Seventy Years of Birdwatching H.G Alexander, 2010-10-30 This is a book about birdwatching birdwatchers and above all birds It is in some measure also a history of the development of modern ornithology in Britain although the author s birdwatching extended over parts of three continents Europe India and North America Seventy Years of Birdwatching is not truly an autobiography there is too little about the author in it though the personality of this exceptional shy and gentle man comes through H G Alexander began birdwatching in earnest in 1898 and has never stopped He has met or corresponded with most of the leading ornithologists of this century his first article in British Birds appeared in 1909 and it may surprise many to discover how much of practical ornithology that is deliberated today was debated and practised so many years ago During more than seventy years the author has witnessed important changes in resident and migrant bird populations in Britain Dungeness for example was almost as uninhabited as the moon when he first knew it and Kentish Plovers bred there by the score but Carrion Crows were a rarity Over the years he saw the gradual decline of the Red backed Shrike Corncrake and Wryneck but he was instrumental in bringing one bird to Britain the hitherto undiscovered Willow Tit which he with others helped to identify Fifty years ago H G Alexander had already covered scores of six inch Ordnance Survey maps with his mapping records and these together with his notebooks and correspondence with contemporaries supply an absorbing glimpse of a birdwatching era that was fascinatingly like and yet unlike our own Perhaps this is why today s birdwatcher has only to turn the pages to be enthralled

The Role of Birds in World War One Nicholas Milton,2023-02-16 The British Expeditionary Force sent to France in the late summer of 1914 has been referred to as The Best British Army Ever Sent to War as it was one of the most highly trained and disciplined forces in the world It was also the Best Birdwatching Army Ever Sent to War for among its ranks were hundreds of both amateur and professional ornithologists When not fighting many soldiers turned to birdwatching as a way of wiling away the long hours spent on guard duty or watching over no man s land As a result the hobby ranked as one of the most popular past times for soldiers at the front on a par with smoking writing games gambling sport and shooting rats The list of birds seen by soldiers serving in all the theatres of war was truly impressive ranging from the common like sparrows skylarks and swallows to the exotic like golden orioles hoopoes and bee eaters It was not just at the battle front that birds found themselves in the firing line but also on the home front Birds provided inspiration for politicians poets and painters who carried on despite the terrible conflict raging all around them For the Foreign Secretary Edward Grey who worked tirelessly to preserve peace but ended up convincing the House of Commons to go to war birds were his hinterland But as well as declaring war on Germany on 4 August 1914 the government also declared war on the humble house sparrow farmers falsely accusing it of destroying Britain s dwindling wheat and oat supplies When the guns finally fell silent on the 11 November 1918 and the Great War came to an ignoble end a generation of birdwatchers lay dead Among them were scientists researchers lords librarians artists authors professors poets lawyers surgeons and explorers many barely having entered manhood If they had lived the science of ornithology and the hobby of birdwatching would have undoubtedly been much the richer A selection of them is included in the Ornithological Roll of honor at the back of this book
