Blacksmiths of Ilamba Crislayne Alfagali, 2023-05-08 This study analyzes the establishment of an iron foundry in the interior 18th century of Angola It was a fruit of the Portuguese Enlightenment which encouraged investment in manufacturing particularly of iron a metal indispensable for military and technological purposes However the plans faced the resistance of African blacksmiths and founders who refused to learn foreign techniques and work processes By emphasizing Central African agency the book

highlights the successful strategies of historical actors who scholars have largely ignored Based upon a wide variety of sources from Brazilian Portuguese and Angolan archives the book reconstructs how Africans were taken to work at the foundry and the important role they played in developing the form of production employed there By emphasizing continuities with African technology and the quality of the iron produced it counters interpretations of the project as an example of the failure of the Portuguese Enlightenment The analysis demonstrates the circulation of knowledge about iron production thus revitalizing debates that have posited knowledge transmission as unidirectional It also highlights the relationship between local political leaders and the colonial government in addition to elucidating the processes by which workers were organized

Winning Workplace Wars Rev Emmanuel Oghene-Emmanuel,2024-12-17 Life they say is a battlefield from birth to death Workplace is where man tries to earn a living and there is a constant struggle for survival there like in any other part of life As a shepherd in training David battled wild animals to protect his father s flock that he was looking after When God took him from there to become king of Israel he had to wage another kind of battle It was where the priest Ahimelech was doing his legitimate job that David and Doeg visited and that visit led to the cutting short of Elimelech s life alongside that of his family and relatives and their possession in a single day This is even though he was engaged in God s work or sacred service rather than secular work Ecclesiastes 10 9 means there is life threatening risk in all human endeavours anywhere under the sun Luke 24 19 20 and Acts 10 38 29 say the fact that Jesus spent all His time going about doing good did not stop some from battling Him to death before God raised Him to life after three days I1 Samuel 7 8 9 and 1 Chronicles 17 7 8 say the journey from humble background to greatness is fraught with enemies who must be battled and defeated that require God s intervention to remove the enemies for the journey to be successful If God had not intervened David would not have completed his victoriously *May 3-6, 10, 11, 20, July19, 1965, Appendix I. 1030 p* United States. Congress. House. Select Committee on Small Business. Subcommittee on Activities of Regulatory Agencies,1966 **The Later Medieval City** David Nicholas,2014-06-17 The Later Medieval City 1300 1500 the second part of David Nicholas s ambitious two volume study of cities and city life in the Middle Ages fully lives up to its splendid precursor The Growth of the Medieval City Like that volume it is fully self sufficient though many readers will want to use the two as a continuum This book covers a much shorter period than the first That traced the rise of the medieval European city system from late Antiquity to the early fourteenth century this offers a portrait of the fully developed late medieval city in all its richness and complexity David

Nicholas begins with the economic and demographic realignments of the last two medieval centuries. These fostered urban growth, raising living standards and increasing demand for a growing range of urban manufactures. The hunger for imports and a shortage of coin led to sophisticated credit mechanisms that could only function through large cities. But if these changes brought new opportunities to the wealthy, they also created a growing problem of urban poverty; violence became endemic in the later medieval city. Moreover, although more rebellions were sparked by taxes than by class conflict, class divisions were deepening. Most cities came to be governed by councils chosen from guild members, and most guilds were dominated by merchants. The landowning elite that had dominated the early medieval cities of the first volume still retained its prestige, but its wealth was outstripped by the richer merchants, while craftsmen who had little political influence were further disadvantaged as access to the guilds became more restricted. The later medieval cities developed permanent bureaucracies providing a huge range of public services, and they were paid for by sophisticated systems of taxation and public borrowing. The survival of their fuller, richer records allows us not only to apply a more statistical approach but also to get much closer to the splendours and squalors of everyday city life than was possible in the earlier volume. The book concludes with a set of vibrant chapters on women and children and religious minorities in the city, on education and culture, and on the tenor of ordinary urban existence. Like its predecessor, this book is massively and vividly documented. Its approach is interdisciplinary and comparative, and its examples and case studies are drawn from across Europe, from France, England, Germany, the Low Countries, Iberia, and Italy, with briefer reviews of the urban experience elsewhere, from the Baltic to the Balkans. The result is the most wide-ranging and up-to-date study of its multifaceted subject. It is a formidable achievement.
