Out Of Bounds And Out Of Control Regulatory Enforcement At The Epa:

Out of Bounds, Out of Control James V. DeLong, 2002 People fear to dispute the agency's interpretation of its power or express doubts about the absolute primacy of its mission lest they be made into examples The concept of intent has become so attenuated that it provides no limitation on prosecution *Green Politics* Dustin Mulvaney, 2011-06-28 Colorful bracelets funky brooches and beautiful handmade beads young crafters learn to make all these and much more with this fantastic step by step guide In 12 exciting projects with simple steps and detailed instructions budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble Following the successful Art Smart series Craft Smart presents a fresh fun approach to four creative skills knitting jewelry making papercrafting and crafting with recycled objects Each book contains 12 original projects to make using a range of readily available materials There are projects for boys and girls carefully chosen to appeal to readers of all abilities A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills *Saving Our Environment from Washington* David Schoenbrod, 2008-10-01 Congress empowered the Environmental Protection Agency on the theory that only a national agency that is insulated from accountability to voters could produce the scientifically grounded pollution rules needed to save a careless public from its own filth In this provocative book David Schoenbrod explains how his experience as an environmental advocate brought him to this startling realization letting EPA dictate to the nation is a mistake Through a series of gripping and illuminating anecdotes from his own career the author reveals the EPA to be an agency that under Democrats and Republicans alike delays good rules imposes bad ones and is so big muscle bound and remote that it does unnecessary damage to our society EPA stays in power he says because it enables elected legislators to evade responsibility by hiding behind appointed bureaucrats The best environmental rules those that have done the most good have come when Congress had to take responsibility or from states and localities rather than the EPA With the passion of an authentic environmentalist Schoenbrod makes a sensible plea for bottom up environmental protection now The responsibility for pollution control belongs not in agencies but in legislatures and usually not at the federal level but rather closer to home

Cato Handbook for Policymakers Cato Institute, David Boaz, 2008 Offers policy recommendations from Cato Institute experts on every major policy issue Providing both in depth analysis and concrete recommendations the Handbook is an invaluable resource for policymakers and anyone else interested in securing liberty through limited government *Cato Handbook For Policymakers* David Boaz, 2009-02-19 Now in its seventh edition the Cato Handbook for Policymakers sets the standard in Washington for reducing the power of the federal government and expanding freedom The 63 chapters each beginning with a list of major policy recommendations offer issue by issue blueprints for promoting individual liberty free markets and peace Providing both in depth analysis and concrete recommendations Cato's Handbook is an invaluable resource for policymakers and anyone else interested in securing liberty and limiting government **Cato Handbook for**

Congress Cato Institute, Edward H. Crane, David Boaz, 2003 Offering policy recommendations supported by brief rationales this handbook offers the capitalist libertarian perspective on issues currently facing Congress Highlights include advice on campaign finance reform the USA PATRIOT Act the war on drugs monetary policy deregulation taxes education

Democratic Legitimacy Pierre Rosanvallon, 2011-07-05 It is a commonplace that citizens in Western democracies are disaffected with their political leaders and traditional democratic institutions But in Democratic Legitimacy Pierre Rosanvallon one of today's leading political thinkers argues that this crisis of confidence is partly a crisis of understanding He makes the case that the sources of democratic legitimacy have shifted and multiplied over the past thirty years and that we need to comprehend and make better use of these new sources of legitimacy in order to strengthen our political self belief and commitment to democracy Drawing on examples from France and the United States Rosanvallon notes that there has been a major expansion of independent commissions NGOs regulatory authorities and watchdogs in recent decades At the same time constitutional courts have become more willing and able to challenge legislatures These institutional developments which serve the democratic values of impartiality and reflexivity have been accompanied by a new attentiveness to what Rosanvallon calls the value of proximity as governing structures have sought to find new spaces for minorities the particular and the local To improve our democracies we need to use these new sources of legitimacy more effectively and we need to incorporate them into our accounts of democratic government An original contribution to the vigorous international debate about democratic authority and legitimacy this promises to be one of Rosanvallon's most important books

Government 3.0 - Next Generation Government Technology Infrastructure and Services Adegboyega Ojo, Jeremy Millard, 2017-10-26 Historically technological change has had significant effect on the locus of administrative activity cost of carrying out administrative tasks the skill sets needed by officials to effectively function rules and regulations and the types of interactions citizens have with their public authorities Next generation Public Sector Innovation will be Government 3.0 powered by innovations related to Open and big data administrative and business process management Internet of Things and blockchains for public sector innovation to drive improvements in service delivery decision and policy making and resource management This book provides fresh insights into this transformation while also examining possible negative side effects of the increasing openness of governments through the adoption of these new innovations The goal is for technology policy makers to engage with the visions of Government 3.0 Researchers should be able to critically examine some of the innovations described in the book as the basis for developing research agendas related to challenges associated with the adoption and use of some of the associated technologies The book serves as a rich source of materials from leading experts in the field that enables Public administration practitioners to better understand how these new technologies impact traditional public administration paradigms The book is suitable for graduate courses in Public Sector Innovation Innovation in Public Administration E Government and Information Systems Public sector technology policy makers e government

Big Government-- Poor Grandchildren Durham W. Ellis, 2006

Wealth and liberty and the wealth and liberty of our descendents depend on the wise system of limited government established by the Founding Fathers in the Constitution and the Bill of Rights That system however has been under continuous siege for decades by Democratic and Republican Controllers proponents of Big Government who sell the public security in return for those things we should hold most dear wealth and liberty themselves It s not worth it author Durham Ellis argues and it s time for Americans to take back their country by electing leaders who uphold the principles of our Constitution In *Big Government Poor Grandchildren* Ellis develops a powerful critique of contemporary American politics examining crucial issues

Environmental Law and the Values of Nature Richard J. Finkmoore, 2010 This casebook provides students in introductory environmental law courses with the broad understanding necessary to practice in the field and a firm foundation for subsequent course work in specialized environmental subjects In addition to covering many standard topics such as NEPA and the Clean Water Act this book emphasizes natural resources law including water allocation species conservation and federal public land management Unlike many casebooks it also examines energy issues climate change sustainable development and the environmental movement This distinctive book uses the historical development of environmental and natural resources law as a helpful context within which to understand the modern law in these fields It also incorporates eight engaging case studies showing the application of environmental law in the real world The volume includes significant excerpts from the major environmental statutes so that it is not necessary to assign a statutory supplement Thought provoking readings from for example Lewis and Clark Marsh Muir Udall Wilkinson Sax Lazarus Rodgers Shabecoff Hays E O Wilson Leopold Reisner and Speth enhance student insight One theme of the casebook which promotes enthusiastic class discussion is that the environment possesses a wide range of values or characteristics of worth and that an appreciation of these values illuminates the objectives strengths and limitations of contemporary law
