**Cancer Nursing Care and Management** Victoria Harmer,2011-01-25 This book is an excellent resource for nurses working in either a hospital or primary care Breast Cancer Care News This book would be really helpful to other breast cancer nurses and students about to embark on work in this field Journal of Community Nursing This comprehensive handbook is for nurses and other healthcare professionals involved in the care of people with breast cancer It gives up to date evidence based information and practical advice on nursing care throughout diagnosis treatment recovery and end of life care Each chapter is written by an expert in the field Topics include the anatomy of the breast available treatments complementary therapies the psychological care of patients and their families and the role of the specialist nurse This book provides a well balanced approach to all aspects of managing breast malignancy The importance of writing from a nursing perspective is underlined so that the essence of support and bedside care is maintained This second edition includes Updates on guidelines as well as references to recent trials and changes to the breast screening programme A new chapter on survivorship issues covering

the long term consequences and effects of recovering from breast cancer

**A Textbook of Perioperative Care** Kate Woodhead, Paul Wicker, 2005-05-18 Woodhead and Wicker's new text will be the foremost reference source for all perioperative practitioners. The content mirrors the dynamics of modern perioperative practice by focusing on surgical interventions in all the environments in which it is currently practised including A. This book does not attempt to reflect the needs of all specialties but instead concentrates on the principles of practice applicable to any setting and any specialty. It has a very practical focus; it aims to be the book that nurses and ODPs reach for in order to answer their practical questions but is not procedure driven. Instead, it sets out the principles of perioperative practice from which practitioners will be able to develop their own practice techniques. Reflects principles of practice applicable to any perioperative environment. Strong practical focus. Edited by two of the biggest names in the international perioperative nursing sphere with contributions from other well-known and authoritative sources. Excellent opportunities to develop links with the National Association of Theatre Nurses and the European Operating Room Association. The team of contributors are experienced practitioners working directly with perioperative patients or in perioperative education. An original model for ethical practice is proposed; the Reid model is the first such ethical model to be proposed for the perioperative environment. Includes one of the only chapters in any perioperative book which specifically focuses on the care of the elderly. The research chapter encourages the use of evidence-based practice and the development of perioperative research. The unique chapter on care of the mentally ill will support practitioners who are not qualified in psychiatry to care for mentally ill patients. This is an area where there is a great information deficit. Key points listed for each chapter. Sections have been completely revised from previous edition; key subject areas now stand alone chapters rather than sections within much larger chapters, creating ease of access for user. Change of editorship. Recognises the diversity of perioperative environments much more explicitly than previous edition.

**The Royal Marsden Manual of Cancer Nursing Procedures** Sara Lister, Lisa Dougherty, Louise McNamara, 2018-10-02 The Royal Marsden is the world's first hospital dedicated to cancer diagnosis, treatment, research and education, a centre of excellence with an international reputation for ground-breaking research and pioneering the very latest in cancer treatments and technologies as well as specialising in cancer diagnosis and education.
