Public Opinion And Political Change In China:

Public Opinion and Political Change in China Wenfang Tang, 2005 This book describes through case studies how various factors such as the single party political system traditional culture market reform and industrialization shape public opinion and mass political behavior in urban China Case studies focus on the process of conducting public opinion polls in China s political environment regime legitimacy and reform support media control and censorship interpersonal trust and democratization mass political participation labor relations and trade unions and the role of intellectuals in political change The book draws most of its empirical evidence from twelve Chinese public opinion surveys conducted between the late 1980s and the late 1990s The same questions repeated in many of these surveys provide a rare opportunity to examine the changing pattern of the Chinese public mind during this period The book ends with the provocative conclusion that China s authoritarian political system proved to be less effective than traditional culture marketization and industrialization in shaping public opinion and mass political behavior Liberal ideas and bottom up political participation can emerge even in the absence of direct elections

Changing State-society Relations In Contemporary

China Wei Shan, Lijun Yang, 2016-08-30 This book attempts to provide an overview of social and political changes in Chinese society since the global financial crisis. Rapid economic development has restructured the setup of society and empowered or weakened certain social players. The chapters in this book provide an updated account of a wide range of social changes including the rise of the middle class and private entrepreneurs, the declining social status of the working class as well as the resurgence of non-governmental organisations and the growing political mobilisation on the internet. The authors also examine the implications of those changes for state-society relations, governance, democratic prospects and potentially for the stability of the current political regime.

China's Challenges Jacques deLisle, Avery Goldstein, 2014-10-24 When the fifth generation of Communist Party leaders in China assumed top political positions in 2012-2013, they took the helm of a country that has achieved remarkable economic growth, political stability and international influence. Yet China today confronts challenges at least as daunting as any it has faced since the reform era began in the late 1970s. In November 2013, the Chinese Communist Party's Central Committee announced ambitious reforms to address vital issues such as giving market forces a decisive role in the economy, strengthening the social safety net, assigning greater weight to factors other than economic growth and social order in evaluating local officials, promoting urbanization and relaxing the one-child policy. *China's Challenges* brings together fourteen experts on China's social, economic, political, legal and foreign affairs to examine some of the nation's pivotal policy issues. Their wide-ranging analyses cover economic and social inequality, internal migration and population control imperatives to rebalance China's economy toward domestic demand and consumption, problems of official corruption, tensions between legal reform and social order and the strained relationships with neighboring countries and the United States that stem from China's rising power, military modernization, enduring territorial disputes and rising nationalism in domestic politics. This timely volume offers a broad and comprehensive look at the issues facing China today and lays the groundwork for understanding the shifts to come. How and how well China handles these challenges not only will define China's trajectory for years to come but will have repercussions far beyond China's borders. Taylor Fravel, Avery Goldstein, Yasheng Huang, Zai Liang, Benjamin Liebman, Melanie Manion, Barry Naughton, Daniela Stockmann, Robert Sutter, Guohui Wang.

Media Commercialization and Authoritarian Rule in China Daniela Stockmann, 2013. Stockmann argues that the consequences of introducing market forces to the media depend on the institutional design of the state.

Populist Authoritarianism Wenfang Tang, 2016-01-04. *Populist Authoritarianism* focuses on the Chinese Communist Party which governs the world's largest population in a single-party authoritarian state. Wenfang Tang attempts to explain the seemingly contradictory trends of the increasing number of protests on the one hand and the results of public opinion surveys that consistently show strong government support on the other hand. The book points to the continuity from the CCP's revolutionary experiences to its current governing style even though China has changed in many ways on the surface in the post-Mao era. The book proposes a theoretical framework of

