Mary of Mercy in Medieval and Renaissance Italian Art Katherine T. Brown, 2017-07-05 *Mater Misericordiae* Mother of Mercy emerged as one of the most prolific subjects in central Italian art from the late thirteenth through the sixteenth centuries. With iconographic origins in Marian cult relics brought from Palestine to Constantinople in the fifth century, the amalgam of attributes coalesced in Armenian Cilicia, then morphed as it spread to Cyprus. An early concept of Mary of Mercy, the Virgin standing with outstretched arms and a wide mantle under which kneel or stand devotees, entered the Italian peninsula at the ports of Bari and Venice during the Crusades, eventually converging in central Italy. The mendicant orders adopted the image as an easily recognizable symbol for mercy and aided in its diffusion. In this study, the author's primary goals are to explore the iconographic origins of the Madonna della Misericordia as a devotional image by identifying and analyzing key attributes to consider circumstances for its eventual overlapping function as a secular symbol used by lay confraternities and to discuss its diaspora throughout the Italian peninsula, Western Europe, and eastward into Russia and Ukraine. With over 100 illustrations, the book presents an array of works of art as examples, including altarpieces, frescoes, oil paintings, manuscript illuminations, metallurgy, glazed terracotta, stained glass, architectural relief, sculpture, and processional banners.

Painting the Soul Robin Cormack, 2013-06-01 *Painting the Soul* is a beautifully illustrated study of the creation and development of the icon. This book is a firework display. It sets off scores of explosions which light up the sky over arching our field terrain that is normally traversed nose down and too mindful of the footsteps of our predecessors. *Burlington Magazine*. ***The Art of Anatomy in Medieval Europe*** Taylor McCall, 2023-07-31 A new history of the medieval illustrations that birthed modern anatomy. This book is the first history of medieval European anatomical images. Richly illustrated. *The Art of Anatomy in Medieval Europe* explores the many ways in which medieval surgeons, doctors, monks, and artists understood and depicted human anatomy. Taylor McCall refutes the common misconception that Renaissance artists and anatomists such as Leonardo da Vinci and Andreas Vesalius were the fathers of anatomy who performed the first human dissections. On the contrary, she argues that these Renaissance figures drew upon centuries of visual and written tradition in their works.

Garland of Visions Jinah Kim, 2021-02-16 *Garland of Visions* explores the generative relationships between artistic intelligence and tantric vision practices in the construction and circulation of visual knowledge in medieval South Asia. Shifting away from the traditional connoisseur approach, Jinah Kim instead focuses on the materiality of painting, its mediums, its visions, and especially its colors. She argues that the adoption of a special type of manuscript called pothi enabled the material translation of a private and internal experience of seeing into a portable device. These mobile and intimate objects then became important conveyors of many forms of knowledge: ritual, artistic, social, scientific, and religious, and spurred the spread of visual knowledge of Indic Buddhism to distant lands. By taking color as the material link between a vision and its artistic output, *Garland of Visions* presents a fresh approach to the history of Indian painting.
