away From Belly Fat to Belly Flat Genie James, C. W. Randolph, 2010-01-01 Weight loss research shows that the average person will add 1 to 2 pounds around their abdomen each year between the ages of 35 and 55 without changing their eating or exercise habits. Noted expert Dr C W Randolph explains why estrogen dominance a natural shift in hormone production that begins at age thirty which causes weight gain and sabotages the most steadfast attempts at shedding it. Even worse estrogen places the added weight around the middle which has a negative impact both aesthetically and medically. Once estrogen dominance has taken hold it creates a vicious cycle fat cells will produce even more estrogen which then biochemically predisposes the body to add on even more pounds. Here Dr Randolph introduces the three step plan he's used with success in thousands of patients. In simple language Dr Randolph lays out the facts about bioidentical hormones and explains what foods and supplements guard against or reverse estrogen dominance. He also shares client success stories and presents practical eating plans, recipes and shopping guides to put the advice into practice. **What Your Doctor May Not**

Tell You About(TM) John Lee, Virginia Hopkins, 2024-09-24 From a doctor who has pioneered in women's health an alternative to HRT for managing menopause symptoms. Christiane Northrup MD author of *The Wisdom of Menopause*. Arguing that giving estrogen replacement therapy to women after menopause is medically the wrong thing to do, Dr John Lee suggests that natural progesterone can prevent most of the unpleasant side effects of menopause including osteoporosis and weight gain. *Menopause - The Commonsense Approach* Ruth Appleby, 1998-04-01 The menopause is a natural stage in every woman's life. Now thanks to *Menopause The Commonsense Approach* a practical and optimistic guide to the

menopause experience you can get through it with grace and confidence. Many women can go through this process naturally and gracefully while retaining their vitality and energy. However, recent over emphasis on the difficulties of the menopause have led it to be labelled as a condition that needs intervention and treatment. Homeopath Ruth Appleby approaches menopause in a positive and sensible way. She explains what it is, the early signs to watch out for and exactly what changes will occur in the body. From hot flushes to thinning hair she has menopause covered. She also gives advice on how to improve your overall state of health, believing that women who have general good health should experience fewer problems. For those who do have difficulties she suggests many natural and holistic solutions: diet, exercise, homeopathy, herbal remedies, supplements and Hormone Replacement Therapy. The Commonsense Approach series is a series of self help guides that provide practical and sound ways to deal with many of life's common complaints. Each book in the series is written for the layperson and adopts a commonsense approach to the many questions surrounding a particular topic. It explains what the complaint is, how and why it occurs and what can be done about it. It includes advice on helping ourselves and information on where to go for further help. It encourages us to take responsibility for our own health to be sensible and not always to rely on medical intervention for every ill. Other titles in the series include *Depression The Commonsense Approach*, *Headaches The Commonsense Approach* and *Stress The Commonsense Approach*. *Menopause The Commonsense Approach*. Table of
