A. van der Wal, 1997 **Doctors' Errors and Mistakes of Medicine** Moshe Wolman, Ruth Manor, 2004 During the last decades healthcare in the various industrialized countries has been deteriorating steadily The enormous progress of medicine in the same period could only partly compensate for the loss This book describes the deterioration of healthcare that increases continually It analyses its causes and outlines the measures that might prevent or at least slow the change The deterioration of healthcare variable in different fields progressing at different paces in the various industrialized countries is produced mainly by two types of causes Minor ones resulting from lack of knowledge or by inadequate equipment or procedures can be corrected by relatively simple means such as education and technical or procedural improvements The major causes for the deterioration involve general policy whose effects are the steady decrease in monitoring health care and the change of healthcare into profit seeking service The data collected and its analysis is based on over 300 articles in major medical and nursing journals It has three parts part 1 deals with individual doctors errors part 2 with errors of the medical establishment and part 3 is devoted to more theoretical a *The Good Doctor* Ron

Paterson, 2013-11-01 Drawing upon real accounts of negligence incompetence and distrust this book seeks to identify the key competencies of a good doctor the ways in which medical care fails and the roadblocks to ensuring that every licensed doctor is capable Arguing that it is possible to improve patient care by lifting the veils of secrecy and better informing patients by establishing more effective ways of checking doctors competence and by ensuring that medical watchdogs protect the public this discussion offers an expert's perspective on health care The Philosophy and Practice of Medicine and Bioethics

based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one s thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc

No Magic Bullet Allan M. Brandt, 2020-06-19 The epidemic of AIDS and herpes virus has called into question not only the ability of the medical profession to treat venereal disease but also its willingness to do so *No Magic Bullet* a perceptive analysis of the treatment of venereal diseases since the 1880s places these questions in critical historical perspective Beginning with Victorian hysteria about syphilis and continuing to contemporary treatment of AIDS Allan Brandt recounts the various medical military and public health responses to venereal diseases that have arisen over the years Brandt demonstrates that Americans tendency to view sexually transmitted disease as both a punishment for sexual misconduct and an index of social decay has seriously impeded efforts to develop magic bullets the miracle drugs that would effectively halt the spread of infection For this 35th Anniversary Edition Brandt reflects on recent scholarship the persistence of sexually transmitted diseases and the trajectory of the HIV epidemic as they have informed contemporary conceptions of biomedicine and global health

Reconstructing Medical Practice Christine Jorm, 2016-04-08 *Reconstructing Medical Practice* examines how doctors see health care and their place in it why they remain in medicine and why they are limited in their ability to lead change in the current system Doctors are beset by doubts and feel rejected by systems where they should be leaders some see their role as flog ging a derelict system to get the last breath of workability out for their patients Others simply turn away Rigorous studies carried out at large public teaching hospitals in Australia found that doctors were reluctant to increase safety in the wider health system despite making every effort for their own patients Doctors self esteem was found to be delicate due to the uncertain nature of their work colleagues provide the support doctors need to deliver good care However these essential relationships and their cherished connections with patients have disadvantages reducing doctors ability to admit to error On top of this senior doctors predict a future bereft of professional values one where medicine is just a job While the loss of professional identity introduces new risks for patients and doctors the repercussions of the more self serving attitudes of younger doctors are unknown *Reconstructing Medical Practice* concludes that regulation despite its recent proliferation is a clumsy and limited approach to ensuring good care It presents original and much needed ideas for ways to rebuild the critical relationship between doctors and the system By better valuing communicative interactions and

workplace relationships safe and satisfying medical practice can be reconstructed **Doctors' Marriages** Michael Myers, 2013-04-17 In marriage partners bring together preexisting psychological and cultural histories which may be quite disparate The idea that love conquers all does not account for the complexities involved in the development of a contemporary partnership Societal changes over the past few decades have resulted in important shifts in patterns of relationships Lengthened life spans decreased incidence and severity of illness and disability and the availability of contraception have affected our lives and plans substantially Among the effects are marriages that last longer than they ever have and produce fewer children despite the high divorce rate Values and expectations in marriage have also changed over the past several decades shifting from an emphasis on survival and economic security to a focus on companionship love and communication The desire for self fulfillment has superseded more traditional concerns about family loyalty and responsibility Thus divorce is often sought as a solution to frustration disappointment and conflict A societal change that has had considerable influence on individuals and their relationships has been the emergence of the women's movement and changing roles and expectations for women This change has brought new demands fulfillments and conflicts Current styles of marriage have shifted from an automatic acceptance of clearly designated gender determined roles toward more egalitarian and interdependent relationships with partners also expressing their own goals styles and personalities The dual career or dual worker family has emerged as the dominant family structure in the United States
