on the potentiality attached to the use of new and challenging source material.
