The Structure and Development of Self-consciousness Dan Zahavi, Thor Grünbaum, Josef Parnas, 2004-01-01 Self consciousness is a topic of considerable importance to a variety of empirical and theoretical disciplines such as developmental and social psychology cognitive neuroscience psychiatry and philosophy This volume presents essays on self consciousness by prominent psychologists cognitive neurologists and philosophers Some of the topics included are the infants sense of self and others theory of mind phenomenology of embodiment neural mechanisms of action attribution and hermeneutics of the self A number of these essays argue in turn that empirical findings in developmental psychology phenomenological analyses of embodiment or studies of pathological self experiences point to the existence of a type of self consciousness that does not require any explicit I thought or self observation but is more adequately described as a pre reflective embodied form of self familiarity The different contributions in the volume amply demonstrate that self consciousness is a complex multifaceted phenomenon that calls for an integration of different complementary interdisciplinary perspectives Series B

Mind in Motion Barbara Tversky, 2019-05-21 An eminent psychologist offers a major new theory of human cognition movement not language is the foundation of thought When we try to think about how we think we can't help but think of words Indeed some have called language the stuff of thought But pictures are remembered far better than words and describing faces scenes and events defies words Anytime you take a shortcut or play chess or basketball or rearrange your furniture in your mind you've done something remarkable abstract thinking without words In Mind in Motion psychologist Barbara Tversky shows that spatial cognition isn't just a peripheral aspect of thought but its very foundation enabling us to draw meaning from our bodies and their actions in the world Our actions in real space get turned into mental actions on thought often spouting spontaneously from our bodies as gestures Spatial thinking underlies creating and using maps assembling furniture devising football strategies designing airports understanding the flow of people traffic water and ideas Spatial thinking even underlies the structure and meaning of language why we say we push ideas forward or tear them apart why we're feeling up or have grown far apart Like Thinking Fast and Slow before it Mind in Motion gives us a new way to think about how and where thinking takes place

Autism and Neurotypicality Ingrid Manogg, 2024-08-21 As humans we connect What role do inner images and emotions play in this Which sensory systems do we use are we hostile to thinking What seems beautiful to us what do we perceive as a reward What are favourite children what is the significance of feelings such as envy what functions do pride and shame have What are the differences between autistic people and neurotypes in all this We ask about deep structures and conditions of origin and look at how the neurotypical patterns interact with our social system A psychological analysis with new approaches

The Joy of Movement Kelly McGonigal, 2021-03-02 Now in paperback The bestselling author of The Willpower Instinct introduces a surprising science based book that doesn't tell us why we should exercise but instead shows us how to fall in love with

movement Exercise is health enhancing and life extending yet many of us feel it s a chore But as Kelly McGonigal reveals it doesn t have to be Movement can and should be a source of joy Through her trademark blend of science and storytelling McGonigal draws on insights from neuroscience psychology anthropology and evolutionary biology as well as memoirs ethnographies and philosophers She shows how movement is intertwined with some of the most basic human joys including self expression social connection and mastery and why it is a powerful antidote to the modern epidemics of depression anxiety and loneliness McGonigal tells the stories of people who have found fulfillment and belonging through running walking dancing swimming weightlifting and more with examples that span the globe from Tanzania where one of the last hunter gatherer tribes on the planet live to a dance class at Juilliard for people with Parkinson s disease to the streets of London where volunteers combine fitness and community service to races in the remote wilderness where athletes push the limits of what a human can endure Along the way McGonigal paints a portrait of human nature that highlights our capacity for hope cooperation and self transcendence The result is a revolutionary narrative that goes beyond familiar arguments in favor of exercise to illustrate why movement is integral to both our happiness and our humanity Readers will learn what they can do in their own lives and communities to harness the power of movement to create happiness meaning and connection