Populist Authoritarianism with six key elements including the Mass Line ideology accumulation of social capital public political activism and contentious politics a hyper responsive government weak political and civil institutions and a high level of regime trust These traits of Populist Authoritarianism are supported by empirical evidence drawn from multiple public opinion surveys conducted from 1987 to 2015 Although the CCP currently enjoys strong public support such a system is inherently vulnerable due to its institutional deficiency Public opinion can swing violently due to policy failure and the up and down of a leader or an elite faction The drastic change of public opinion cannot be filtered through political institutions such as elections and the rule of law creating system wide political earthquakes Debating Regime Legitimacy in Contemporary China Suisheng Zhao, 2018-10-11 This comprehensive volume is a three part study of whether the Chinese political system has maintained a significant degree of regime legitimacy in the context of rising domestic discontent in particular the popular protests against socio economic inequality and environment degradation Part I presents the scholarly debate on the theoretical refinement and empirical measurement of regime legitimacy in contemporary China Part II focuses on the challenges to regime legitimacy of the increasingly widespread popular protests and civil activism Part III examines the regime's responses to these challenges including coercive repression adaptation and economic performance This book finds that while repression can hardly stop popular protests and often backfires economic performance legitimacy is increasingly difficult to be maintained The only way out is the adaptation to the changing domestic and international environment The chapters in this collection were originally published in the Journal of Contemporary China *The Making of Chinese Criminal Law* Ying Ji, 2021-03-08 By examining the reasons behind the preventive criminalization of Chinese criminal law this book argues that the shift of criminal law generates popular expectations of legislative participation and meets punitive demands of the public but the expansion of criminal law lacks effective constraints which will keep restricting people's freedom in the future The book is inspired by the eighth amendment of Chinese criminal law in 2011 which amended several penalties related to road drug and environmental safety It is on the eighth amendment that subsequent amendments have been based The amendment stemmed from a series of nationally known incidents that triggered widespread public dissatisfaction with the Chinese criminal justice system Based on John Kingdon's theory of the multiple streams the book explains the origins of the legislative process and its outcomes by examining the role of public opinion policy experts and political actors in the making of Chinese criminal law It argues that in authoritarian China the prominence of risk control through criminal justice methods is a state response to uncertainties generated through reforms under the CCP's leadership The process of criminal lawmaking has become more responsive and inclusive than ever before even though it remains a consultation with the elites within the framework set by the Chinese Communist Party CCP including representatives of the Lianghui government ministries academics and others The process enhances the CCP's legitimacy by not only generating popular expectations of legislative participation but also by meeting the punitive demands of the public The book will be of

interest to academics and researchers in the areas of Chinese criminal law and comparative law *Popular Political Support in Urban China* Jie Chen, 2004 On the basis of three carefully drawn surveys of Beijing residents between 1995 and 1999 the author finds that diffuse support for the current political system based on attitudes toward institutions and values remains strong at least among city dwellers though it is gradually declining *Political Culture and Participation in Urban China* Yang Zhong, 2017-10-04 This book discusses one of the most noticeable and significant transformations in China over the past three decades is the rapid and massive urbanization of the country which has brought shifts in political culture of Chinese urbanites This book is a systematic and empirical study of political culture in urban China The book covers various aspects of political culture such as political regime support political interest democratic values political trust and environmental attitudes and sub political culture of Chinese urban Christians This book will be of immense value to urban scholars sinologists and those wishing to get a closer look at the issues that affect the political future of a rising world power

Economic Transition and Political Legitimacy in Post-Mao China Feng Chen, 1995-09-14 Tracing the role of ideas in Chinese economic reform from 1978 to the present this book explores the conversion of China's policymakers to capitalist economic thinking Chen argues that the reform process has created a gap between the legitimacy of the leadership which remains rooted in Marxist Leninist ideology and the practice of reform which has abandoned such ideological constraints Through a systematic survey of party documents and resolutions official publications leaders speeches academic journals and newspapers Chen shows how Chinese policymakers reconceptualized the ownership system and adjusted related policies Focusing on a number of economic policy issue areas such as state economy rural reform privatization and income distribution he analyzes in depth the implications of this gap for the current Chinese leadership and the future of China's political development **Journal of East Asian Studies** , 2007
