Everyday Heroism: Victorian Constructions of the Heroic Civilian John Price, 2014-01-16 Heroism in the 19th and early 20th centuries is synonymous with military endeavours imperial adventures and the great men of history There was however another prominent and influential strand of the idea which has until now been largely overlooked This book seeks to address this oversight and establish new avenues of study by revealing and examining everyday heroism acts of life risking bravery undertaken by otherwise ordinary individuals largely in the course of their daily lives and within quotidian surroundings Adopting an interdisciplinary approach John Price charts and investigates the growth and development of this important discourse presenting in depth case studies of The Albert Medal and the Carnegie Hero Fund alongside a nationwide analysis

of heroism monuments and an exploration of radical approaches to the concept Unlike its military and imperial counterparts everyday heroism embraced the heroine and this study reflects that with an examination of female heroism Discovering why certain individuals or acts were accorded the status of being heroic also provides insights into those that recognized them Heroism is a flexible and malleable constellation of ideas shaped or constructed along different lines by different people so if you want to identify the characteristics of a group or society much can be learnt by studying those it holds up as heroic Consequently Everyday Heroism Victorian Constructions of the Heroic Civilian provides valuable and revealing evidence for a wide range of social and cultural topics including class gender identity memory celebrity and literary and visual culture

reconsider major historical episodes that made up its national narrative Part of this process was a reassessment of heritage sites because such places carry socio political meaning as do the memorials that mark them This book engages the four way intersection of commemoration preservation tourism and urban planning at some of the most notable historic locations in England The various actors in this process from the national government and regional councils to private organizations and interested individuals did nothing less than engineer British national memory The author presents case studies of six famous British places namely battlefields Hastings and Bosworth political sites Runnymede and Peterloo and world s fairgrounds the Crystal Palace and Great White City In all three genres of heritage sites one location developed through commemorations and tourism while the other anti sites simultaneously faltered as they were neither memorialized nor visited by the masses Ultimately the book concludes that the modern social and political environment resulted in the revival creation or erasure of heritage sites in the service of promoting British national identity A valuable read for British historians as well as scholars of memory public history and cultural studies the book argues that heritage emerged as a discursive arena in which British identity was renegotiated through times of transitions both into a democratic age and an era of geopolitical decline
