Environmental Audit Committee, 2015 Where LNPs have been successful they have demonstrated the benefits of local engagement harnessing enthusiasm in finding solutions to local priorities Where they have not been successful the solution is not to impose additional tasks but to re energise the unfocussed local commitment Many LNPs are starved of funding and resources meaning much of the good work in getting them up and running is being undone The whole country urban as well as rural need the natural environment protections that LNPs can provide Rather than leave under performing LNPs to wither away the next Government should urgently review LNPs and their funding and re energise the initiative

Nature and Culture in Intimate Partner Violence Silvia Bonino, 2018-11-16 This innovative book aims to further our understanding of violence in intimate relationships between men and women by combining research from psychology cultural studies and biology The author examines why western culture often justifies and encourages primitive forms of relationships based on domination and submission and considers not only the cultural influences but also the biological aspects in their interaction The book clarifies the biological roots of aggression and affection in intimate relationships in humans showing that considering the biological roots of male dominance on women does not imply any justification Bonino makes the case that awareness about the biological roots of violence and about the cultural messages supporting them is necessary for developing different messages and educational practices promoting human capacity of personal affective relationship where partners empathically recognize themselves as equal human beings Relationships are examined in relation to a domination submission framework with the author emphasizing the role individuals can play in

Living with Nature Frank Fischer,Maarten Hajer,1999-06-24 Despite the optimism of the Earth Summit held in Rio de Janeiro in 1992 the politics of environmental sustainable development has reached an impasse Why do issues of environmental protection continue to take a back seat to economic competition particularly in the international realm Once the environmental problem was widely recognised it was held that consensus could be reached In practice however the

development of sustainability had often continued to merely extend earlier technocratic practices and solutions which fail to take into consideration the specific cultural questions Living With Nature seeks to place the question of the dynamics of environmental crisis within a socio cultural dimension of the existing economic and political institutions The book argues for a need to find a new balance between a theoretical analysis of the debate and an appreciation of local circumstances norms and knowledge Politically it implies an implicit understanding of the way in which we live together with nature *The Interpersonal, Cognitive, and Social Nature of Depression* Thomas Joiner (Jr.), Thomas E.
